RE: Alves Ranch Development, Honker Bay, Contra Costa County

Dear Mr. DePietro:

A record search of the Native American Heritage Commission (NAHC) *Sacred Lands File* was completed for the area of potential project effect (APE) referenced above with negative results. **Please note that the absence of specific site information in the *Sacred Lands File* does not indicate the absence of Native American cultural resources in any APE.**

I suggest you contact all of those listed, if they cannot supply information, they might recommend others with specific knowledge. The list should provide a starting place to locate areas of potential adverse impact within the APE. **By contacting all those on the list, your organization will be better able to respond to claims of failure to consult.** If a response has not been received within two weeks of notification, the NAHC requests that you follow-up with a telephone call to ensure that the project information has been received.

If you receive notification of change of addresses and phone numbers from any of these individuals or groups, please notify me. With your assistance we are able to assure that our lists contain current information. If you have any questions or need additional information, please contact via email: [sharaya.souza@nahc.ca.gov](mailto:sharaya.souza@nahc.ca.gov).

Sincerely,

A handwritten signature in blue ink, appearing to read "Sharaya Souza".

**Re: Paleontological Records Search: Alves Ranch Project (3746.0002), Contra Costa County, California**

Dear Dr. DePietro:

As per the request of Spencer Pignotti, I have performed a records search on the University of California Museum of Paleontology (UCMP) database for the Alves Ranch project in Contra Costa County. The project site is southeast of Shore Acres, east of San Marco Boulevard and west of Bailey Road, between California Delta Highway and West Leland Road. Its PRS location is Sec. 15, T2N, R1W, Honker Bay quadrangle (USGS 7.5-series topographic map). On Google Earth imagery, it appears that this is relatively flat, sparsely vegetated terrain that has been disturbed by previous agricultural use.

### Geologic Units

According to the part of the geologic map by Dibblee (1980) shown here, the Alves Ranch project site (red outline at center) and surrounding half-mile area (dashed black outline) are located mostly on nonmarine sedimentary and volcanic rocks of Pliocene age, locally referred to as the Tehama Formation. Pleistocene alluvium is north-adjacent to the site and both units are bisected by Holocene alluvium (Qa). Holocene deposits are too young to contain fossils, whereas the Pleistocene and Pliocene units have the potential of yielding significant paleontological resources.

### Key to mapped units

- Qa** Surficial alluvium (Holocene)
- Qoa** Older alluvium (Pleistocene)
- Tps** Nonmarine sedimentary and volcanic rocks: weakly indurated clay, sand and pebble gravel; locally called the Tehama Formation (Pliocene) clay shale and siltstone, massive to vaguely bedded (middle to late Miocene)
- Tlt** Lawler Tuff: pumiceous tuff breccia (Pliocene)

### **Records Search**

The paleontological record search for the Alves Ranch project was performed on the University of California Museum of Paleontology (UCMP) database. The results are 9928 vertebrates from 64 Pleistocene and 1267 vertebrates from 12 Pliocene localities in Contra Costa County. The nearest vertebrate locality is V90070 (Lawler Ravine), in the Pliocene Wolfskill Formation (Blancan NALMS), just east of the half-mile search area at the southwest corner of the intersection of Leland and Bailey roads; no specimens are recorded for it in the database.

### **Remarks and Recommendations**

The Alves Ranch project site will impact Pliocene nonmarine deposits similar to those in Contra Costa County that have yielded a very rich vertebrate paleofauna. A pre-construction paleontological walkover survey of the site would be unwarranted because its surface is disturbed. However, I recommend paleontological monitoring of all project-related excavations of previously undisturbed deposits because the Pliocene deposits that dominate the site are highly sensitive for significant paleontological resources. Should any vertebrate remains (e.g., bones, teeth) be encountered, all construction-related activities should be diverted from the find until a professional paleontologist has properly recorded and evaluated it, and, if deemed appropriate, salvaged it in a timely manner. Recovered fossils should be deposited in an appropriate repository, such as the UCMP, where they will be properly curated and made available for scientific research and education.

Sincerely,

## Appendix C: Geological Investigation Memorandum

THIS PAGE INTENTIONALLY LEFT BLANK

June 1, 2018

Ms. Mandy Leung  
William Lyon Homes, Inc.  
4000 Executive Parkway, Suite 250  
San Ramon, CA 94583

Re: Geological and Geotechnical Information for EIR  
Alves Ranch, Pittsburg, California  
*SFB Project No.: 241-25*

Ms. Leung:

In accordance with your request, Stevens, Ferrone & Bailey Engineering Company, Inc. (SFB) is providing the following information that can be used to supplement the EIR for the Alves Ranch project in Pittsburg, California.

## **1.0 Project Description**

Based on the information provided by Mr. Scott Hilk of William Lyon Homes, it is our understanding that the project will consist of developing approximately 26 acres into four residential neighborhoods consisting of duet and single-family structures, a recreation area, and associated infrastructure such as underground utilities, asphalt concrete roadways, parks, and storm water remediation facilities. In addition, a commercial development encompassing approximately 12 acres in area is planned. The site was previously mass graded as a part of the larger Vista Del Mar residential development to the south under the guidance of Berlogar Geotechnical Consultants (BGC); the mass grading occurred between the summer of 2005 and the summer of 2006. Additional grading will be performed, including grading for the proposed commercial area, in order to achieve planned grades.

## **2.0 Surface Description**

The site is bounded by West Leland Road on the south, Highway 4 on the north, a residential development and eastern facing slope on the west, and vacant land including a westerly facing slope on the east. The site has been previously mass graded relatively level except for ascending slopes on the east and west sides of the site, and descending slopes (along with a large detention basin) on the north side of the site. Concrete lined surface water collection ditches are located along the toe

of the slopes as well as on the detention basin slopes. The site is covered with a thick growth of grasses and weeds.

### 3.0 Previous Mass Grading and Subsurface Conditions

According to BGC, mass grading occurred at the site between the summer of 2005 and the summer of 2006 under the continuous guidance of BGC. BGC states that the site was essentially graded flat, with cut and fill slopes located along the northern, western, and eastern sides of the site; unsuitable underlying materials, such as loose native soils and undocumented fills, were removed prior to placing compacted, engineered fill. BGC summarized the results of the mass grading work in their August 14, 2008 report<sup>1</sup>.

BGC describes in their February 2008 report<sup>2</sup> that remedial grading was performed in areas underlain by existing fill and included removal of soft sediments along the centerline of drainage courses, removal of expansive soils along cut/fill transitions, and excavation of keyways for buttress fill slopes for the detention basin. BGC further states that (1) the ground surface below the engineered fill at the site was properly prepared with engineering control including scarification and moisture conditioning, (2) subdrains were installed along the back edge of keyways and excavation backcuts as well as along the centerline of previous drainages, and (3) subdrains were generally stopped at a depth of at least 10 feet below the existing sheet grade.

As a result of the previous mass grading, BGC in their February 2008 provides the following information:

**Engineered Fill:** Engineered fill has been extensively placed at the site. The engineered fill was largely derived from cuts performed in the Tulare bedrock formation and consists of layers of silty to sandy clays with variable amounts of gravel. The fill was placed under the observation of BGC with engineering control and testing. The engineered fill is suitable for proposed construction. Laboratory testing of bulk samples indicate that fill has Plasticity Indices between 18 and 23 and the fill is considered moderately expansive.

**Alluvium:** Alluvium underlies the engineered fill in two locations, a former north trending drainage course in the central portion of the site (underlying the detention basin) and a northeast trending band along the former drainage course. The soft sediments along the centerline of these areas were removed down to competent materials during the remedial grading of the site.

---

<sup>1</sup> BGC, 2008, report titled *Soil Engineering Services During Mass Grading, Vista Del Mar – Subdivision, Pittsburg, California*, dated August 14, 2008.

<sup>2</sup> BGC, 2008, report titled *Preliminary Geotechnical Investigation, Alves Ranch, West Leland Road, Pittsburg, California*, dated February 25, 2008.

**Bedrock:** Bedrock units at the site are composed of non-marine sedimentary deposits of the Pliocene age Tulare formation. The Tulare formation at the site consists of friable to weak beds of sandy to silty claystone, sandy siltstone, sandstone, and conglomerate. After the mass grading was completed, the bedrock is exposed at the surface of the site in a few areas. Bedrock structure at the site was mapped during the previous grading and was found generally dipping between 5 and 25 degrees to the north and northeast (*we noted that on Plate 3 of the February 2008 BGC report in the northeast portion of the site, BGC shows bedrock bedding dipping 9 to 14 degrees south and southwest*). Claystone beds within the Tulare formation are considered highly expansive.

**Groundwater:** Groundwater at the site has been partially controlled by the addition of a subdrain system constructed below the engineered fill. Groundwater was not encountered during the remedial over-excavations performed during the previous mass grading in 2005-2006 with the exception of minor areas of seepage near the existing detention basin; subdrains were installed to intercept the seepage.

**Exploratory Well:** An exploratory well was drilled at the site during the 1960's in the southeast portion of the site. During mass grading, a column of clean grout was encountered in the area of the abandoned well. The abandoned well casing was surveyed in the field during mass grading and was cut down to an elevation of 171.6 feet (about 16-1/2 feet below the sheet grade at that time).

According to BGC and as presented in their August 14, 2008 report, the fill materials placed at the site were compacted to the following specifications.

| Location                                    | Clayey Soils and Tps Bedrock Unit                                                                       | Sandy Soils and Bedrock Units Other Than Tps                                                      |
|---------------------------------------------|---------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------|
| Within 15 feet of finished grade            | Between 85 and 90 percent relative compaction at not less than 5 percent above optimum moisture content | At least 90 percent relative compaction at not less than 3 percent above optimum moisture content |
| Between 15 and 30 feet below finished grade | At least 90 percent relative compaction at not less than 5 percent above optimum moisture content       | At least 90 percent relative compaction at not less than 3 percent above optimum moisture content |
| Greater than 30 feet below finished grade   | At least 95 percent relative compaction at not less than 3 percent above optimum moisture content       |                                                                                                   |

BGC also performed geotechnical observations and testing during the construction of the north embankment of the existing detention basin. According to BGC, the areas to be graded were cleared of old fill materials, the subgrade was scarified and re-compacted, and new fill was placed and compacted to an average relative compaction of at least 95 percent with no compaction tests

less than 93 percent. The results of BGC's observation and testing work for the detention basin's north slope are summarized in their 2007 report<sup>3</sup>.

#### 4.0 Geology, Faulting, and Seismicity

Graymer, et al<sup>4</sup>, has mapped the bedrock underlying the site as being part of the Tulare Formation, poorly consolidated non-marine sedimentary rock of Pliocene age, consisting of gray to maroon siltstone, sandstone, and conglomerate, and contains tuff layers.

The project site is located in the San Francisco Bay Area that is considered one of the most seismically active regions in the United States. Significant earthquakes have occurred in the San Francisco Bay Area and are believed to be associated with crustal movements along a system of sub-parallel fault zones that generally trend in a northwesterly direction. The site is not located within an Alquist-Priolo Earthquake Fault Zone as designated by the State of California<sup>5</sup>.

Earthquake intensities will vary throughout the San Francisco Bay Area, depending upon numerous factors including the magnitude of earthquake, the distance of the site from the causative fault, and the type of materials underlying the site. The U.S. Geological Survey (2016)<sup>6</sup> indicated that there is a 72 percent chance of at least one magnitude 6.7 or greater earthquake striking the San Francisco Bay region between 2014 and 2043. Therefore, the site will probably be subjected to at least one moderate to severe earthquake that will cause strong ground shaking.

According to the U.S. Geological Survey's Unified Hazard Tool and applying the Dynamic: Conterminous U.S. 2008 (v3.3.1) model (accessed 6/1/2018), the resulting deaggregation calculations indicate that the site has a 10% probability of exceeding a peak ground acceleration of about 0.47g in 50 years (design basis ground motion based on very dense soil – soft rock site condition; mean return time of 475 years). The actual ground surface acceleration might vary depending upon the local seismic characteristics of the underlying bedrock and the overlying unconsolidated soils.

#### 5.0 Liquefaction

Soil liquefaction is a phenomenon primarily associated with saturated, cohesionless, soil layers located close to the ground surface. These soils lose strength during cyclic loading, such as

---

<sup>6</sup> Aagaard, Blair, Boatwright, Garcia, Harris, Michael, Schwartz, and DiLeo, *Earthquake Outlook for the San Francisco Bay Region 2014–2043*, USGS Fact Sheet 2016–3020, Revised August 2016 (ver. 1.1).

imposed by earthquakes. During the loss of strength, the soil acquires mobility sufficient to permit both horizontal and vertical movements. Soils that are most susceptible to liquefaction are clean, loose, uniformly graded, saturated, fine-grained sands that lie close to the ground surface. According to ABAG and the U.S. Geological Survey, the site is located in an area that has been characterized as having very low liquefaction susceptibility<sup>7,8</sup>. As of the date of this report, the liquefaction potential of the site has not been evaluated by the State of California<sup>9</sup>.

Based on our review of available literature and the results of exploratory borings at the site, it is our opinion that the potential for ground surface damage caused by liquefaction at the site is low.

## **6.0 Landsliding**

According to U.S. Geological Survey Open-File Report 97-745 (landslide folio of the San Francisco Bay Area), the development site area is not mapped as having previously identified landslides or earthflows nor is it located within an area having debris flow source potential. According to the Association of Bay Area Governments Resilience Program website (accessed 6/1/2018), portions of the site have been mapped as having “few” landslides prior to the mass grading that was performed in 2005-2006.

Since the previous mass grading performed at the site removed weak soils and old fills, and grades were raised to create a relatively level site, it is our opinion that the potential for landslides developing at the site are low.

Sincerely,

## PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Mr. Roylance:

ENGEO is pleased to present our phase I environmental site assessment of the subject property (Property), located in Pittsburg, California. The attached report includes a description of the site assessment activities, along with ENGEO's findings, opinions, and conclusions regarding the Property.

ENGEO has the specific qualifications based on education, training, and experience to assess the nature, history, and setting of the Property, and has developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312 and the American Standard Testing Method (ASTM) Practice E1527-13. We declare that, to the best of our professional knowledge and belief, the responsible charge for this study meets the definition of Environmental Professional as defined in Section 312.10 of 40 CFR Part 312 and ASTM E1527-13.

We are pleased to be of service to you on this project. If you have any questions concerning the contents of our report, please contact us.

Sincerely,

ENGEO Incorporated

Stephen Fallon, PE

Jeffrey Adams, PhD, PE

## EXECUTIVE SUMMARY

ENGEO conducted a phase I environmental site assessment for the property located at Alves Ranch Road and West Leland Road in Pittsburg, California (Property). The Property is approximately 47.42 acres in area and is identified by Assessor's Parcel Number (APN) 097-700-002-5.

The Property is currently a vacant "sheet-graded" pad located south of the California Delta Highway (State Highway 4). Review of historical records indicates that the Property has remained undeveloped land since at least 1937. One aerial photograph showed that a single residential structure was located on the Property from 2006 to no later than 2008. An unpaved road bisecting the Property north to south is visible in aerial photographs dating back to 1937.

The study included a review of local, state and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps and physical setting sources; a reconnaissance of the Property to review site use and current conditions to check for the storage, use, production or disposal of hazardous or potentially hazardous materials; and interview with persons knowledgeable about current and past site use.

The site reconnaissance and records review did not find documentation or physical evidence of soil or groundwater impairments associated with the use of the Property. A review of regulatory databases maintained by county, state, and federal agencies found no documentation of hazardous materials violations or discharge on the Property. A review of regulatory agency records and available databases did not identify contaminated facilities within the appropriate ASTM search distances that would be expected to impact the Property.

Based on the findings of this assessment, no Recognized Environmental Conditions (RECs) and no historical RECs were identified for the Property.

Based on the review of regulatory databases and site reconnaissance, we have identified a controlled REC (CREC):

- Petroleum hydrocarbon impacted soils were removed from an area south of the Property and encapsulated below the road section at the intersection of West Leland Road and Alves Ranch Road. Although encapsulated adjacent to the Property, given the depth of encapsulation (greater than 30 feet below ground surface), the presence of this material is not considered to pose an environmental concern for residential development of the Property.

ENGEO has performed a phase I environmental site assessment in general conformance with the scope and limitations of ASTM E1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312). This assessment has revealed no evidence of Recognized Environmental Conditions in connection with the Property.

ENGEO recommends no further environmental studies at this time.

## 1.0 INTRODUCTION

### 1.1 SITE LOCATION AND DESCRIPTION

ENGEO conducted a phase I environmental site assessment for the Property located at Alves Ranch Road in Pittsburg, California (Figure 1). The approximately 47.42-acre Property is identified as APN 097-700-002-5 (Figure 3) and is currently occupied by undeveloped land.

### 1.2 CURRENT USE OF PROPERTY AND ADJOINING PROPERTIES

The Property is currently a vacant “sheet-graded” pad located south of the California Delta Highway (State Highway 4). The Property has a mounded slope extending north to south near the intersection of Woodhill Drive and West Leland Road.

The surrounding sites include mainly residential developments. The Pittsburg/Bay Point BART station is located to the east of the Property.

### 1.3 SITE AND VICINITY CHARACTERISTICS

According to published topographic maps, the Property ranges in elevation from approximately 150 feet above mean sea level (msl) to approximately 223 feet above msl. Review of the Vine Hill & Honker Bay quadrangles Geologic Map found that the Property is underlain by alluvial pebble gravel, sand, and clay of valley areas and pebble conglomerate, sandstone, and claystone (Dibblee et al., 2006).

Geoscheck – Physical Setting Source Summary of the Environmental Resources Data report (Appendix A) indicated no Federal United States Geological Survey (USGS) wells located within 1 mile of the Property. Groundwater in the vicinity of Property was historically observed between 27.7 feet and 72.9 feet below the ground surface, however, the topography of the region is highly variable. The Physical Setting Source Summary did not provide hydrogeologic information for use as an indicator of groundwater flow direction in the immediate area. However, information gathered from nearby sites to the north indicates the groundwater flow direction was observed to the northeast to northwest and the depth to groundwater is approximately 4 feet.

We reviewed the Department of Water Resources On-line Water Data Library for depth to water in the vicinity of the Property. The website did not identify any wells within 1 mile of the Property.

We reviewed EnviroStor, a website maintained by the State of California Department of Toxic Substances Control, and GeoTracker, a website maintained by the State of California Water Resources Control Board, for nearby facilities with records that include depth to groundwater measurements. The following information was obtained regarding local groundwater conditions.

**TABLE 1.3-1: Local Groundwater Conditions**

| PROXIMITY TO PROPERTY | REPORTED DEPTH TO GROUNDWATER | REPORTED GROUNDWATER FLOW DIRECTION |
|-----------------------|-------------------------------|-------------------------------------|
| 2,800 ft              | 20.88 (max)                   | E                                   |
| 2,900                 | 73.45 (max)                   | N                                   |
| 4,100                 | 59.14 (max)                   | NW                                  |

The site-specific depth to groundwater and direction of groundwater flow was not determined as part of this assessment. Fluctuations in groundwater levels may occur seasonally and over a period of years due to variations in precipitation, temperature, irrigation and other factors. Resources identified during the investigation showed that the groundwater gradient flows to the north toward Suisun Bay.

We reviewed the Department of Conservation, Division of Oil, Gas, and Geothermal Resources (DOGGR) website and map database to determine if any historic oil and/or gas wells were located within the Property. One well was mapped within the Property. The onsite well (API#01300200) is listed as a dry hole, plugged well (plugged 9/12/1964), previously operated by Trico Industries, Inc. Three other wells were mapped within 1 mile of the Property. Two of them are listed as plugged and the other one is listed as a dry hole, plugged well.

#### **1.4 PURPOSE OF PHASE I ENVIRONMENTAL SITE ASSESSMENT**

This assessment was performed at the request of William Lyon Homes, Inc. for the purpose of environmental due diligence during property acquisition. The objective of this phase I environmental site assessment is to identify Recognized Environmental Conditions (RECs) associated with the Property. As defined in the ASTM Standard Practice E1527-13, an REC is “the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.”

#### **1.5 DETAILED SCOPE OF SERVICES**

The scope of services performed included the following:

- A review of previous environmental reports.
- A review of publicly available and practically reviewable standard local, state, tribal, and federal environmental record sources.
- A review of publicly available and practically reviewable standard historical sources, aerial photographs, fire insurance maps and physical setting sources.
- A reconnaissance of the Property to review site use and current conditions. The reconnaissance was conducted to check for the storage, use, production or disposal of hazardous or potentially hazardous materials.
- Interviews with owners/occupants and public sector officials.
- Preparation of this report with our findings, opinions, and conclusions.

#### **1.6 SIGNIFICANT ASSUMPTIONS OR DEVIATIONS FROM ASTM STANDARD PRACTICE**

No significant assumptions or deviations were identified during this assessment.

## **1.7 LIMITATIONS AND EXCEPTIONS OF ASSESSMENT**

The professional staff at ENGEO strives to perform its services in a proper and professional manner with reasonable care and competence but is not infallible. The recommendations and conclusions presented in this report were based on the findings of our study, which were developed solely from the contracted services. The findings of the report are based in part on contracted database research, out-of-house reports and personal communications. The opinions formed by ENGEO are based on the assumed accuracy of the relied upon data in conjunction with our relevant professional experience related to such data interpretation. ENGEO assumes no liability for the validity of the materials relied upon in the preparation of this report.

This document must not be subject to unauthorized reuse; that is, reuse without written authorization of ENGEO. Such authorization is essential because it requires ENGEO to evaluate the document's applicability given new circumstances, not the least of which is passage of time. The findings from a phase I environmental site assessment are valid for one year after completion of the report. Updates of portions of the assessment may be necessary after a period of 180 days after completion.

This phase I environmental site assessment is not intended to represent a complete soil or groundwater characterization, nor define the depth or extent of soil or groundwater contamination. It is intended to provide an evaluation of potential environmental concerns associated with the use of the Property. A more extensive assessment that would include a subsurface exploration with laboratory testing of soil and groundwater samples could provide more definitive information concerning site-specific conditions. If additional assessment activities are considered for the Property and if other entities are retained to provide such services, ENGEO cannot be held responsible for any and all claims arising from or resulting from the performance of such services by other persons or entities. ENGEO can also not be held responsible from any and all claims arising or resulting from clarifications, adjustments, modifications, discrepancies or other changes necessary to reflect changed field or other conditions.

## **1.8 SPECIAL TERMS AND CONDITIONS**

ENGEO has prepared this report for the exclusive use of our client, William Lyon Homes, Inc. It is recognized and agreed that ENGEO has assumed responsibility only for undertaking the study for the client. The responsibility for disclosures or reports to a third party and for remedial or mitigative action shall be solely that of the client.

Laboratory testing of soil or groundwater samples was not within the scope of the contracted services. The assessment did not include an asbestos survey, an evaluation of lead-based paint, an inspection of light ballasts for polychlorinated biphenyls (PCBs), a radon evaluation, or a mold survey.

This report is based upon field and other conditions discovered at the time of preparation of ENGEO's assessment. Visual observations referenced in this report are intended only to represent conditions at the time of the reconnaissance. ENGEO would not be aware of site contamination, such as dumping and/or accidental spillage, that occurred subsequent to the reconnaissance conducted by ENGEO personnel.

## 2.0 RECORDS REVIEW

### 2.1 PROPERTY RECORDS

#### 2.1.1 Title Report/Ownership

The Title Report lists recorded land title detail, ownership fees, leases, land contracts, easements, liens, deficiencies, and other encumbrances attached to or recorded against a subject property. Laws and regulations pertaining to land trusts vary from state to state and the detail of information presented in a Title Report can vary greatly by jurisdiction. As a result, ENGEO utilizes a Title Report, when provided to us, as a supplement to other historical record sources.

A Preliminary Title Report for the Property, prepared by First American Title Company and dated September 28, 2017, was provided for our review. The Property title is vested in ALVES RANCH, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY. No references to environmental liens, deed restrictions or other potential environmental issues were noted. This report is included in Appendix D.

### 2.2 PREVIOUS ENVIRONMENTAL REPORTS

ENGEO, Phase I Environmental Site Assessment, Alves Property, West Leland Road, Pittsburg, California, March 9, 2001. Project #3328.1.051.01

ENGEO completed a Phase I ESA that included a portion of the Property on March 9, 2001. The ESA determined that some hazardous compounds were being stored in containers on portions of the 320-acre site. These chemicals were being stored was located south of the subject Property. Environmental sampling of these areas was recommended.

ENGEO, Phase II Environmental Site Assessment, Alves Ranch, West Leland Road, Pittsburg, California, June 13, 2003. Project #3328.1.056.01

ENGEO completed a phase II ESA in June 2003 for a site south of the Property. This investigation was initiated based off the recommendations from the phase I ESA completed in March 2001. The site was located just south of West Leland Road, with the subject Property being located north. Soils at the site were found to have petroleum contamination, and it was recommended for soil to be excavated and encapsulated in the West Leland Road right-of-way. Lead and asbestos-containing materials were identified as well during a survey.

ENGEO, Environmental Services Associated with Former Underground Storage Tanks, Vista Del Mar, Pittsburg, California, December 27, 2005. Project #3328.1.060.01

ENGEO observed excavation activities in the vicinity of former USTs, previously removed in 1994. Documentation including applications, inspections, and removal permits for the three USTs were received and reviewed by ENGEO personnel (see Section 2.5 of this report). ENGEO also completed confirmation sampling of the excavation area to ensure all impacted materials were removed.

The report states that the approximately 2,800 cubic yards of hydrocarbon-impacted soils were placed in a street section of West Leland Road extension, with approval from the Contra Costa County Department of Environmental Health. The soil cross section shows that the material was

buried at a depth of a least 33 feet below the current grade. Given the depth of encapsulation and based on a review of the June 2003 phase II ESA, soil concentrations within the excavated material would not be expected to pose a risk to human health or environmental health. Therefore, the encapsulated soils do not pose a health risk to the planned development at the subject Property.

ENGEO, Debris-Fill Assessment, Alves Ranch, Pittsburg, California, December 8, 2003. Project #3328.1.058.01

ENGEO completed a debris-fill assessment in December of 2003. The scope of work included the excavation of 18 test pits, soil screening and logging, recovery of soil samples, and laboratory analyses. Approximately 8,600 cubic yards of refuse-laden soil were identified in the center of the Property. An estimated 1,700 cubic yards of refuse were recommended to be excavated and disposed of offsite. Sampling results exhibited concentrations below regulatory threshold values. ENGEO recommended the material be excavated and encapsulated under the West Leland Road section.

ENGEO, Demolition and Excavation Observation Report, Vista Del Mar, Pittsburg, California, January 17, 2006. Project #3328.1.060.01

ENGEO performed observation and sampling services during excavation of debris-filled material at the Property. The material was identified in the Debris-Filled Assessment performed by ENGEO in December 2003 (summarized above). All material larger than 3 inches in diameter were removed from the debris-fill area. Removed fill was encapsulated under street sections at a depth of over 40 feet below ground surface. ENGEO collected samples, which resulted in no detections over environmental screening levels.

## 2.3 HISTORICAL RECORD SOURCES

The purpose of the historical record review is to develop a history of the previous uses or occupancies of the Property and surrounding area in order to identify those uses or occupancies that are likely to have led to recognized environmental conditions on the Property.

### 2.3.1 Historical Topographic Maps

Historical USGS topographic maps were reviewed to determine if discernible changes in topography or improvements pertaining to the Property had been recorded. The following maps were provided to us through an EDR Historical Topographic Map Report, presented in Appendix C.

**TABLE 2.3.1-1: Historical Topographic Maps**

| QUAD               | YEAR                               | DESCRIPTION                                                                                                                                                                                                                  |

### 2.3.2 Aerial Photographs

The following aerial photographs, provided by EDR, were reviewed for information regarding past conditions and land use at the Property and in the immediate vicinity. These photographs are presented in Appendix E.

**TABLE 2.3.2-1: Aerial Photographs**

| YEAR                               | DESCRIPTION                                                                                                                                                                                                                                                                                                                                                                                                                                |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 2012/ 2010/<br>2009                | <u>Property:</u> The Property no longer has material storage, and the swale/berm area appears to be completely developed.<br><u>Adjoining:</u> The majority of the areas directly south of the Property have developed, with residential developments.                                                                                                                                                                                     |
| 2006                               | <u>Property:</u> The Property appears to have been graded, and various materials appear to have been stored on the Property. One structure appears to have been built near the center of the southern property boundary.<br><u>Adjoining:</u> The area directly south of the Property has been graded, with some paved roads being built. A large swale/berm appears to be constructed in the northern area at the center of the Property. |
| 2005                               | <u>Property:</u> No changes were noted from the 1937 photograph.<br><u>Adjoining:</u> The areas to the southeast of the Property have developed with residential developments.                                                                                                                                                                                                                                                             |
| 1998/ 1993                         | <u>Property:</u> No changes were noted from the 1937 photograph.<br><u>Adjoining:</u> The areas to the southwest of the Property have developed with residential developments.                                                                                                                                                                                                                                                             |
| 1984/ 1979/<br>1966/ 1963/<br>1958 | <u>Property:</u> No changes were noted from the 1937 photograph.<br><u>Adjoining:</u> The areas north of the Property have been developed with residential neighborhoods. The California Delta Highway was constructed along the northern border of the Property.                                                                                                                                                                          |
| 1939/ 1937                         | <u>Property:</u> The Property is undeveloped, except for one road that bisects it north to south.<br><u>Adjoining:</u> The surrounding areas are mostly undeveloped with a few roads and small structures. There is a sparsely developed residential area north of the Property.                                                                                                                                                           |

### 2.3.3 Fire Insurance Maps

EDR prepared a Sanborn Fire insurance map search for the Property and surrounding properties. EDR reported that no maps were available for the Property and surrounding properties.

### 2.3.4 City Directory

City Directories, published since the 18th century for major towns and cities, lists the name of the resident or business associated with each address. As no physical address was available for the Property, no results can be cross-referenced with the directory. The listings are primarily associated with residential uses, with some various businesses. The directory shows results for Alves Ranch Road and West Leland Road. A city directory search conducted by EDR is located in Appendix F.

## 2.4 ENVIRONMENTAL RECORD SOURCES

EDR performed a search of federal, tribal, state, and local databases regarding the Property and nearby properties. Details regarding the databases searched by EDR are provided in Appendix A. A list of the facilities documented by EDR within the approximate minimum search distance of the Property is provided below.

### 2.4.1 Standard Environmental Records

#### 2.4.1.1 Subject Property

The following database(s) include(s) facilities listed within the appropriate ASTM search distances of the Property on Standard Environmental Records source databases.

**TABLE 2.4.1.1-1**

| FACILITY                         | STREET                            | DATABASE(S) |
|----------------------------------|-----------------------------------|-------------|
| Alves Ranch 11- Acre School Site | West Leland And Alves Ranch Roads | ENVIROSTOR  |

#### 2.4.1.2 Other Properties

The following database(s) include(s) facilities listed within the appropriate ASTM search distances of the Property on Standard Environmental Records sources.

**TABLE 2.4.1.2-1**

| FACILITY                              | STREET                   | DATABASE(S)                                                              |
|---------------------------------------|--------------------------|--------------------------------------------------------------------------|
| Acme Packaging (Corp Bay Point)       | 761 Port Chicago Highway | CORRACTS, ENVIROSTOR, RCRA-TSDF, SEMS-ARCHIVE                            |
| Criterion Catalysts & Technologies Lp | 2840 Willow Pass Rd      | CORRACTS, SEMS-ARCHIVE, RCRA-SQG, RCRA-TSDF, AST, ENVIROSTOR, ENVIROSTOR |

| San Marcos Elementary School          | Highway 4/Willow Pass Road | SCH                                                                      |
| The Sun Recycling Center              | 3315 Willow Pass Rd        | SWRCY                                                                    |

Based on the distances to the identified database sites, regional topographic gradient, and the EDR findings, it is unlikely that the above-stated database sites pose an environmental risk to the Property. The majority of the properties that are on the “Orphan Summary” list appear to be located beyond the ASTM recommended radius search criteria. Orphan Summary sites were reviewed and determined to likely pose no environmental risk to the Property.

## 2.5 REGULATORY AGENCY FILES AND RECORDS

The following agencies were contacted pertaining to possible past development and/or activity at the Property.

**TABLE 2.5-1: Regulatory Agency Records**

| NAME OF AGENCY                                                                        | RECORDS REVIEWED                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| City of Pittsburg Code Enforcement                                                    | The City of Pittsburg Code Enforcement Department did not identify records for the Property.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| City of Pittsburg Fire District                                                       | The City of Pittsburg Fire District referred us to the Contra Costa County Fire Department.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| City of Pittsburg Engineering                                                         | The City of Pittsburg Engineering Department did not have internal records but did refer us to the DTSC online resources.                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| Contra Costa County Department of Conservation & Development                          | The Contra Costa County Department of Conservation & Development did not identify records for the Property.                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Contra Costa County Health Services Department                                        | ENGEO reviewed two permit applications for well destruction of a well at a site near the subject Property. No files were available for the Property.                                                                                                                                                                                                                                                                                                                                                                                                                             |
| Contra Costa County Health Services – Hazardous Materials Program (Env. Health Dept.) | The Department of Environmental Health forwarded our records request to the Hazardous Materials Program. They provided applications, inspections, and removal permits for the three former USTs that were removed in 1994. The tank volumes were 2,000 (regular), 3,000 (unleaded), and 10,000 (diesel) gallons, respectively. Unauthorized release reports and tank closure reports were also received and reviewed. A site closure letter was also received for the Property, dated July 21, 1997. It stated that the CCCHSD will not require any additional work at the site. |
| Contra Costa County Fire Protection District                                          | We did not receive a response form the Contra Costa County Fire Protection District by the time of the completion of this report.                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Contra Costa County Assessor's Office                                                 | The Contra Costa County Assessor's Office website was accessed and the APN (097-700-002-5) was confirmed for the Property.                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| California State Water Resources Control Board                                        | GeoTracker, the State Water Resources Control Board website, was accessed and files related to environmental histories were reviewed. All of the cases reviewed within one mile of the Property were determined to likely not pose an environmental risk to the planned development.                                                                                                                                                                                                                                                                                             |
| Department of Toxic Substances Control                                                | EnviroStor, the DTSC website, was accessed and files related to environmental histories were reviewed. All of the cases reviewed within one mile of the Property were determined to likely not pose an environmental risk to the planned development.                                                                                                                                                                                                                                                                                                                            |

## 3.0 SITE RECONNAISSANCE

### 3.1 METHODOLOGY

ENGEO conducted a reconnaissance of the Property on November 20, 2017. The reconnaissance was performed by Stephen Fallon, a Project Engineer of ENGEO. The Property was viewed for hazardous materials storage, superficial staining or discoloration, debris, stressed vegetation, or other conditions that may be indicative of potential sources of soil or groundwater contamination. The Property was also checked for evidence of fill/ventilation pipes, ground subsidence, or other evidence of existing or preexisting underground storage tanks. Photographs taken during the site reconnaissance are presented in Figures 4A through 4C.

### 3.2 GENERAL SITE SETTING

The Property is an undeveloped lot with a large drainage swale area near the northern central portion of the Property. We observed fences and drainage canals along the Property boundary. One paved asphalt area was observed near the main entrance gate.

### 3.3 EXTERIOR OBSERVATIONS

The following table summarizes our observations during the reconnaissance:

**TABLE 3.3-1: Exterior Site Observations**

| FEATURE TYPE                                           | OBSERVATIONS                                                                                                                     |
|--------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------|
| Structures                                             | We did not observe structures at the time of our reconnaissance.                                                                 |
| Hazardous Substances and Petroleum Products/Containers | No hazardous substances were identified during our reconnaissance.                                                               |
| Storage Tanks (underground and above-ground)           | No USTs or ASTs were identified during our reconnaissance.                                                                       |
| Odors                                                  | No odors were identified during our reconnaissance.                                                                              |
| Pools of Potentially Hazardous Liquid                  | No pools of any liquid were identified during our reconnaissance.                                                                |
| Drums                                                  | No drums were identified during our reconnaissance.                                                                              |
| Polychlorinated Biphenyls (PCBs)                       | No PCB containing appurtenances, such as transformers, were identified during our reconnaissance.                                |
| Pits, Ponds, and Lagoons                               | A large drainage swale exists to the north of the Property, which is fed stormwater via drainage canals.                         |
| Stained Soil/Pavement                                  | No staining was identified during our reconnaissance.                                                                            |
| Stressed Vegetation                                    | No stressed vegetation was identified during our reconnaissance.                                                                 |
| Solid Waste/Debris                                     | Various inert trash was observed, but no large-scale debris was observed during our reconnaissance.                              |
| Stockpiles/Fill Material                               | No stockpiles or fill material were identified during our reconnaissance.                                                        |
| Wastewater                                             | Other than the drainage swales described above, no wastewater conveyance systems were identified during our site reconnaissance. |
| Wells                                                  | No evidence of wells was identified during our reconnaissance.                                                                   |
| Septic Systems                                         | No evidence of septic systems was identified during our reconnaissance.                                                          |

### 3.4 ASBESTOS-CONTAINING MATERIALS AND LEAD-BASED PAINT

An asbestos and lead-based paint survey was not conducted as part of this assessment. No structures are currently located on the Property.

### 3.5 INDOOR AIR QUALITY

An evaluation of indoor air quality, mold, or radon was not included as part of the contracted scope of services. The California Department of Health Services has conducted studies of radon risks throughout the state, sorted by zip code. Results of the studies indicate that 34 tests were conducted within the Property zip code, with 2 tests exceeding the current EPA action level of 4 picocuries per liter {pCi/L}<sup>1</sup>).

In accordance with ASTM E2600-10 (Tier 1) (*Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions*); There are no potential petroleum hydrocarbon sources for vapor intrusion within 1/10 mile of the Property or volatile organic compound (VOCs) sources within 1/3 mile of the Property.

As mentioned in Section 2.2, soil impacted with petroleum hydrocarbons was encapsulated under the road at the intersection of West Leland Road and Alves Ranch Road. The material was buried at an approximate depth of greater than 30 feet below the road with approval of Contra Costa Department of Environmental Health. Given the reported petroleum hydrocarbon concentrations and the vertical/lateral distance from the encapsulation area to the study area, this is not considered to pose an environmental concern or a vapor intrusion concern.

### 4.0 INTERVIEWS

Completed Key Site Manager and client environmental site assessment questionnaires pertaining to applicable past and present uses and physical characteristics of the Property and surrounding properties were not received at the time of the completion of this report.

### 5.0 EVALUATION

#### 5.1 OPINIONS AND DATA GAPS

The following data gaps were identified during the environmental investigation:

- ENGEO did not receive the Key Site Manager or client ESA questionnaire at the time of the completion of this report.
- The Contra Costa County Fire Protection District did not respond as of the completion of this report.

It is our opinion that the findings of this study are based on a sufficient level of information obtained during our contracted scope of services to render a conclusion as to whether additional

appropriate investigation is required to identify the presence or likely presence of a REC. The data gaps identified during this process do not affect the conclusions as to the presence or lack of presence of RECs at the Property.

## 5.2 FINDINGS AND CONCLUSIONS

The study included a review of local, state and federal environmental record sources, standard historical sources, aerial photographs, fire insurance maps and physical setting sources; a reconnaissance of the Property to review site use and current conditions to check for the storage, use, production or disposal of hazardous or potentially hazardous materials; and interview with persons knowledgeable about current and past site use.

The site reconnaissance and records review did not find documentation or physical evidence of soil or groundwater impairments associated with the use of the Property. A review of regulatory databases maintained by county, state, and federal agencies found no documentation of hazardous materials violations or discharge on the Property. A review of regulatory agency records and available databases did not identify contaminated facilities within the appropriate ASTM search distances that would be expected to impact the Property.

Based on the findings of this assessment, no Recognized Environmental Conditions (RECs) and no historical RECs were identified for the Property.

Based on the review of regulatory databases and site reconnaissance, we have identified a controlled REC (CREC):

- Petroleum hydrocarbon impacted soils were removed from an area south of the Property and encapsulated below the road section at the intersection of West Leland Road and Alves Ranch Road. Although encapsulated adjacent to the Property, given the depth of encapsulation (greater than 30 feet below ground surface), the presence of this material is not considered to pose an environmental concern for residential development of the Property.

ENGEO has performed a phase I environmental site assessment in general conformance with the scope and limitations of ASTM E1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312). This assessment has revealed no evidence of RECs in connection with the Property.

ENGEO recommends no further environmental studies at this time.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

## EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 09/13/2017 has revealed that there are 2 CORRACTS sites within approximately 1 mile of the target property.

#### ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/31/2017 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the SLIC list, as provided by EDR, has revealed that there is 1 SLIC site within approximately 0.5 miles of the target property.

Potential Contaminants of Concern: Not reported

Site History: The 28-acre site was originally part of a larger 85-acre industrial facility that was owned and operated by Shell Chemical Company. From 1930 to 1967, the 85-acre facility was a commercial ammonia fertilizer manufacturing plant, and since 1945, it has manufactured metal catalysts. Several manufacturing and storage facilities have existed on this site, such as aboveground storage tanks, a benzol plant and a compressor plant. In 1988, Limited Partners Catalyst Holding Company (LPCH) assumed ownership of the catalyst manufacturing facility; the facility continues to manufacture several types of catalysts. Currently, administration buildings, a laboratory, catalyst manufacturing, storage and shipping facilities, a PG&E substation as well as a change room and training center are located on the 28-acre site.

**Biennial Reports:**

Last Biennial Reporting Year: 2017

**Annual Waste Handled:**

Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Comments: This report was uploaded in May of 2015. In 1998, soil samples were taken from sediments at the inlet and outlet of the pipeline and from the surface soil down stream of SW-1 (Figure 1). Lead concentrations were 960 mg/kg at the inlet, 3,300 mg/kg at the outlet and 3,900 mg/kg in surface soil down stream of SW-1. Additional samples were collected in the discharge path from SW-1 with highest lead concentration of 4,300 mg/kg. Other selected areas suspected to have elevated concentrations of lead. The highest lead concentrations were within 0 -3 from the surface. The highest lead concentration was 3,800 mg/kg. The CCCHD Inspection Report of 2/8/2000 reported an ongoing remedial activity associated with past lead pot and exhaust stack having been removed September 1998. No remediation report was found in county records.

**FINDS:**

Registry ID: 110000483389

**Environmental Interest/Information System**

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

**HAZARDOUS AIR POLLUTANT MAJOR**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.  
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.  
Facility ID: San Francisco Bay 071019110  
Facility Type: Industrial - Facility that treats and/or disposes of liquid or semisolid wastes from any servicing, producing, manufacturing or

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal NPL site list***

##### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

##### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

##### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### ***Federal Delisted NPL site list***

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

### ***Federal CERCLIS NFRAP site list***

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

|                                         |                                         |

### ***Federal RCRA generators list***

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

|                                         |                                         |

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

|                                         |                                         |
|-----------------------------------------|-----------------------------------------|
| Date of Government Version: 09/13/2017  | Source: Environmental Protection Agency |

### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

|                                         |                                         |

Next Scheduled EDR Contact: 02/12/2018

Data Release Frequency: Quarterly

## ***State- and tribal - equivalent CERCLIS***

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Date of Government Version: 07/31/2017

Date Data Arrived at EDR: 08/01/2017

Date Made Active in Reports: 08/15/2017

Last EDR Contact: 09/21/2017  
Next Scheduled EDR Contact: 01/08/2018  
Data Release Frequency: Varies

## **ADDITIONAL ENVIRONMENTAL RECORDS**

### ***Local Brownfield lists***

#### **US BROWNFIELDS: A Listing of Brownfields Sites**

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 06/19/2017  
Date Data Arrived at EDR: 06/20/2017

Data Release Frequency: No Update Planned

### SCH: School Property Evaluation Program

This category contains proposed and existing school sites that are being evaluated by DTSC for possible hazardous materials contamination. In some cases, these properties may be listed in the CalSites category depending on the level of threat to public health and safety or the environment they pose.

Date of Government Version: 07/31/2017  
Date Data Arrived at EDR: 08/01/2017  
Date Made Active in Reports: 08/15/2017  
Number of Days to Update: 14

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 10/31/2017  
Next Scheduled EDR Contact: 02/12/2018  
Data Release Frequency: Quarterly

### CDL: Clandestine Drug Labs

A listing of drug lab locations. Listing of a location in this database does not indicate that any illegal drug lab materials were or were not present there, and does not constitute a determination that the location either requires or does not require additional cleanup work.

Date of Government Version: 06/30/2017  
Date Data Arrived at EDR: 08/18/2017  
Date Made Active in Reports: 09/21/2017  
Number of Days to Update: 34

Source: Department of Toxic Substances Control  
Telephone: 916-255-6504  
Last EDR Contact: 10/10/2017  
Next Scheduled EDR Contact: 01/22/2018  
Data Release Frequency: Varies

### TOXIC PITS: Toxic Pits Cleanup Act Sites

Toxic PITS Cleanup Act Sites. TOXIC PITS identifies sites suspected of containing hazardous substances where cleanup has not yet been completed.

Date of Government Version: 07/01/1995  
Date Data Arrived at EDR: 08/30/1995  
Date Made Active in Reports: 09/26/1995  
Number of Days to Update: 27

Source: State Water Resources Control Board  
Telephone: 916-227-4364  
Last EDR Contact: 01/26/2009  
Next Scheduled EDR Contact: 04/27/2009  
Data Release Frequency: No Update Planned

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/13/2017  
Date Data Arrived at EDR: 09/06/2017  
Date Made Active in Reports: 10/06/2017  
Number of Days to Update: 30

Source: Drug Enforcement Administration  
Telephone: 202-307-1000  
Last EDR Contact: 08/30/2017  
Next Scheduled EDR Contact: 12/11/2017  
Data Release Frequency: Quarterly

### **Local Lists of Registered Storage Tanks**

#### SWEEPS UST: SWEEPS UST Listing

Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 06/01/1994  
Date Data Arrived at EDR: 07/07/2005

Data Release Frequency: No Update Planned

### Local Land Records

#### LIENS: Environmental Liens Listing

A listing of property locations with environmental liens for California where DTSC is a lien holder.

Date of Government Version: 06/02/2017  
Date Data Arrived at EDR: 06/06/2017  
Date Made Active in Reports: 08/22/2017  
Number of Days to Update: 77

Source: Department of Toxic Substances Control  
Telephone: 916-323-3400  
Last EDR Contact: 08/31/2017  
Next Scheduled EDR Contact: 12/18/2017  
Data Release Frequency: Varies

#### LIENS 2: CERCLA Lien Information

A Federal CERCLA ('Superfund') lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. These monies are spent to investigate and address releases and threatened releases of contamination. CERCLIS provides information as to the identity of these sites and properties.

Date of Government Version: 07/11/2017  
Date Data Arrived at EDR: 07/26/2017  
Date Made Active in Reports: 10/13/2017  
Number of Days to Update: 79

Source: Environmental Protection Agency

Last EDR Contact: 11/03/2017  
Next Scheduled EDR Contact: 02/05/2018  
Data Release Frequency: Semi-Annually

#### DEED: Deed Restriction Listing

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Date of Government Version: 06/06/2012

### Other Ascertainable Records

#### RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

#### SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Data Release Frequency: Quarterly

### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013

Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 04/22/2013

Last EDR Contact: 11/03/2017  
Next Scheduled EDR Contact: 12/18/2017  
Data Release Frequency: Annually

### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Next Scheduled EDR Contact: 02/05/2018  
Data Release Frequency: Varies

### RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

|                                         |                                           |

Telephone: 202-586-3559  
Last EDR Contact: 11/02/2017  
Next Scheduled EDR Contact: 02/19/2018  
Data Release Frequency: Varies

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Date of Government Version: 06/23/2017  
Date Data Arrived at EDR: 10/11/2017

Last EDR Contact: 12/02/2009  
Next Scheduled EDR Contact: N/A  
Data Release Frequency: No Update Planned

### US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

Date of Government Version: 10/12/2016  
Date Data Arrived at EDR: 10/26/2016  
Date Made Active in Reports: 02/03/2017

Data Release Frequency: Varies

### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

Date of Government Version: 09/25/2017  
Date Data Arrived at EDR: 09/26/2017  
Date Made Active in Reports: 10/20/2017

### HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Data Release Frequency: Varies

### WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

Date of Government Version: 04/15/2015

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A

#### EDR Hist Auto: EDR Exclusive Historic Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Date of Government Version: N/A

#### EDR Hist Cleaner: EDR Exclusive Historic Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

#### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013  
Date Data Arrived at EDR: 08/19/2013  
Date Made Active in Reports: 10/03/2013  
Number of Days to Update: 45

Source: Department of Energy & Environmental Protection  
Telephone: 860-424-3375  
Last EDR Contact: 08/18/2017  
Next Scheduled EDR Contact: 11/27/2017  
Data Release Frequency: No Update Planned

#### NJ MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2016  
Date Data Arrived at EDR: 04/11/2017  
Date Made Active in Reports: 07/27/2017  
Number of Days to Update: 107

Source: Department of Environmental Protection  
Telephone: N/A

**Sensitive Receptors:** There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

### Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

### TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NNE

### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### FEMA FLOOD ZONE

| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
|---------------------------------------------|-------------------------|
| 06013C0114G                                 | FEMA FIRM Flood data    |
| <u>Additional Panels in search area:</u>    | <u>FEMA Source Type</u> |
| 06013C0112G                                 | FEMA FIRM Flood data    |
| 06013C0113G                                 | FEMA FIRM Flood data    |

### NATIONAL WETLAND INVENTORY

| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u>            |
|------------------------------------|------------------------------------------------|
| HONKER BAY                         | YES - refer to the Overview Map and Detail Map |

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### ***Site-Specific Hydrogeological Data\*:***

|                |            |
|----------------|------------|
| Search Radius: | 1.25 miles |
| Status:        | Not found  |

### AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-------------------------|-------------------------------------------|
| Not Reported  |                         |                                           |

## **GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY**

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

#### Soil Map ID: 1

Soil Component Name: DIABLO

Soil Surface Texture: clay

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

| Soil Layer Information |           |           |                    |                                                                        |                                                                             |                                              |                      |

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

### WELL SEARCH DISTANCE INFORMATION

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

#### California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

## OTHER STATE DATABASE INFORMATION

#### California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

### RADON

#### State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRRA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### **PRELIMINARY REPORT**

In response to the above referenced application for a policy of title insurance, this company hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a Policy or Policies of Title Insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an Exception below or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations of said Policy forms.

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Exhibit A attached. *The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties.* Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Exhibit A. Copies of the policy forms should be read. They are available from the office which issued this report.

**Please read the exceptions shown or referred to below and the exceptions and exclusions set forth in Exhibit A of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.**

**It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects, and encumbrances affecting title to the land.**

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

Dated as of September 28, 2017 at 7:30 A.M.

The form of Policy of title insurance contemplated by this report is:

ALTA Extended Loan Policy - 2006

ALTA Extended Owner Policy - 2006

A specific request should be made if another form or additional coverage is desired.

Title to said estate or interest at the date hereof is vested in:

ALVES RANCH, LLC, A CALIFORNIA LIMITED LIABILITY COMPANY

The estate or interest in the land hereinafter described or referred to covered by this Report is:

A fee.

The Land referred to herein is described as follows:

(See attached Legal Description)

At the date hereof exceptions to coverage in addition to the printed Exceptions and Exclusions in said policy form would be as follows:

***NOTICE***

Section 12413.1 of the California Insurance Code, effective January 1, 1990, requires that any title insurance company, underwritten title company, or controlled escrow company handling funds in an escrow or sub-escrow capacity, wait a specified number of days after depositing funds, before recording any documents in connection with the transaction or disbursing funds. This statute allows for funds deposited by wire transfer to be disbursed the same day as deposit. In the case of cashier's checks or certified checks, funds may be disbursed the next day after deposit. In order to avoid unnecessary delays of three to seven days, or more, please use wire transfer, cashier's checks, or certified checks whenever possible.

**EXHIBIT A**  
**LIST OF PRINTED EXCEPTIONS AND EXCLUSIONS (BY POLICY TYPE)**

**CLTA STANDARD COVERAGE POLICY – 1990**  
**EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.  
(b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
  - (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
  - (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
  - (c) resulting in no loss or damage to the insured claimant;
  - (d) attaching or created subsequent to Date of Policy; or
  - (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

**EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I**

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.  
Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public, records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

**CLTA/ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13)**  
**EXCLUSIONS**

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
  - a. building;
  - b. zoning;
  - c. land use;

- d. improvements on the Land;
  - e. land division; and
  - f. environmental protection.
- This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
- 2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
  - 3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
  - 4. Risks:
    - a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
    - b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;
    - c. that result in no loss to You; or
    - d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
  - 5. Failure to pay value for Your Title.
  - 6. Lack of a right:
    - a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
    - b. in streets, alleys, or waterways that touch the Land.

This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
  - 7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
  - 8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
  - 9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

#### **LIMITATIONS ON COVERED RISKS**

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:  
For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.  
The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

|                  | <u>Your Deductible Amount</u>                                             | <u>Our Maximum Dollar Limit of Liability</u> |
|------------------|---------------------------------------------------------------------------|----------------------------------------------|
| Covered Risk 16: | 1% of Policy Amount Shown in Schedule A or \$2,500<br>(whichever is less) | \$10,000                                     |
| Covered Risk 18: | 1% of Policy Amount Shown in Schedule A or \$5,000<br>(whichever is less) | \$25,000                                     |
| Covered Risk 19: | 1% of Policy Amount Shown in Schedule A or \$5,000<br>(whichever is less) | \$25,000                                     |
| Covered Risk 21: | 1% of Policy Amount Shown in Schedule A or \$2,500<br>(whichever is less) | \$5,000                                      |

#### **2006 ALTA LOAN POLICY (06-17-06)**

##### **EXCLUSIONS FROM COVERAGE**

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

- 1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
  - (i) the occupancy, use, or enjoyment of the Land;
  - (ii) the character, dimensions, or location of any improvement erected on the Land;
  - (iii) the subdivision of land; or
  - (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
- 2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
- 3. Defects, liens, encumbrances, adverse claims, or other matters
  - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
  - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

- (c) resulting in no loss or damage to the Insured Claimant;
  - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13, or 14); or
  - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
  5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
  6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
    - (a) a fraudulent conveyance or fraudulent transfer, or
    - (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
  7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

#### EXCEPTIONS FROM COVERAGE

[Except as provided in Schedule B - Part II, [t[or T]his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

##### [PART I

[The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

##### PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:]

#### 2006 ALTA OWNER'S POLICY (06-17-06)

##### EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
  - (i) the occupancy, use, or enjoyment of the Land;
  - (ii) the character, dimensions, or location of any improvement erected on the Land;
  - (iii) the subdivision of land; or
  - (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.

- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
  - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
  - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;

- (c) resulting in no loss or damage to the Insured Claimant;
  - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 or 10); or
  - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
    - (a) a fraudulent conveyance or fraudulent transfer, or
    - (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
  5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

#### EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of: [The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.
7. [Variable exceptions such as taxes, easements, CC&R's, etc. shown here.]

#### ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY (07-26-10)

#### EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
  - (i) the occupancy, use, or enjoyment of the Land;
  - (ii) the character, dimensions, or location of any improvement erected on the Land;
  - (iii) the subdivision of land; or
  - (iv) environmental protection;

or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

(b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.

2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
  - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
  - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
  - (c) resulting in no loss or damage to the Insured Claimant;
  - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
  - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the

Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.

7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
  - (a) a fraudulent conveyance or fraudulent transfer, or
  - (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

#### **Privacy Information**

#### **We Are Committed to Safeguarding Customer Information**

In order to better serve your needs now and in the future, we may ask you to provide us with certain information. We understand that you may be concerned about what we will do with such information - particularly any personal or financial information. We agree that you have a right to know how we will utilize the personal information you provide to us. Therefore, together with our subsidiaries we have adopted this Privacy Policy to govern the use and handling of your personal information.

#### **Applicability**

This Privacy Policy governs our use of the information that you provide to us. It does not govern the manner in which we may use information we have obtained from any other source, such as information obtained from a public record or from another person or entity. First American has also adopted broader guidelines that govern our use of personal information regardless of its source. First American calls these guidelines its Fair Information Values.

#### **Types of Information**

Depending upon which of our services you are utilizing, the types of nonpublic personal information that we may collect include:

- Information we receive from you on applications, forms and in other communications to us, whether in writing, in person, by telephone or any other means;
- Information about your transactions with us, our affiliated companies, or others; and
- Information we receive from a consumer reporting agency.

#### **Use of Information**

We request information from you for our own legitimate business purposes and not for the benefit of any nonaffiliated party. Therefore, we will not release your information to nonaffiliated parties except: (1) as necessary for us to provide the product or service you have requested of us; or (2) as permitted by law. We may, however, store such information indefinitely, including the period after which any customer relationship has ceased. Such information may be used for any internal purpose, such as quality control efforts or customer analysis. We may also provide all of the types of nonpublic personal information listed above to one or more of our affiliated companies. Such affiliated companies include financial service providers, such as title insurers, property and casualty insurers, and trust and investment advisory companies, or companies involved in real estate services, such as appraisal companies, home warranty companies and escrow companies. Furthermore, we may also provide all the information we collect, as described above, to companies that perform marketing services on our behalf, on behalf of our affiliated companies or to other financial institutions with whom we or our affiliated companies have joint marketing agreements.

#### **Former Customers**

Even if you are no longer our customer, our Privacy Policy will continue to apply to you.

#### **Confidentiality and Security**

We will use our best efforts to ensure that no unauthorized parties have access to any of your information. We restrict access to nonpublic personal information about you to those individuals and entities who need to know that information to provide products or services to you. We will use our best efforts to train and oversee our employees and agents to ensure that your information will be handled responsibly and in accordance with this Privacy Policy and First American's Fair Information Values. We currently maintain physical, electronic, and procedural safeguards that comply with federal regulations to guard your nonpublic personal information.

#### **Information Obtained Through Our Web Site**

First American Financial Corporation is sensitive to privacy issues on the Internet. We believe it is important you know how we treat the information about you we receive on the Internet. In general, you can visit First American or its affiliates' Web sites on the World Wide Web without telling us who you are or revealing any information about yourself. Our Web servers collect the domain names, not the e-mail addresses, of visitors. This information is aggregated to measure the number of visits, average time spent on the site, pages viewed and similar information. First American uses this information to measure the use of our site and to develop ideas to improve the content of our site. There are times, however, when we may need information from you, such as your name and email address. When information is needed, we will use our best efforts to let you know at the time of collection how we will use the personal information. Usually, the personal information we collect is used only by us to respond to your inquiry, process an order or allow you to access specific account/profile information. If you choose to share any personal information with us, we will only use it in accordance with the policies outlined above.

#### **Business Relationships**

First American Financial Corporation's site and its affiliates' sites may contain links to other Web sites. While we try to link only to sites that share our high standards and respect for privacy, we are not responsible for the content or the privacy practices employed by other sites.

#### **Cookies**

Some of First American's Web sites may make use of "cookie" technology to measure site activity and to customize information to your personal tastes. A cookie is an element of data that a Web site can send to your browser, which may then store the cookie on your hard drive.

[FirstAm.com](http://FirstAm.com) uses stored cookies. The goal of this technology is to better serve you when visiting our site, save you time when you are here and to provide you with a more meaningful and productive Web site experience.

#### **Fair Information Values**

**Fairness** We consider consumer expectations about their privacy in all our businesses. We only offer products and services that assure a favorable balance between consumer benefits and consumer privacy.

**Public Record** We believe that an open public record creates significant value for society, enhances consumer choice and creates consumer opportunity. We actively support an open public record and emphasize its importance and contribution to our economy.

**Use** We believe we should behave responsibly when we use information about a consumer in our business. We will obey the laws governing the collection, use and dissemination of data.

**Accuracy** We will take reasonable steps to help assure the accuracy of the data we collect, use and disseminate. Where possible, we will take reasonable steps to correct inaccurate information. When, as with the public record, we cannot correct inaccurate information, we will take all reasonable steps to assist consumers in identifying the source of the erroneous data so that the consumer can secure the required corrections.

**Education** We endeavor to educate the users of our products and services, our employees and others in our industry about the importance of consumer privacy. We will instruct our employees on our fair information values and on the responsible collection and use of data. We will encourage others in our industry to collect and use information in a responsible manner.

**Security** We will maintain appropriate facilities and systems to protect against unauthorized access to and corruption of the data we maintain.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

## EXECUTIVE SUMMARY

### DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

### RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

**Principal Engineer**

**EDUCATION**

BS, Civil Engineering, University of Illinois at Chicago, 1994

MS, Civil Engineering, University of Illinois at Chicago, 1996

PhD, Civil Engineering, University of Illinois at Chicago, 1999

MBA, Concentration in Real Estate and Finance, University of Washington, 2004

**EXPERIENCE**

Years with ENGEO: 17

**REGISTRATIONS & CERTIFICATIONS**

Professional Engineer, CA, 69633  
Environmental Manager, NV, 2150  
40 Hour HAZWOPER Training, CA, 12100257636

**SPECIALIZATIONS**

- Environmental & Stormwater Permitting
- Environmental Assessments and Remediation
- Environmental Restoration
- Geologic Hazard Abatement Districts (GHADs)
- Groundwater Modeling
- MS Project

Jeff joined ENGEO in 1999 and is a Principal Engineer directing environmental assessment, characterization, and remediation projects, geotechnical field reconnaissance and explorations, and engineering design and analyses. Jeff has provided financial analyses on real estate development projects as well as project cost-benefit analyses. He also is heavily involved in our Entitlement and Permitting Support services as well as our programs for Geologic Hazard Abatement Districts.

Jeff has performed numerous Phase I and II Environmental Site Assessments and site characterizations, as well as a number of analyses and studies utilizing federal, state, and local directives. He specializes in Brownfield redevelopment projects requiring integrated solutions for the mitigation of geotechnical and environmental hazards. Jeff is experienced in developing financial models, cash flow projections and budgets for a variety of projects requiring innovative financial solutions.

**Select Project Experience**

**Foster City Civic Center—Foster City, CA**

*Group Leader, Assistant Project Manager.* Jeff provided technical oversight for phase one environmental site assessment for the Foster City Civic Center site and environmental characterization operations for the site, which was suspected of having been affected by unauthorized petroleum hydrocarbon releases within the subsurface. Following the completion of a soil gas survey, Jeff and team demonstrated that vapor intrusion mitigation systems were not necessary for proposed development, providing a significant cost savings to the project. The project consists of a multi-use urban infill development.

**Alameda Landing—Alameda, CA**

*Group Leader, Project Manager.* Jeff managed the completion of a phase one environmental site assessment for the Alameda Landing site. He also directed recent environmental characterization operations for the site, which was suspected of having been affected by naturally-occurring methane deposits within the subsurface. Working closely with innovative protocols, Jeff was able to demonstrate to regulatory oversight officials that expensive vapor intrusion mitigation systems were not necessary for proposed residential structures, potentially saving millions of dollars to the site developer. The project consists of a multi-phased single-family and multi-family residential housing development.

**1000 Howe Road—Martinez, CA**

*Project Engineer.* Jeff provided a phase-one environmental site assessment for the project. In addition, he provided a preliminary geotechnical report for this property that has been used as a trucking company's storage yard. The project is a residential development that consists of single- and multiple-story detached residential units.

**Jefferson Street Development—Oakland, CA**

*Project Manager.* Jeff served as Project Manager. He provided comprehensive environmental and geotechnical consultation services for a Brownfields redevelopment project in downtown Oakland. The project included several challenges, including limited site access due to onsite business activities, environmental impact related to previous site use, and the presence of several adjacent mid-rise structures. Jeff developed cost effective remedial value engineering solutions to mitigate the presence of geotechnically and environmentally-constraining subsurface solutions. Jeff worked with the design team to establish cost-effective retaining wall and foundation systems, designed and observed a subsurface environmental mitigation program, and assisted in the design of a structure wide vapor barrier. The project, serving as a cornerstone of the revitalization of downtown Oakland, is an excellent example of Jeff's proficiency in delivering cost effective solutions to facilitate Brownfields redevelopment. The project consists of a multi-story residential condominium structure.

**San Ramon Village Plaza—Dublin, CA**

*Project Manager.* Jeff served as Project Engineer. He contributed to an environmental peer review of previous land uses, which included a former dry cleaner. Further investigation identified impact due to former site operations. Jeff assisted in a remediation program, closely collaborating with other consultants representing differed parties of the property transaction. The site was efficiently remediated, allowing for redevelopment. The project consists of a high-density residential development within the 4.68-acre mixed-use San Ramon Village Plaza site. The project consists of a high-density residential development within the 4.68-acre mixed-use San Ramon Village Plaza site.

**Los Banos Airport—Los Banos, CA**

*Project Engineer.* Jeff provided a Phase I Environmental Site Assessment and a Conceptual Soil Remediation Work Plan as part of a multi-phase development. In addition to the Phase I Environmental Site Assessment he provided a soil and groundwater characterization program. The Los Banos Airport project measures approximately 112 acres in area.

**Questa @ Neighborhood H - Mountain House—Mountain House, CA**

*Project Manager.* Jeff served as project manager. He assisted in the preparation a phase one environmental site assessment in fall 2010. Under Jeff's leadership, the project team was able to effectively navigate through the complex historic records and ownership legacy associated with the property. The report that satisfied the demands and deadline of both the ownership entity and the financial institutions associated with the property. ENGEO performed a phase I environmental site assessment on the finished lots within Questa @ Neighborhood H of the Mountain House project.

**Lockheed Martin Storm Water Pond No 4—Sunnyvale, CA**

*Project Manager.* Jeff provided permitting consultation services, including the federal and state permitting required for the maintenance of a stormwater detention system. Jeff has also provided geotechnical and environmental support to evaluate the geotechnical conditions of the site. He also determined the absence of environmentally impacted materials within the site area. The site consists of a stormwater detention basin measuring approximately 4.5 acres in area and located adjacent to sensitive habitat.

## **E.1 - Alves Ranch Detention Basin Analysis**

THIS PAGE INTENTIONALLY LEFT BLANK

TO: Joseph Azar DATE: June 5, 2018

FROM: Sarah Rahimi, P.E. JOB#: RJAA.51.18

SUBJECT: Alves Ranch Detention Basin Analysis

This memorandum summarizes the analysis Schaaf & Wheeler completed on the Vista Del Mar Project existing Detention Basin located on the Alves Ranch property north of West Leland Road in Pittsburg, CA (see Fig. 1). The Basin currently has a water quality storage volume capacity of 5 acre-feet. The water quality storage volume was sized to treat the post development runoff from the Vista Del Mar project.

The Vista Del Mar detention basin was designed to mitigate the post development 10 year peak flow from The Vista Del Mar, San Marco and Alves Ranch developments within the drainage areas of Line B-1 and Line B. The Line B-1 drainage area drains a portion of the San Marcos project to an existing 30" RCP that runs under Highway 4. Line B drainage area drains the Vista Del Mar project and the Alves Ranch property to an existing 42" RCP that runs under Highway 4. The Detention Basin detains flow from approximately 0.4 square miles directly south (entering the basin from the "Line B" storm drain pipe) in addition to detaining high flows from a diversion structure on the "Line B-1" storm drain pipe to the west, which drains approximately 0.1 square miles.

**Figure 1: Schematic and Aerial Map of Basin, Storm Drain Lines, and Flow Directions.**

The basin has four primary means of evacuating stored water:

1. The primary, **low flow outlet** for the basin is a 2.6' x 1' rectangular opening controlling flow into the outlet structure and 42-inch diameter outlet pipe. This outlet currently has its center at approximately elevation 126 feet NGVD (6.0 feet above the basin invert).
2. A **dewatering outlet** structure lies near the basin invert (120 feet NGVD). This consists of a sealed riser pipe with eight 1-1/2" diameter holes controlling outflow. This structure allows the basin to dewater while meeting water quality requirements for the storage volume between the invert and the primary outlet.
3. A **60-inch diameter overflow outlet** connects to the same outflow structure and 42-inch pipe as the primary low flow outlet. This horizontal pipe opening allows water to enter the outlet structure as weir flow over the perimeter of the pipe, starting at elevation 142 feet NGVD.
4. Finally, the dam has a concrete-lined **emergency spillway** structure at its northeast corner that allows uncontrolled spill above 143.2 feet NGVD onto Highway 4 (for extreme inflow events).

The basin was previously designed using Contra Costa County methodology. In its current configuration, the basin detains 5 AF of water quality storage (“dead storage”). The basin’s outlet structures were also designed to meet specific post-development peak storm discharge requirements, based on a 10-year design standard on 12-hr duration. Peak storm discharge limits to Highway 4 set by the June 2004 EIR for the Vista Del Mar development area were 50 cfs for Line B and 67 cfs for Line B-1.

Because of the height of the embankment at Highway 4, the Basin is considered by the State to be a reservoir, impounded by an earthen dam. Based on a letter from DSOD dated May 30, 2012, the State has accepted the Dam as constructed.

## Analysis

With the proposed Alves Ranch development in the drainage area, the required water quality storage will increase to a total of 6.2 acre-feet. The analysis in HEC-HMS (Figure 2) focused on the modification of the primary outlet to provide additional water quality storage.

**Figure 2. HEC-HMS Model Schematic of Study Area**

## Hydrologic Model

Input parameters for Watershed "B" and "B-1" were previously estimated based on full build-out of the Vista Del Mar, San Marco and Alves Ranch developments as originally planned based on the approved 2008 Detention Basin Design Study.

While the original model was created using Contra Costa County HYDRO 6 hydrographs and HEC-1 detention basin routing, hydrology standards in the County have since changed. Currently, Contra Costa County supplies a HEC-HMS template that has been utilized in this analysis for both the development of the hydrographs based on County rainfall patterns and for routing flow through the detention basin. HEC-HMS was used to model the project area and the detention basin.

## Basin Infiltration Properties

The constant loss rates based on land use type have been provided by RJA, which were based on the approved Vista Del Mar Detention Basin Design Study (2008). These values are summarized in Table 1 and Table 2 and are considered typical impervious cover for each land use type.

**Table 1: Updated Calculation of Constant Loss for Watershed "B"**

| Freeway          | 0.67 | 0.02                     | 0.013   |

**Total: 68.35 3.822**

**Average 0.056**

**Basin Lag Time**

Original lag times of 0.13 hours for both basins were used per the approved 2008 Vista Del Mar Detention Basin Design Study.

**Basin and Outlets**

The detention basin was modeled in HEC-HMS with an elevation-storage curve along with the two outlets (low flow and dewatering) and two spillways (60 in overflow and emergency spillway). The HEC-HMS

model is capable of calculating the hydraulic rating curve for defined outlet openings, but it is also capable of utilizing user-defined rating curve for more complicated outlet structures. Outlets are input into the model as shown in Table 3. Because the 60-inch overflow first acts as a circular weir, then becomes pressurized with increasing water surface elevations, it is defined as a "Spillway" in the model with a user-defined rating curve reflecting this behavior.

**Table 3: Detention Basin Model Element**

| Outlet                    | Model ID   | Method                                                 | Modification                                               |

## Model Design Storm Configuration

The HEC-HMS was calibrated to match the hydrographs produced from the HYDRO 6 model.

### *Previous Analysis Basin Parameters*

The model was run with the existing basin configuration to ensure the results are similar to the original analysis. This provides a means of ensuring the HEC-HMS results have not diverged significantly from the previously used HYDRO6 results. The 10-year and 100-year, 3-hour and 12-hour runoff hydrographs are shown in Figure 4 – Figure 6 and match very well with the results produced by the County HYDRO model of these basins. The 10-year and 100-year, 24-hour HEC-HMS and HYDRO6 hydrographs do not match that well, as shown in Figure 7 and Figure 8. To calibrate the model to better match the HYDRO hydrographs, NOAA statistics were used, which results in a better match.

**Figure 3. 10-year, 3 hour Runoff Hydrographs**

**Figure 4: 100-year, 3-hour Runoff Hydrographs**

**Figure 5. 10-yr, 12- hour Runoff Hydrograph**

**Figure 6. 100-yr, 12-hour Runoff Hydrograph**

**Figure 7. 10-yr, 24-hour Runoff Hydrograph**

**Figure 8: 100-year, 24-hour Runoff Hydrographs**

## Model Results

### Dewatering Structure and Low Flow Outlet

To meet the required water quality storage, the low flow structure was modified so that the height of low flow outlet is at 128.0 NGVD. This configuration retains the required 6.2 ac-ft required for the water quality volume. The area of the dewatering structure was increased to 0.18 sq ft to allow the additional water to drain. The water quality volume drains in approximately 46.1 hours. This will require one (1) additional 1.5 inch diameter hole located at elevation 120 ft.

### Basin Performance for Design Storms

The 12-hr 10-yr maximum discharge limits to Highway 4 set by the June 2004 Vista Del Mar EIR development area were 50 cfs for Line B. Table 4 summarizes the peak flow for Line B.

**Table 4. Basin Performance for Design Storms**

| Location                      | 10-yr (cfs)                 |                                     | 100-yr (cfs)                |                                     |
|-------------------------------|-----------------------------|-------------------------------------|-----------------------------|-------------------------------------|
|                               | Developed without Detention | Developed with Detention/ Diversion | Developed without Detention | Developed with Detention/ Diversion |
| <b>Line B @ Freeway 3-hr</b>  | 287.2                       | 34.4                                | 428.6                       | 47.1                                |
| <b>Line B @ Freeway 12-hr</b> | 279.5                       | 36.9                                | 422.9                       | 51.9                                |
| <b>Line B @ Freeway 24-hr</b> | 304.5                       | 38.8                                | 417.5                       | 57.5                                |

A summary of the peak water surface elevation for the 100-yr storm in the detention basin is summarized below.

**Table 5. Detention Basin Peak Water Surface Elevations**

| Duration     | 10-yr                              |                                             | 100-yr                             |                                             |
|--------------|------------------------------------|---------------------------------------------|------------------------------------|---------------------------------------------|
|              | Water Surface Elevation (ft, NGVD) | Freeboard from Concrete Spillway (143.2 ft) | Water Surface Elevation (ft, NGVD) | Freeboard from Concrete Spillway (143.2 ft) |
| <b>3-hr</b>  | 133.8                              | 9.4                                         | 139.2                              | 4.0                                         |
| <b>12-hr</b> | 134.7                              | 8.5                                         | 141.7                              | 1.5                                         |
| <b>24-hr</b> | 135.5                              | 7.7                                         | 142.2                              | 1.0                                         |

### Diversion of Line B-1 Drainage System

The maximum allowable 12-hour 10-year design flow to Line B-1 at Highway is 67 cfs per the June 2004 Vista Del Mar EIR. Table 6 summarizes the peak flows at the diversion structure and at Highway 4.

**Table 6. Diversion Structure Performance for Design Storms**

| Duration     | 10-yr Peak Flow (cfs)             |                                    |                                       | 100-yr                            |                                    |                                       |

| <b>3-hr</b>  | 79.6                              | <b>60.6</b>                        | 18.9                                  | 117.5                             | 68.9                               | 48.7                                  |
| <b>12-hr</b> | 77.5                              | <b>60.1</b>                        | 17.4                                  | 116.0                             | 68.6                               | 47.4                                  |
| <b>24-hr</b> | 85.6                              | <b>62.1</b>                        | 23.5                                  | 114.8                             | 68.4                               | 46.5                                  |

## Conclusion

The HEC-HMS model was calibrated to the HYDRO6/HEC-1 modeling from the previous analysis. With the proposed Alves Ranch development plans as a basis for modification, the HMS model indicates that the low level outlet may be raised by 2.0 ft and still meets previously approved criteria per 2008 Vista Del Mar Detention Basin Design Study.

The 12-hr, 10-year storm peak discharge to Line B will be 36.9 cfs (50 cfs maximum allowable at HWY 4 per EIR). The 12-hr, 10-year storm peak discharge to Line B-1 will be 60.1 cfs (67 cfs maximum allowable at HWY 4 per EIR). The maximum 12-hr, 10-year storm peak discharge from Line B-1 to the basin is 17.4 cfs. And the 12-hr, 100-yr WSEL is contained within the basin.

  5. Ruggeri-Jensen-Azar Inc: Hydrologic Calculations, Alves Ranch and Vista Del Mar Project, Pittsburg, California, June 2018.

Mr. Roylance:

At your request, we have updated calculations performed in References 1 through 4 regarding the Alves Ranch/Vista Del Mar project located in Pittsburg, California. The purpose of the calculations is to demonstrate that the originally planned water quality basin at the outfall of the project is still adequate in size to treat stormwater runoff from the project, given changes in the land plans to both the Alves Ranch and Vista Del Mar projects since 2008.

## **METHODOLOGY**

As per the original methodology approved for the project in 2008, basin sizing follows methods developed by the Contra Costa County Clean Water program based on unit capture of rainfall runoff in relationship to percentage of Directly Connected Impervious Area (DCIA) of tributary watersheds. In order to recalculate the water quality volume required, we compared tributary areas and DCIAs for both projects based on our 2008 calculations in Reference 4 and information furnished to us by Ruggeri-Jensen-Azar Inc. in Reference 5. Using the same procedures discussed in References 1 through 4, we estimate the water quality pond for the project to have a required volume of 6.17 acre-ft.

Our calculations are attached to this report.

We understand that the land plan for the Alves Ranch project north of Leland Road is still in the preliminary phase. We therefore recommend that these calculations and the water quality basin design be verified after the final land planning on the project has been completed. However, the preliminary calculations performed in this analysis indicate that the required volume in the water quality basin is slightly less than as originally calculated in 2008.

## CLOSURE

This review presents our opinions specific to the stormwater management aspects for the proposed development. If changes occur in the nature or design of the project, we should be allowed to review such changes and provide additional comments as appropriate. Our services were limited to the review of the stormwater components of the project only. We strived to perform our review services in accordance with generally accepted engineering principles and practices currently employed in the area; no warranty is expressed or implied.

If you have any questions or comments regarding this letter, please call and we would be glad to discuss them with you.

Sincerely,

ENGEO Incorporated

Ingrid Verastegui

Subject: **Alves Ranch – Pittsburg, CA**  
**Revised Noise Contour Analysis**  
Salter Project: 18-0340

Dear Mandy:

In 2008, we prepared noise contours for the subject project per the request of the City of Pittsburg. The site plan has been updated, and you requested that we revise our analysis. This letter contains a summary of our noise contour analysis, and figures indicating the future cumulative plus project noise environment and mitigation to allow the project to meet the City's exterior noise standards. In summary, noise barriers can reduce future exterior noise levels to meet the project's exterior noise standards.

#### **ACOUSTICAL CRITERIA**

As stated in our previous studies<sup>1</sup>, the draft environmental impact report contains the following mitigation requirements for the project:

Mitigation 14-1 (b) Design common outdoor use areas in the residential portions of the project to maintain exterior noise levels to "normally acceptable" levels. These areas shall be situated away from predominant noise sources or should be shielded by natural or created topographical features, barrier, or the buildings themselves.

Mitigation 14-1 (c) Construct a noise barrier for residences proposed adjacent to West Leland Road. The noise barrier should extend approximately five to ten feet above the pad elevations to reduce traffic-generated noise levels to 60 dBA Ldn. The barrier shall take the form of a wall, berm, and/or structures that shield the outdoor use areas of the first row of residences north and south of West Leland Road.

The City interprets "Normally Acceptable" as a limit of 60 dB L<sub>dn</sub> and 65 dB L<sub>dn</sub> for single-family and multi-family residential developments, respectively.

---

## ANALYSIS

To quantify future cumulative plus project noise levels, we used topographical and site plan<sup>2</sup> information provided to us to prepare computer generated noise contours for the site (Figure 1). Data obtained from our on-site noise measurements were used to calibrate noise levels generated by vehicular traffic along Highway 4. To account for potential increases in traffic noise levels since our previous study, we added 1 dB to the previous levels. This is based on a report dated November 2007, by the Metropolitan Transportation Commission estimating that vehicle trips in the San Francisco Bay Area will increase by approximately 1 percent per year through the year 2035<sup>3</sup>. Over a ten-year period, this corresponds with a 1-decibel increase in average noise levels.

Noise barriers were added to our analysis where needed to meet the project noise criteria. The lot locations where these are needed are depicted on the enclosed Figure 2 along with the necessary barrier heights. The precise location and configuration will need to be determined for each barrier based on the final site layout. Noise levels shown in Figure 1 include the anticipated effect of the noise barriers. The contours are for a typical receiver height of 5-foot above grade. All noise barriers should be constructed with a surface weight not less than four pounds per square foot and be free of gaps, cracks, or openings, including along the base and at building intersections.

If the multi-family/duet units will have private balconies, many would be exposed to noise levels up to approximately 75 dB  $L_{dn}$ , which exceeds of the City's 65 dB  $L_{dn}$  exterior noise goal. Therefore, any balconies located in areas indicated on Figure 3 would require additional mitigation. This could include partial height or full "greenhouse-type" noise barriers. The specific treatments shall be determined on a unit-by-unit basis. Results of the unit-by-unit analysis, including the description of the necessary noise control treatments, shall be submitted to the City with the building plans and approved prior to issuance of a building permit.

**Subject: Alves Ranch – Trip Generation Assessment**

*WC18-3500.02*

---

Fehr & Peers prepared a trip generation assessment for the Alves Ranch project on West Leland Road at Alves Ranch Road in Pittsburg. The site was originally entitled to develop 560 multi-family dwelling units and 257,000 square-feet of business commercial uses, and is currently proposed to be developed with up to 346 single-family dwelling units and up to approximately 140,000 square-feet of general retail uses, including up to a 40,000 square-foot grocery store. The purpose of this assessment is to determine if the currently proposed project would generate vehicle traffic at levels similar to or less than levels generated by the original entitlements.

Results of the comparison indicate that the current proposal would generate similar levels of vehicle traffic as compared to the project evaluated in the 2004 Environmental Impact Report (2004 EIR) that served as the basis for the initial project approvals and entitlements. Although the currently proposed project is expected to generate the same overall levels of vehicle traffic, some site access and circulation parameters have changed and additional assessment of site access and circulation may be necessary to ensure that intersections that serve the site are adequate to accommodate the expected travel flows.

The following presents our project understanding, trip generation comparison, and conclusions.

### PROJECT BACKGROUND AND UNDERSTANDING

The project site is located on West Leland Road at Alves Ranch Road in Pittsburg, as shown on **Figure 1**. The site is bound by State Route 4 to the north, a residential development to the west, West Leland Road to the south, and an undeveloped parcel to the east. Surrounding land uses are

primarily residential, with the Pittsburg/Bay Point BART station in close proximity to the site (approximately 1,500 feet). A shopping center is located at the corner of West Leland Road at Bailey Road, less than one-mile from the site.

A certified Environment Impact Report was prepared in 2004 (2004 EIR), which documented the transportation impacts of the then proposed project, which included 563 apartment units, 206,000 up which included a mixture of housing types with up to 170 single-family homes, 308 apartment units, 170,000 square feet of office, and 51,500 square feet of retail uses; a trip generation assessment prepared for the 2008 project concluded that the trip generation was lower than the entitled project and that the severity of the transportation impacts identified as part of the 2004 EIR would not change.

As currently contemplated, the approximately 38-acre site is proposed to be developed with up to 346 dwelling units, including 136-attached single-family homes and 210 detached single-family homes on 26 acres. The remaining 12-acres would be developed with general retail uses, with a maximum development size of approximately 140,000 square feet, including up to a 40,000 square foot grocery store.

Access to the site is proposed from two locations on West Leland Road. As part of the project, Alves Ranch Road would be extended north into the site and form the fourth leg of an existing signalized intersection with West Leland Road. A full access unsignalized intersection is also proposed on West Leland Road, west of Alves Ranch Road, off-set with Tomales Bay Drive on the south side of West Leland Road, which would remain a right-in/right-out side-street stop controlled intersection. An emergency vehicle access location would be provided on the eastern portion of the site, approximately 750 feet east of Alves Ranch Road.

As part of the project, a 10-foot wide trail would be constructed on the north side of West Leland Road along the project frontage, connecting to an existing sidewalk in the west. Subsequent to the completion of the project, there would be a sidewalk gap of approximately 1,100 feet on the north side of West Leland Avenue between Woodhill Drive and the BART access roadway. Class II bicycle facilities are provided on West Leland Road, which would not be altered as a result of the project.

## TRIP GENERATION

Trip generation is the process of estimating the total amount of trips generated by a site, as well as the expected travel mode. For this project, trip generation rates presented in the Institute of

Transportation Engineers (ITE) *Trip Generation Manual* (10th Edition) were used. For the 2004 and 2008 analyses, the 7th Edition of the Trip Generation publication was used. Since the time those analyses were prepared, ITE released several updates to the *Trip Generation Manual* and the most current manual is the most appropriate source to estimate potential project trips. The 2004 and 2008 trip generation estimates considered a 6 percent transit reduction for the projects residential uses to account for the close proximity to the BART station, and a 20 percent internalization factor between the retail and residential portions of the site, reflecting that many future retail patrons would already be within the general project vicinity and would not need to travel on the local or regional roadway system to access the site.

At retail establishments, such as the one that could be developed as part of the commercial parcel, driveway traffic comprises: (1) new traffic generated by the project, (2) traffic that would otherwise already be on the adjacent roadways but the driver decides to stop at the site (e.g., to purchase an item on their way home from work), and (3) traffic on other nearby roadways, but the driver decides to take a short detour to stop at the site. The trips in Item 2 are referred to as “pass-by” trips and the trips in Item 3 are referred to as “diverted-link” trips.

Information contained in the ITE *Trip Generation Handbook* and surveys of similar uses was used to estimate pass-by and diverted-link trips. For grocery stores, the average pass-by rate is 36 percent, and the average diverted linked trip rate is 32 percent during PM peak hour (limited data is available for the AM peak hour). In other words, at a grocery store, approximately, 68 percent of the traffic entering and exiting the site is already on the surrounding roadway system – not a new vehicle trip to the area. For shopping centers, the average pass-by rate is 32 percent and the average diverted linked trip rate is 16 percent, or approximately 50 percent of the vehicle traffic is already on the roadway system.

For this assessment, a pass-by/diverted trip reduction was applied to the grocery store component of the project only as this is a specific proposed use and the trip making characteristics are well documented. For the proposed general retail, no pass-by or diverted trip reduction was taken, similar to the 2004 EIR and 2008 Addendum as there is no information about the those proposed uses. As the project components are better defined, the application of appropriate pass-by rates is recommended.

The proposed project trip generation estimates are presented in **Table 1**, which shows that the current project proposal is expected to generate approximately 7,810 weekday daily trips, including 436 morning peak hour and 774 evening peak hour trips when considering the same transit and

internal trip reductions as the 2004 EIR and 2008 Addendum analysis, as well as application of a pass-by/diverted-trip reduction for the grocery store component.

**TABLE 1  
PROPOSED PROJECT WEEKDAY TRIP GENERATION**

| Use                                                       | Size                | Daily  | Morning |     |       | Evening |     |       |
|-----------------------------------------------------------|---------------------|--------|---------|-----|-------|---------|-----|-------|
|                                                           |                     |        | In      | Out | Total | In      | Out | Total |
| Single Family Homes <sup>1</sup>                          | 346 units           | 3,080  | 60      | 180 | 240   | 203     | 119 | 322   |
| Grocery Store <sup>2</sup>                                | 40,000 square feet  | 4,270  | 92      | 61  | 153   | 188     | 181 | 369   |
| Shopping Center <sup>3</sup>                              | 100,000 square feet | 3,780  | 58      | 36  | 94    | 183     | 198 | 381   |
| Less Pass-by/ Diverted Supermarket Only <sup>4</sup>      |                     | -1,710 | --      | --  | --    | -75     | -72 | -147  |
| Less Internal trips between all project uses <sup>5</sup> |                     | -1,610 | -13     | -38 | -51   | -95     | -56 | -151  |
| Total Vehicle Trips                                       |                     | 7,810  | 197     | 239 | 436   | 404     | 370 | 774   |

- ITE land use category 210 – Single-Family Homes (Adj Streets, 7-9A, 4-6P):  
Weekday Daily: (T) = 9.44 (X)  
AM Peak Hour: T = 0.74(X); Enter = 25%; Exit = 75%  
PM Peak Hour: T = 0.99 (X); Enter = 63%; Exit = 37%  
Trip generation results reflect 6 percent reduction to account for transit use.
  - ITE land use category 850 – Grocery Store (Adj Streets, 7-9A, 4-6P):  
Weekday Daily: (T) = 106.78(X)  
AM Peak Hour: T = 3.82 (X); Enter = 60%; Exit = 40%

AM Peak Hour: T = 0.94(X); Enter = 62%; Exit = 38%  
PM Peak Hour: T = 3.81 (X); Enter = 48%; Exit = 52%
  - Reflects a 40 percent pass-by/diverted trip reduction for grocery store only trips.
  - Reflects a 20 percent reduction of retail trips to account for internal interactions between the grocery store, retail and residential portions of the project.
- Source: *Trip Generation Manual* (10<sup>th</sup> Edition), ITE, 2017; Fehr & Peers, 2018.

The resulting trip generation estimates from Table 1 were then compared to the trip generation estimates for the project evaluated in the 2004 EIR and the 2008 Addendum, as presented in **Table 2**. This comparison shows that compared to the 2004 EIR project, the current proposal would generate slightly more daily vehicle trips, approximately 30 percent fewer morning peak hour trips, and slightly fewer evening peak hour trips. As compared to the 2008 Addendum project, the current proposal would generate slightly more daily vehicle trips, almost one-third fewer morning peak hour trips, and slightly more evening peak hour trips.

Source: Addendum to the 2004 Environmental Impact Report for the Vista Del Mar Project, August 2008 and Fehr & Peers, 2018.

During the PM peak hour, the directionality of some vehicle trips could change with the proposed project as compared to the 2004 EIR project, with more inbound trips (approximately 60 more trips) and fewer outbound trips (approximately 75 fewer trips). This is due to the increased level of retail proposed for the site, as compared to business commercial uses. It should be noted that the proposed grocery store and supporting retail are intended to be locally serving, meaning that the vast majority of patrons come from within a 2 to 3 mile radius, with most patrons from within a 1-mile radius. As such, the vehicle trips lengths tend to be shorter than for other types of commercial uses, such as an office, and tend not to use the regional transportation system, such as State Route 4, unless they are part of an already planned trip, such as a stop at the grocery store on the

way home from work. Additionally, the addition of retail to the area is expected to replace some retail trips that are already be occurring in the area by providing additional retail options closer to existing and planned residential neighborhoods where local retail is not present.

As future commercial development plans are future defined, use of the general shopping center rate, as presented in this assessment, may be appropriate if the proposed restaurant square-footage does not exceed 20 percent of the non-grocery store square-footage and other uses are not yet well defined. However, it is recommended that a detailed trip generation assessment be prepared once a development plan has been proposed, and the appropriate trip generation rate, internal trip reduction factors, and pass-by/diverted trip factors applied.

## CONCLUSION

Results of the comparison indicate that the current proposal would generate slightly less vehicle traffic than the project evaluated in the 2004 Environmental Impact Report (2004 EIR) that served as the basis for the initial project approvals and entitlements. Although the currently proposed project is expected to generate less overall vehicle traffic, some site access and circulation parameters have changed and additional assessment of site access and circulation may be necessary to ensure that intersections that serve the site are adequate to accommodate the expected travel flows.

This completes our trip generation assessment for Alves Ranch. Please contact Kathrin or Mark at (925) 930-7100 if you have questions.

THIS PAGE INTENTIONALLY LEFT BLANK

## **H.1 - Base Wastewater Flow Memorandum**

THIS PAGE INTENTIONALLY LEFT BLANK

## MEMORANDUM

To: Mandy Leung, William Lyon Homes  
From: Joseph Azar  
Date: June 5, 2018  
Subject: Alves Ranch Development – Base Wastewater Flow

RJA Job No. 171084

The 2003 final report for the City of Pittsburg Wastewater Collection System Master Plan allocated a future Base Wastewater Flow (BWF) from 669 Single Family Homes, 513 Multi-Family Homes and 21 acres of Commercial for sub-basin 105 or the Alves Ranch property which included Vista Del Mar and Alves Ranch Developments.

Since the Vista Del Mar Development has only 518 Single Family Homes, this resulted in an allocated wastewater flow from 151 Single Family Homes, 513 Multi-Family Homes and 21 acres of Commercial for the Alves Ranch Development.

In August 2011, the City issued Amendment #3 to the 2003 final report. Amendment #3 revised the ultimate land use for sub-basin 105 or the Alves Ranch property to the following: 704 Single Family Homes, 300 Multi-Family Homes, 93 Apartments and 14 acres of Commercial. This resulted in a wastewater flow allocation from 186 Single Family Homes, 300 Multi-Family Homes, 93 Apartments and 14 acres of Commercial for the Alves Ranch Development.

The 2018 proposed Master Site Plan for the Alves Ranch Development has 346 Single Family Homes and 12 acres of Commercial.

The following Table A shows the Base Wastewater Flow (BWF) generation from the 2003 final report, August 2011 Amendment #3, and the 2018 proposed Master Site Plan for the Alves Ranch Development:

**Table A**  
**Base Wastewater Flow (BWF)**

| <b>Alves Ranch Development</b> | <b>Single Family</b> | <b>Multi-Family</b> | <b>Apartments</b> | <b>Commercial</b> | <b>BWF*<br/>(mgd)</b> |
|--------------------------------|----------------------|---------------------|-------------------|-------------------|-----------------------|
| 2003 Final Report              | 151                  | 513                 | 0                 | 21                | 0.14                  |
| August 2001 Amend. #3          | 186                  | 300                 | 93                | 14                | 0.12                  |
| 2018 proposed Master Site Plan | 346                  | 0                   | 0                 | 12                | 0.09                  |

\* using 220 gpd/unit for Single Family  
170 gpd/unit for Multi-Family  
150 gpd/unit for Apartments  
1000 gpd/unit for Commercial

Based on Table A above, the BWF generation from the proposed 2018 Master Site Plan for the Alves Ranch Development will be decreased by approximately 36% and 25% respectively from the previously approved allocated BWF shown in the 2003 final report and the August 2001 Amendment #3.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                |                                              |                              | Date                       | Initial |
| Visual Factors                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                |                                              |                              |                            |         |
| <p><b>Mitigation 5-1.</b> To minimize the degree of project-specific adverse impact on the visual character and quality of the project site, the project shall include an overall layout and grading plan, and associated set of design standards and controls for grading, creekway and landform protection, individual site and architectural design (including individual custom lot architectural design), common and private landscaping, public and private roadways, and light and glare (including outdoor lighting), which to the satisfaction of the Pittsburgh Planning Commission, as determined through the City's design review process, will sufficiently minimize the degree of adverse impact on the general visual character of the project site. Based upon related land use and urban design goals and policies set forth in the City of Pittsburgh General Plan and General Plan EIR, these project design refinements should include some combination of the following:</p> <ul style="list-style-type: none"><li>• <b>Incorporate natural creeks and open space amenities into the design of project residential neighborhoods (in keeping with GP goals and policies 2-P-26, 2-P-89, 4-G-4, 4-P-9).</b></li><li>• Maintain the general character of onsite hill forms (in keeping with GP goals 2-G-31 and 2-P-89).</li><li>• <b>Plant trees and other vegetation along West Leland Road and other project collector and arterial roadways in order to maintain the sense of “rural” open space at the City’s southern boundary (in keeping with GP policy 4-P-6).</b></li><li>• <b>Consider use of single-loaded peripheral residential streets at the southern and western edges of the project residential areas south of West Leland Road in order to encourage residential development at these outer edges to face outwards toward the rural landscape and prevent a solid wall of residential backyard fences (in keeping with GP policy 4-P-7).</b></li></ul> | Review of project plans                        | Prior to issuance of grading/building permit | City planning staff          |                            |         |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Review of project plans and field verification | Prior to resident occupancy                  | City planning staff          |                            |         |
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Review of project plans                        | Prior to issuance of grading                 | City planning staff          |                            |         |

**Table 1 (cont.): Alves Ranch 3rd Addendum to the 2004 Vista Del Mar EIR Project Mitigation Monitoring and Reporting Program**

| Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Method of Verification | Timing of Verification | Responsible for Verification | Verification of Completion |         |

| these measures shall be required if feasible. However, with either or both of these improvements, the intersection would still operate at LOS F during both the AM and PM peak hour; so this measure would not reduce this impact to a less-than-significant level. Therefore, this cumulative impact is considered significant and unavoidable. The project applicants shall pay their fair share contribution towards any of these improvements deemed feasible by the City.                                                                                                                                                                                                                                                                                                                                                                                      |                        |                                      |                              |                            |         |
| <p><b>Mitigation 7-3:</b> The project applicants shall pay a traffic mitigation fee equal to their fair share of the improvements needed to adequately serve projected cumulative morning (AM) and evening (PM) peak hour traffic volumes at the Bailey Road/Concord Boulevard intersection in the City of Concord in an amount determined by the City of Pittsburgh City Council in cooperation with the affected jurisdiction (the City of Concord and/or TRANSPLAN). These improvements include:</p> <ul style="list-style-type: none"> <li>• construction of exclusive right-turn and left-turn lanes and a second through lane on the northbound approach;</li> <li>• construction of two exclusive left-turn lanes on the southbound approach; and</li> <li>• construction of a third through lane on both the eastbound and westbound approaches.</li> </ul> | Receipt of payment     | Prior to issuance of building permit | City planning staff          |                            |         |
| <p><b>Mitigation 7-4:</b> The project applicants shall contribute their fair share to the following needed improvements at the San Marco Boulevard/West Leland Road intersection:</p> <ul style="list-style-type: none"> <li>• Convert the northbound shared through/right-turn lane to an exclusive right-turn lane; and</li> <li>• Convert one of the northbound left-turn lanes to a northbound through lane.</li> </ul>                                                                                                                                                                                                                                                                                                                                                                                                                                         | Receipt of payment     | Prior to issuance of building permit | City planning staff          |                            |         |

**Table 1 (cont.): Alves Ranch 3rd Addendum to the 2004 Vista Del Mar EIR Project Mitigation Monitoring and Reporting Program**

| Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Method of Verification | Timing of Verification               | Responsible for Verification | Verification of Completion |         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|--------------------------------------|------------------------------|----------------------------|---------|
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                        |                                      |                              | Date                       | Initial |
| Implementation of these improvements would involve changing the lane configuration at the intersection. Additional right-of-way acquisition would not be required. These improvements are not included in the current list of improvements to be funded by the existing City or East County traffic mitigation fee programs. The City/applicant development agreement proposed as part of this project shall include a combination of City (Traffic Mitigation Fee Program) and developer commitments that ensure that this improvement will be fully funded prior to issuance of any certificate of occupancy for any residential or commercial office space within the project.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                        |                                      |                              |                            |         |
| Mitigation 7-5: The project applicants shall contribute their fair share to needed improvements at the Willow Pass Road/Avila Road intersection, as shown in Figure 7.9, that include configuring the intersection with two left-turn lanes and a right-turn lane on the westbound Avila Road approach, two left-turn lanes and a through lane on the southbound Willow Pass Road approach, and one right-turn lane and one through lane on the northbound Willow Pass Road approach. The City shall work with other affected jurisdictions to develop an interjurisdictional funding mechanism for these improvements. These improvements are not included in the current list of improvements to be funded by existing City or East County traffic impact fee programs. The City/applicant development agreement proposed as part of this project shall include a combination of City (Traffic Mitigation Fee Program), interjurisdictional (East County Subregional Impact Fee), and developer commitments that ensure that this improvement will be fully funded prior to issuance of any certificate of occupancy for any residential or commercial office space within the project. | Receipt of payment     | Prior to issuance of building permit | City planning staff          |                            |         |

Table 1 (cont.): Alves Ranch 3rd Addendum to the 2004 Vista Del Mar EIR Project Mitigation Monitoring and Reporting Program

| Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | Method of Verification           | Timing of Verification               | Responsible for Verification | Verification of Completion |         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------|--------------------------------------|------------------------------|----------------------------|---------|
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                  |                                      |                              | Date                       | Initial |
| <b>Mitigation 7-6:</b> The project applicants shall pay a traffic mitigation fee equal to their fair share of the improvements needed to adequately serve projected cumulative morning (AM) and evening (PM) peak hour traffic volumes at the Bailey Road/Myrtle Drive intersection in Contra Costa County and the City of Concord. These improvements include: <ul style="list-style-type: none"> <li>• installation of a traffic signal;</li> <li>• provision of a left-turn lane on the southbound Bailey Road approach; and</li> <li>• widening of the westbound Myrtle Drive approach to provide an exclusive left-turn lane.</li> </ul> | Receipt of payment               | Prior to issuance of building permit | City planning staff          |                            |         |
| <b>Mitigation 7-7:</b> As described above, the project applicants shall contribute their fair share to all applicable development impact fee programs, including the East County Regional Impact Fee, which is designed to fund improvements to regional facilities including Highway 4. However, the segment of Highway 4 between Willow Pass Road (Pittsburg) and Willow Pass Road (Concord) was improved several years ago, and no further improvements are included in the <i>Strategic Plan</i> of the East Contra Costa Regional Fee and Finance Authority.                                                                             | Receipt of payment               | Prior to issuance of building permit | City planning staff          |                            |         |
| <b>Mitigation 7-8:</b> The project shall construct bus turnouts and related transit amenities along the project frontage on West Leland Road and on internal roadways as needed.                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Receipt of payment               | Prior to issuance of building permit | City planning staff          |                            |         |
| <b>Infrastructure and Public Services</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                  |                                      |                              |                            |         |
| <b>Mitigation 8-1.</b> As required by State SB 221, prior to City approval of a final map for the proposed project, the City of Pittsburg Community Development Department shall undertake a <i>subsequent water supply analysis</i> , which shall describe the citywide water supply situation at that future                                                                                                                                                                                                                                                                                                                                | Receipt of water supply analysis | Prior to issuance of building permit | City planning staff          |                            |         |

Table 1 (cont.): Alves Ranch 3rd Addendum to the 2004 Vista Del Mar EIR Project Mitigation Monitoring and Reporting Program

| Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Method of Verification                          | Timing of Verification               | Responsible for Verification | Verification of Completion |         |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                       |                                     |                                      | Date                       | Initial |
| <b>Mitigation 9-4.</b> To help reduce the long-term accumulation of non-point source pollutants from the project within downstream surface waters, incorporate long-term source control and pre-discharge treatment measures into the <i>Storm Water Pollution Prevention Plan (SWPPP)</i> described in <i>Mitigation 9-3</i> above, in accordance with Municipal Regional Stormwater Permit Order No. R2-2015-0049 NPDES No. CAS612008, subject to the approval by the City Engineering Division.                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | Review and approval of SWPPP                                          | Prior to issuance of grading permit | City planning and public works staff |                            |         |
| <b>Soils and Geology</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                       |                                     |                                      |                            |         |
| <b>Mitigation 10-1.</b> The project geotechnical engineer shall prepare a <i>subsequent final, design-level project geotechnical study</i> subject to review and approval by an independent engineering geologist retained by the City at applicant expense. The subsequent study shall evaluate if the design-level study and all of its conclusions are consistent with generally accepted geotechnical engineering practice and in agreement with the approved site development plan. The review shall include adequate consideration of project geotechnical implications for adjacent properties, including the Oak Hills, San Marco, and San Marco Meadows subdivisions. Relevant provisions of the subsequent geotechnical study shall be incorporated into project grading and site preparation plans. All earthwork and site preparation shall be performed under the direct supervision of a State-certified geotechnical engineer or engineering geologist. | Review and approval of design-level geotechnical study                | Prior to issuance of grading permit | City engineering staff               |                            |         |
| <b>Mitigation 10-4.</b> The City and its independent engineering geologist shall closely evaluate all project proposals for the construction of slopes, in particular cut slopes steeper than three-to-one, to prevent future slope failures that could damage existing homes/project improvements or require                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Review and approval of grading plans and field verification as needed | Prior to issuance of grading permit | City Engineer                        |                            |         |

**Table 1 (cont.): Alves Ranch 3rd Addendum to the 2004 Vista Del Mar EIR Project Mitigation Monitoring and Reporting Program**

| Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | Method of Verification                                                | Timing of Verification                                                                                  | Responsible for Verification | Verification of Completion |         |

| slope repairs at the expense of the West Pittsburgh GHAD. If the stability of these proposed slopes can be independently confirmed, implement the construction measures recommended in the project geotechnical study. If the slopes= stability cannot be confirmed, redesign the slopes to achieve a flatter, more sustainable gradient.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                       |                                                                                                         |                              |                            |         |
| <b>Mitigation 10-6.</b> Specifications for site development shall include mandatory phasing for the construction of site improvements, as recommended by the project geotechnical engineer, if settlement monitoring indicates that long-term settlement within individual fill areas could eventually exceed allowable amounts and damage or otherwise limit the usefulness of buildings or other improvements.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  | Review and approval of grading plans and field verification as needed | Prior to issuance of grading permit                                                                     | City Engineer                |                            |         |
| <b>Mitigation 10-7.</b> In addition to the observation of all cut and fill slope construction, the project geotechnical engineer shall inspect and certify that any expansive soils underlying individual building pads and all roadway subgrades have been either removed or amended in accordance with City-approved construction specifications. If expansive soils are not fully remediated on each lot and in the area of all public and private improvements at the time of site development, the project geotechnical engineer shall make site-specific recommendations for grading, drainage installation, foundation design, the addition of soil amendments, and/or the use of imported, non-expansive fill materials, as may be required to fully mitigate the effects of weak or expansive soils and prevent future damage to project improvements. Following review and approval by the City-retained independent engineering geologist and City Engineer (see <i>Mitigation 10-1</i> ), these recommendations shall be incorporated into a report to be included with each building | field verification                                                    | During construction and prior to issuance of grading permit<br><br>Prior to issuance of building permit | City Engineer                |                            |         |

| <b>Mitigation 10-8. Specifications for site development shall include a protocol for verifying that adequate protection has been provided for all foundations and underground utilities that could be damaged by corrosive soils. The project civil engineer shall be responsible for implementation of this protocol, with final approval by the City Engineer.</b>                                                                                                                                                                                                                                                             | field verification                                                  | During construction and prior to issuance of building permit      | City Engineer                |                            |         |
| <b>Mitigation 10-9. Prepare an <i>erosion control plan</i> subject to City approval, and implement the plan during construction. The plan shall provide for long-term stabilization of all exposed soils upon the completion of project development.</b>                                                                                                                                                                                                                                                                                                                                                                         | Review and approval of erosion control plan, and field verification | Prior to issuance of grading permit                               | City Engineer                |                            |         |
| <b>Mitigation 10-10. Educational materials that discourage overwatering in landscaped areas shall be furnished to all future lot owners and commercial/multi-family property managers at the time of purchase and periodically thereafter (perhaps by inclusion with water or tax bills), as part of an effort to control groundwater seepage. Area 1 property managers shall also be required to regularly maintain onsite drainage systems to ensure that storm water runoff is directed away from all slope areas.</b>                                                                                                        | Proof of dissemination of materials                                 | To be included into the project CC&Rs and disclosures information | City Engineer                |                            |         |
| <b>Mitigation 10-12. Require project annexation to the West Pittsburgh Geologic Hazard Abatement District (GHAD) in order to adequately address the special circumstances and long-term geotechnical maintenance needs associated with development in areas of potential geologic instability. Establish a long-term funding mechanism for the maintenance of slopes and all other onsite conditions that could affect slope stability. The existence of, and the responsibilities attached to, project inclusion in the GHAD shall be clearly disclosed to all purchasers of property within the project site. In addition,</b> | Proof of annexation into the GHAD                                   | After all streets within the development are completed            | City Engineer                |                            |         |

| <b>all risks and liabilities associated with the ownership of project land in the vicinity of potentially unstable slopes shall be fully explained to potential buyers at the time of purchase.</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                                          |                                     |                              |                            |         |
| <b>Biological Resources</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                          |                                     |                              |                            |         |
| <p><b>Mitigation 11-1.</b> The ultimate determination whether the proposed project, after implementation of the mitigations identified in this EIR, is or is not inconsistent with one or more General Plan goals or policies, would be the responsibility of City officials assigned such authority. In particular, interpretation of project consistency with City of Pittsburg General Plan policy is the ultimate responsibility of the City of Pittsburg Planning Commission and City Council. In order to comply with City of Pittsburg General Plan policies 9-P-1 and 9-P-8, the project shall incorporate the following changes and mitigations into the project:</p> <p>(1) Implement Mitigations 11-3 through 11-12 which are discussed on the following pages (see Policy 9-P-1); and</p> <p>(2) <b>Reseed cut-and-fill slopes or other graded/disturbed areas on the project site with a native herbaceous seed mix. No non-native or invasive species shall be included in the mix (see Policy 9-P-8).</b></p> <p>(3) The current preliminary version of the applicant's Mitigation and Monitoring Plan formulated for review by the resources agencies proposes preservation of approximately 3,300 linear feet of onsite drainages and onsite enhancement of approximately 1,000 linear feet of drainages.</p> <p>The City of Pittsburg shall make the above items conditions of project approval and shall not approve grading plans until the above mitigations have been incorporated into the project to City satisfaction.</p> | Verification that project plans incorporate all measures | Prior to issuance of grading permit |                              |                            |         |

| Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | Method of Verification                                                                | Timing of Verification              | Responsible for Verification | Verification of Completion |         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|-------------------------------------|------------------------------|----------------------------|---------|
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                                                                                       |                                     |                              | Date                       | Initial |
| During the local development review process, the City shall determine whether the applicant-proposed onsite drainage preservation program achieves project consistency with General Plan goals and policies related to creeks, or whether additional design measures are warranted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                       |                                     |                              |                            |         |
| <b>Mitigation 11-3. The City of Pittsburg shall not issue a grading permit for the project until adequate demonstration to the City that California red-legged frog issues have been resolved to the satisfaction of the USFWS. To satisfy the USFWS, the applicant will need to: (1) instruct the U.S. Army Corps of Engineers (Corps) to initiate formal consultation, pursuant to section 7 of the Federal Endangered Species Act, with the USFWS regarding the California red-legged frog; and (2) implement mitigation as necessary (see details below). A copy of a “non-jeopardy” Biological Opinion issued by the USFWS shall be submitted to the City prior to issuance of a grading permit.</b>                                                                 | Submittal of documentation demonstrating satisfaction of USFWS requirements           | Prior to issuance of grading permit | City planning staff          |                            |         |
| <b>Mitigation 11-4. The City of Pittsburg shall not issue a grading permit for the project until adequate demonstration to the City that mitigation for impacts to California tiger salamander habitat will be implemented to the satisfaction of the CDFG (and the USFWS since the species has recently been federally listed). To satisfy the CDFG and USFWS, the applicant will need to: (1) consult with the CDFG and the USFWS; and (2) redesign the project as much as possible to avoid aestivation and potential breeding habitat; or (3) where avoidance is not feasible, replace affected habitat in accordance with CDFG and USFWS requirements, and in accordance with specifications discussed in Mitigation 11-1; and (4) salvage adults and/or larvae.</b> | Submittal of documentation demonstrating satisfaction of CDFG (now CFWS) requirements | Prior to issuance of grading permit | City planning staff          |                            |         |

Table 1 (cont.): Alves Ranch 3rd Addendum to the 2004 Vista Del Mar EIR Project Mitigation Monitoring and Reporting Program

| Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Method of Verification                | Timing of Verification              | Responsible for Verification | Verification of Completion |         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------|-------------------------------------|------------------------------|----------------------------|---------|
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                       |                                     |                              | Date                       | Initial |
| <b>Mitigation 11-6.</b> The applicant shall coordinate with the USFWS regarding any additional review of potential San Joaquin kit fox impacts resulting from the proposed project. Additionally, within 30 days prior to any earth-moving disturbance, a qualified kit fox biologist(s) [i.e., the biologist(s) must meet the qualifications stated in USFWS survey protocol (USFWS 1997b)] shall conduct preconstruction den surveys on the project site. These surveys shall follow the methodology outlined in Appendix 1, section 2, of USFWS 1997 survey protocol. Any potential dens identified during the preconstruction surveys shall be monitored with cameras for a minimum of three nights in accordance with the survey protocol. If kit fox or kit fox sign is identified at any time during these surveys, all work shall cease and USFWS and CDFG personnel shall be contacted immediately. | Field survey by a qualified biologist | Prior to issuance of grading permit | City planning staff          |                            |         |
| <b>Mitigation 11-7.</b> Completion of CDFG-protocol surveys for burrowing owl shall be a condition of project approval. The applicant shall retain a qualified biologist to conduct CDFG-protocol surveys for burrowing owl the year grading is proposed. If burrowing owls are found on the project site, the applicant shall be required to prepare a <i>Habitat Mitigation Plan</i> and a <i>Mitigation Agreement</i> for any burrowing owls identified. The City shall receive copies of the approved <i>Mitigation Plan</i> and <i>Mitigation Agreement</i> between the applicant and the CDFG prior to issuing a grading permit for the proposed project. All surveys and mitigation shall be coordinated by the applicant with CDFG. If such surveys demonstrate that burrowing owls do not occur on the project site, no further requirements for burrowing owls shall be required by the City.      | Field survey by a qualified biologist | Prior to issuance of grading permit | City planning staff          |                            |         |

**Table 1 (cont.): Alves Ranch 3rd Addendum to the 2004 Vista Del Mar EIR Project Mitigation Monitoring and Reporting Program**

| Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Method of Verification                | Timing of Verification              | Responsible for Verification | Verification of Completion |         |

| <p>value of the discovery and warranted mitigation measures. Such preliminary field inspection may demonstrate the need for some form of additional subsurface testing (e.g., excavation by auger, shovel, or backhoe unit). The discovery or disturbance of any significant cultural resources should be reported to the California Historical Resources Information System (CHRIS). The discovery of any Native American cultural resources shall also be reported to the Native American Heritage Commission. If a significant archaeological resource is identified through this field inspection process, the City and project proponent shall seek to avoid damaging effects to the resource. Preservation is the preferred manner of mitigating impacts to an archaeological site. When in-place mitigation is determined by the City to be infeasible, a mitigation program, including measures set forth in sections 15064.4 and 15126.4 of the CEQA Guidelines, shall be implemented. Specifically, a <i>data recovery plan</i>, which makes provisions for adequate recovery of the scientifically consequential information about the site, shall be prepared prior to any additional excavation being undertaken. The plan shall be submitted to the California Historical Resources Regional Information Center (i.e., the NWIC at Sonoma State University). If Native American artifacts are indicated, the plan shall also be submitted to the Native American Heritage Commission (NHAC). Identified cultural resources should be recorded on State Department of Parks and Recreation form DPR 422 (archaeological sites). The data recovery plan should be finalized as necessary to incorporate any mitigation additions or revisions recommended by these two groups and/or required by the City. If human remains are found, special rules set forth in State Health and Safety Code section 7050.5 and <i>CEQA Guidelines</i> section 15126.4(b) shall apply.</p> |                        |                        |                              |                            |         |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                        |                        |                              | Date                       | Initial |
| <p>The identified mitigations shall be undertaken to City satisfaction, if necessary, prior to resumption of grading activities.</p> <p>A <i>data recovery plan</i> and data recovery shall not be required if the City determines that testing or studies already completed have adequately recovered the necessary data, provided that the data are available for review at the California Historical Resource Regional Information Center [CEQA Guidelines section 15126.4(b)].</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                        |                        |                              |                            |         |
| <p><b>Mitigation 12-2.</b> The Applicant shall hire a qualified archaeologist or architectural historian to conduct a historical resources survey HRS for all on site ranch structures which appear to be over 45 years old, meeting the requirements of section 50241(g) of the State Public Resources Code. Further mitigation shall not be required if the City accepts an HRS finding that none of the existing on-site ranch structures is a significant historic resource as defined in CEQA Guidelines section 15064.5(a). For any project action that may cause a substantial adverse change in one or more HRS-identified potentially significant historic resources the applicant shall incorporate measures that would seek to improve the affected historic resource in accordance with either of the following publications:</p> <ul style="list-style-type: none"> <li>• Secretary of Interior's Standards for the Treatment of Historic Properties with Guidelines for Preserving Rehabilitating Restoring and Reconstructing Historic Buildings, or</li> <li>• Secretary of Interior's Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings.</li> </ul> |                        |                        |                              |                            |         |

Table 1 (cont.): Alves Ranch 3rd Addendum to the 2004 Vista Del Mar EIR Project Mitigation Monitoring and Reporting Program

| Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Method of Verification                                                                                     | Timing of Verification               | Responsible for Verification         | Verification of Completion |         |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|--------------------------------------|--------------------------------------|----------------------------|---------|
|                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                            |                                      |                                      | Date                       | Initial |
| Noise                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                            |                                      |                                      |                            |         |
| Mitigation 14-1. Implement the following:<br><b>(a) Acoustical Study.</b> Conduct an <i>acoustical study</i> in accordance with state Title 24 requirements that identifies to City satisfaction the noise insulation and other features to be included in the design of the project residential structures in the vicinity of Highway 4 and along West Leland Road sufficient to maintain interior noise levels at or below City and State standards (45 L <sub>dn</sub> ). | Submittal of acoustical study and verification that required measures are incorporated into project plans. | Prior to issuance of building permit | City planning staff                  |                            |         |
| <b>(b) Site Design Measures.</b> Design common outdoor use areas in the residential portions of the project to maintain exterior noise levels to “normally acceptable” levels. These areas shall be situated away from predominant noise sources or should be shielded by natural or created topographical features, barriers, or the buildings themselves.                                                                                                                  | Field verification to confirm construction of required measures                                            | Prior to resident occupancy          | City building inspector              |                            |         |
| <b>(c) Noise Barrier.</b> Construct a noise barrier for residences proposed adjacent to West Leland Road. The noise barrier should extend approximately five to ten feet above the pad elevations to reduce traffic-generated noise levels to 60 dBA L <sub>dn</sub> . The barrier shall take the form of a wall, berm, and/or structures that shield the outdoor use areas of the first row of residences north and south of West Leland Road.                              |                                                                                                            |                                      |                                      |                            |         |
| Mitigation 14-3. Reduce project construction period noise impacts on nearby residences by incorporating conditions in project construction agreements that, <u>in addition to the applicable construction schedule requirements of the City of Pittsburgh General Plan</u> (limit noise-generating construction activities adjacent to existing developments to normal                                                                                                       | Field verification to ensure that measures are being implemented                                           | During construction                  | City Grading and Building Inspectors |                            |         |

Table 1 (cont.): Alves Ranch 3rd Addendum to the 2004 Vista Del Mar EIR Project Mitigation Monitoring and Reporting Program

| Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | Method of Verification | Timing of Verification | Responsible for Verification | Verification of Completion |         |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                        |                        |                              | Date                       | Initial |
| <p>business hours between 8:00 AM and 5:00 PM), and the City's Standard Conditions of Approval regarding construction logistics, stipulate the following conventional construction period noise abatement measures:</p> <ul style="list-style-type: none"> <li>• <b>Construction Equipment Mufflers and Maintenance.</b> Properly muffle and maintain all construction equipment powered by internal combustion engines.</li> <li>• <b>Idling Prohibitions.</b> Prohibit unnecessary idling of internal combustion engines.</li> <li>• <b>Equipment Location and Shielding.</b> Locate all stationary noise-generating construction equipment such as air compressors as far as practical from the existing nearby school and residences.</li> <li>• <b>Quiet Equipment Selection.</b> Select quiet construction equipment, particularly air compressors, whenever possible. (Fit motorized equipment with proper mufflers in good working order.)</li> <li>• <b>Noise Disturbance Coordinator.</b> Designate a "noise disturbance coordinator" (e.g., a City staff member) who would be responsible for responding to any local complaints about construction noise. The disturbance coordinator would determine the cause of the noise complaint (e.g., starting too early, bad muffler, etc.) and institute reasonable measures warranted to correct the problem. Conspicuously post a telephone number for the disturbance coordinator at the construction site.</li> <li>• <b>Truck Routes.</b> Route all construction traffic to and from the project site via designated truck routes where practical. Prohibit construction-related heavy truck traffic in residential areas where feasible.</li> </ul> |                        |                        |                              |                            |         |

Table 1 (cont.): Alves Ranch 3rd Addendum to the 2004 Vista Del Mar EIR Project Mitigation Monitoring and Reporting Program

| Mitigation Measures                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | Method of Verification                                           | Timing of Verification | Responsible for Verification        | Verification of Completion |         |

**Exhibit B of Resolution No. 10102  
Planned Development (PD) Plan**

---

**Land Use Regulations**

- A. The land uses allowed within Lots 1-346 as shown on Vesting Tentative Map (VTM) 9235 shall be the same as those allowed in the RS-4 (Single-Family Residential) District (Pittsburg Municipal Code [PMC] Chapter 18.50).
- B. The land uses allowed on Lots A-Q (with the exception of 'Lot H' and 'Lot M') as shown on VTM 9235 shall be limited to those uses identified on VTM 9235 and the approved project plans. All parcels identified as either 'Streets' or 'Alleys' on VTM 9235 shall be limited to use as a public or private street, alley, or driveway, as defined within the PMC.
- C. The land uses allowed within the area identified as 'Lot H' and 'Lot M' on VTM 9235 shall be as follows:

P = Permitted  
U = Use Permit, Planning Commission  
T = Temporary Activity Permit  
L = Limited (See Additional Use Regulations)  
Z = Use Permit, Zoning Administrator  
– = Not Permitted

| Residential                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**Exhibit B of Resolution No. 10102  
Planned Development (PD) Plan**

---

**Development Regulations.**

- A. Except as indicated below or expressly indicated within the approved development plan, all development regulations of the residential portions of the PD District shall be the same as those of the RM (Medium Density Residential) District. Use and development of the property shall also comply with Article 3 (Performance Standards) and Article 5 (Home Occupations) of PMC Chapter 18.50, and with the off-street parking requirements of PMC Chapter 18.78. The development regulations below shall not apply to non-residential parcels.

| <b>Residential Neighborhood A-1 and A-2 (Duets)</b>     |                               |
|---------------------------------------------------------|-------------------------------|
| Minimum Lot Area                                        | 1,600 square feet             |
| Minimum Lot Width                                       | 27 feet                       |
| Minimum Front Yard Setback (fronting private "street")* | 10 feet                       |
| Minimum Front Yard Porch Setback*                       | 6 feet                        |
| Minimum Front Building-to-Building Separation (Paseo)   | 15 feet                       |
| Minimum Side Yard Setback (unattached side)             | 5 feet                        |
| Minimum Corner Side Yard Setback                        | 8 feet                        |
| Minimum Rear Yard Setback (at garage elevation)         | 4 feet                        |
| Maximum Lot Coverage                                    | Per approved development plan |
| Maximum Building Height                                 | 30 feet                       |
| Minimum Private Storage Area                            | --                            |
| Minimum Private Open Space                              | ----                          |

\* Front yard setbacks shall be measured from the lot line directly adjacent to the main entry of the primary dwelling unit. Permitted building projections into yards pursuant to PMC section 18.80.010.

| <b>Residential Neighborhood C (Single Family)</b>       |                               |
|---------------------------------------------------------|-------------------------------|
| Minimum Lot Area                                        | 2,000 square feet             |
| Minimum Lot Width                                       | 30 feet                       |
| Minimum Front Yard Setback (fronting private "street")* | 10 feet                       |
| Minimum Front Yard Porch Setback*                       | 6 feet                        |
| Minimum Front Building-to-Building Separation (Paseo)   | 20 feet                       |
| Minimum Side Yard Setback                               | 4 feet                        |
| Minimum Corner Side Yard Setback                        | 8 feet                        |
| Minimum Corner Street Return Setback                    | 4 feet                        |
| Minimum Rear Yard Setback (at garage elevation)         | 4 feet                        |
| Maximum Lot Coverage                                    | Per approved development plan |
| Maximum Building Height                                 | 30 feet                       |

\* Front yard setbacks shall be measured from the lot line directly adjacent to the main entry of the primary dwelling unit. Permitted building projections into yards pursuant to PMC section 18.80.010.

**Planned Development (PD) Plan**

---

|                                     |                               |
|-------------------------------------|-------------------------------|
| Minimum Lot Area                    | 2,000 square feet             |
| Minimum Lot Width                   | 30 feet                       |
| Minimum Front Yard Setback*         | 5 feet                        |
| Minimum Front Yard Porch Setback*   | 4 feet                        |
| Minimum Side Yard Setback           | 4 feet                        |
| Minimum Corner Side Yard Setback    | 5 feet                        |
| Minimum Rear Yard Setback           | 5 feet                        |
| Minimum Setback at Garage Elevation | 5 feet                        |
| Maximum Lot Coverage                | Per approved development plan |
| Maximum Building Height             | 30 feet                       |

\* Front yard setbacks shall be measured from the lot line directly adjacent to the main entry of the primary dwelling unit. Permitted building projections into yards pursuant to PMC section 18.80.010.

- B. The development regulations for the area identified as 'Lot H' and 'Lot M' as shown on VTM 9235, shall be as shown in the table below. All standards not noted below shall revert to the standards applicable to the CO (Office Commercial) District, as specified within the PMC.

|                                      |       |
|--------------------------------------|-------|
|                                      |       |
| Minimum lot area (sq. ft.)           | 5,000 |
| Minimum lot width (ft.)              | 50    |
| Minimum yards (ft.)                  |       |
| Front*                               | 20    |
| Side                                 | 5     |
| Side (adjacent to residential use)   | 10    |
| Corner Side                          | 15    |
| Rear                                 | 10    |
| Rear (adjacent to residential use)   | 10    |
| Maximum height of structure(s) (ft.) | 35    |
| Maximum lot coverage                 | 50%   |
| Maximum floor-area-ratio (FAR)       | 0.5   |
| Minimum site landscaping             | 10%   |

\* For purposes of calculating setbacks, the front lot line of "Lot H" shall be measured from the property line adjacent to West Leland Road.

---

**Exhibit C of Resolution No. 10102**  
**Conditions of Approval**

---

*General Conditions:*

1. The project shall be constructed in substantial conformity with the Vesting Tentative Map and Master Plan, date stamped July 23, 2018, except as hereinafter may be modified. Any major changes to the project plans shall be subject to review and approval by the Planning Commission at the City Planner's discretion. Minor Deviations from the approved Vesting Tentative Map and Master Plan may be approved by the City Planner. In the event there is found to be a conflict between the Vesting Tentative Map and Master Plan, final design shall be subject to review and approval by the City Planner.
2. Final plot plans shall be in substantial conformity with the approved Master Plan. Minor plot plan rearrangements may be made subject to review and approval by the Planning Division. Final plot plans shall not result in two side by side lots having the same plan, elevations, and color adjacent to each other. Developer plans reflect that there are:
  1. Three plan types, three elevation styles for each plan and 12 color schemes for Neighborhood C;
  2. Three plan types, three elevation styles for each plan and 12 color schemes for Neighborhood D1 & D2; and
  3. Two plan types, three elevation styles for each plan and 12 color schemes for Neighborhood A1 & A2.
3. The developer shall comply with all applicable requirements of Title 18, "Zoning," of the Pittsburgh Municipal Code (PMC) as applicable to the project, unless otherwise specified within the City Council Ordinance rezoning the property.
4. Prior to issuance of a building permit, the developer shall record the 2018 Amendment to the Development Agreement, which has been placed in an escrow account.
5. To the extent that the terms of any development agreement approved by the City Council are in conflict with the conditions of this Vesting Tentative Map approval, the provisions of the Development Agreement shall prevail.

*Mitigation Measures:*

6. The developer shall comply with all applicable Mitigation Measures (MM) identified within the Environmental Impact Report (EIR) certified by the City Council on October 18, 2004, and the Third Addendum to the EIR, adopted by the City Council on \_\_\_\_\_, 2018, including but not limited to the following:
  - A. In accordance with MM 5-1, in order to minimize the degree of project-specific adverse impact on the visual character and quality of the project

site, the developer shall use irregular planting on graded slopes to achieve a natural appearance.

- B. In accordance with MM 5-2, in order to minimize the degree of project-specific adverse impact on the visual character and quality of the project site, the developer shall ensure that adequate landscaping is placed along the outer edge (northern side) of the SR 4 sound wall.
- C. In accordance with MM 7-1, the developer shall contribute their fair share to the needed improvements at the Willow Pass Road/San Marco Boulevard/State Route 4 Eastbound ramps intersection, which include the following:
  - (1) Re-striping of the southbound approach to reduce the lane configuration to one through lane, which creates an opportunity for a free right-turn at the eastbound off-ramp; and
  - (2) Creation of a free right-turn lane on the eastbound off-ramp, in addition to two dedicated left-turn lanes for a total of three approach left-turn lanes on the off-ramp.
- D. In accordance with MM 7-2, the project applicant shall pay their fair share contribution towards any of these improvements deemed feasible by the City:
  - (1) Create a westbound shared through/right-turn lane on West Leland Road;
  - (2) Create a second eastbound Left-turn lane on West Leland Road;
  - (3) Create a second eastbound through lane on West Leland Road; and
  - (4) Create an exclusive eastbound right-turn lane on West Leland Road.
- E. In accordance with MM 7-3, the developer shall pay a traffic mitigation fee equal to their fair share of the improvements needed to adequately serve projected cumulative morning (AM) and evening (PM) peak hour traffic volumes at the Bailey Road/Concord Boulevard intersection in the City of Concord. These improvements include:
  - (1) Construction of exclusive right-turn and left-turn lanes and a second through lane on the northbound approach;
  - (2) Construction of two exclusive left-turn lanes on the southbound approach; and
  - (3) Construction of a third through lane on both the eastbound and westbound approaches.

This fee shall be paid prior to recordation of a project final map, in an amount determined by the City Council in cooperation with the affected jurisdiction.

- F. In accordance with MM 7-4, The project applicants shall contribute their fair share to the following needed improvements at the San Marco Boulevard/West Leland Road intersection:
  - (1) Convert the northbound shared through/right turn lane to an exclusive right turn lane; and
  - (2) Convert one of the northbound left-turn lanes to a northbound through lane.
- G. In accordance with MM 7-5, the developer shall contribute their fair-share to needed improvements at the Willow Pass Road/Avila Road intersection with two left-turn lanes and a right-turn lane on the westbound Avila Road approach, two left-turn lanes and a through lane on the southbound Willow Pass Road approach, and one right-turn lanes and one through lane on the northbound Willow Pass Road approach.
- H. In accordance with MM 7-6, the developer shall pay a traffic mitigation fee equal to their fair share of the improvements needed to adequately serve projected cumulative morning (AM) and evening (PM) peak hour traffic volumes at the Bailey Road/Myrtle Drive intersection in Contra Costa County and the City of Concord. These improvements include:
  - (1) Installation of a traffic signal;
  - (2) Provision of a left-turn lane on the southbound Bailey Road approach; and
  - (3) Widening of the westbound Myrtle Drive approach to provide an exclusive left-turn lane.
- I. In accordance with MM 7-7, the project developers shall contribute their fair share to all applicable development impact fee programs including the East County Regional Impact Fee, which is designed to fund improvements to regional facilities including SR 4.
- J. In accordance with MM 8-3, the developer shall: (1) comply with applicable per-unit conveyance system fees levied by DDSD and (2) demonstrate to the satisfaction of the DDSD and the City Engineer that DDSD sewage treatment capacity will be adequate to serve the development. This requirement shall be met through preparation of a sewage treatment adequacy evaluation in coordination with and to the satisfaction of the City Engineer. No project development requiring sewage treatment service beyond the 1218-ERU total anticipated by the DDSD shall be allowed until adequate sewage treatment capacity is demonstrated as required by this mitigation measure.

- K. In accordance with MM 8-8, the developer shall comply with the park dedication requirements of chapter 17.32 of the City's Municipal Code, or pay the requisite In Lieu Parkland dedication fee, as specified within Condition No. 46.
- L. In accordance with MM 9-2, the developer shall be responsible for design and construction of all improvements within the appropriate sections of Drainage Area 48B, Lines B and B-1 (as well as for any modifications required to also increase the volume of onsite detention storage), as may be identified by CCCFCWCD, based on their review of the hydrology report. The developer shall also pay all applicable drainage fees as determined by the CCCFCWCD. The project's Area 48B drainage fees would be used to fund construction of the proposed downstream drainage improvements. If the fees are not sufficient to cover the cost of these improvements, all additional costs would be paid by the developer, since there no alternative funding sources at this time. CCCFCWCD would repay these extra costs at such time as fees are collected on future development projects, under the terms of the Flood Control District's reimbursement policy.
- M. In accordance with MM 9-3 and National Pollution Discharge Elimination System (NPDES) regulations, the developer shall prepare a Stormwater Pollution Prevention Plan (SWPPP) consistent with State and RWQCB design standards, for implementation throughout project construction to control erosion on the project site, subject to the approval of the City Engineer.
- N. In accordance with MM 9-4 and to help reduce long-term accumulation of non-point source pollutants from the project within downstream surface water, the developer shall incorporate long-term source control and pre-discharge treatment measures into the Storm Water Pollution Prevention Plan (SWPPP) described in MM 9-3, in accordance with Municipal Regional Stormwater Permit Order No. R2-2015-0049 NPDES No. CAS612008, subject to the approval by the City Engineering Division.
- O. In accordance with MM 10-1, the project geotechnical engineer shall prepare a final design-level project geotechnical study subject to review and approval by an independent engineering geologist retained by the City at applicant expense. The review shall evaluate if the study and all of its conclusions are consistent with generally accepted geotechnical engineering practice and in agreement with the approved site development plan. Relevant provisions of the geotechnical study shall be incorporated into project grading and site preparation plans. All earthwork and site preparation shall be performed under the direct supervision of a

State-certified geotechnical engineer or to the satisfaction of the independent engineering geologist and the City Engineer.

- P. In accordance with MM 10-4, the City and/or its independent engineering geologist shall closely evaluate all project proposals for the construction of slopes, in particular cut slopes steeper than three-to-one, to prevent future slope failures that could damage existing homes/project improvements or require slope repairs at the expense of the West Pittsburg GHAD. If the stability of these proposed slopes can be independently confirmed, the developer shall implement the construction measures recommended in the project geotechnical study. If the slopes stability cannot be confirmed, the developer shall redesign the slopes to achieve a flatter more sustainable gradient.
- Q. In accordance with MM 10-6, specification for site development shall include mandatory phasing for construction of site improvements as recommended by the project geotechnical engineer if settlement monitoring indicates that long-term settlement within individual fill areas could eventually exceed allowable amounts and damage or otherwise limit the usefulness of buildings or other improvements.
- R. In accordance with MM 10-7, in addition to the observation of all cut and fill slope construction, the project geotechnical engineer shall inspect and certify that any expansive soils underlying individual building pads and all roadway subgrades have been either removed or amended in accordance with City-approved construction specifications. If expansive soils are not fully remediated on each lot and in the area of all public and private improvements at the time of site development the project geotechnical engineer shall make site-specific recommendations for grading, drainage, installation of foundation design, the addition of soil amendments and or the use of imported non-expansive fill materials as may be required to fully mitigate the effects of weak or expansive soils and prevent future damage to project improvements. Following review and approval by the City-retained independent engineering geologist and City Engineer (see Mitigation 10-1) these recommendations shall be incorporated into a report to be included with each building permit application and with the plans for all public and common-area improvements.
- S. In accordance with MM 10-8, development shall include a protocol for verifying that adequate protection has been provided for all foundations and underground utilities that could be damaged by corrosive soils. The project civil engineer shall be responsible for implementation of this protocol with final approval by the City Engineer.
- T. In accordance with MM 10-9, the developer shall prepare an erosion control plan subject to City approval and implement the plan during

construction. The plan shall provide for long-term stabilization of all exposed soils upon the completion of project development.

- U. In accordance with MM 10-10, the developer shall provide educational materials that discourage overwatering in landscaped areas shall be furnished to all future lot owners at the time of purchase and periodically thereafter, as part of an effort to control groundwater seepage.
- V. In accordance with MM 10-12, the developer shall request the project be annexed into the West Pittsburg Geologic Hazard Abatement District (GHAD) in order to adequately address the special circumstances and long-term geotechnical maintenance needs associated with development in areas of potential geologic instability. The existence of and the responsibilities attached to project inclusion in the GHAD shall be clearly disclosed to all purchasers of property within the project site. In addition, all risks and liabilities associated with the ownership of project land in the vicinity of potentially unstable slopes shall be fully explained to potential buyers at the time of purchase.
- W. In accordance with MM 11-1, the developer shall reseed cut and fill slopes or other graded/disturbed areas on the project site with a native herbaceous seed mix. No nonnative or invasive species shall be included in the mix.
- X. In accordance with MM 11-3, the City of Pittsburg shall not issue a grading permit for the project until adequate demonstration to the City that California red-legged frog issues have been resolved to the satisfaction of the U.S. Fish and Wildlife Service (USFWS). To satisfy the USFWS, the applicant will need to: (1) instruct the U.S. Army Corps of Engineers (Corps) to initiate formal consultation, pursuant to section 7 of the Federal Endangered Species Act, with the USFWS regarding the California red-legged frog; and (2) implement mitigation as necessary (see details below). A copy of a "non-jeopardy" Biological Opinion issued by the USFWS shall be submitted to the City prior to issuance of a grading permit.
- Y. In accordance with MM 11-4, the City of Pittsburg shall not issue a grading permit for the project until adequate demonstration to the City that mitigation for impacts to California tiger salamander habitat will be implemented to the satisfaction of the California Department of Fish and Wildlife (CDFW; and the USFWS since the species has recently been federally listed). To satisfy the CDFW and USFWS, the applicant will need to: (1) consult with the CDFW and the USFWS; and (2) redesign the project as much as possible to avoid aestivation and potential breeding habitat; or (3) where avoidance is not feasible, replace affected habitat in accordance with CDFW and USFWS requirements, and in accordance

with specifications discussed in Mitigation 11-1; and (4) salvage adults and/or larvae.

- Z. In accordance with MM 11-6, the applicant shall coordinate with the USFWS regarding any additional review of potential San Joaquin kit fox impacts resulting from the proposed project. Additionally, within 30 days prior to any earth-moving disturbance, a qualified kit fox biologist(s) [i.e., the biologist(s) must meet the qualifications stated in USFWS' survey protocol (USFWS 1997b)] shall conduct preconstruction den surveys on the project site. These surveys shall follow the methodology outlined in Appendix 1, Section 2, of USFWS' 1997 survey protocol. Any potential dens identified during the preconstruction surveys shall be monitored with cameras for a minimum of three nights in accordance with the survey protocol. If kit fox or kit fox sign is identified at any time during these surveys, all work shall cease and USFWS and CDFW personnel shall be contacted immediately.
- AA. In accordance with MM 11-7, the applicant shall retain a qualified biologist to conduct CDFW-protocol surveys for burrowing owl the year grading is proposed. If burrowing owls are found on the project site, the applicant shall be required to prepare a Habitat Mitigation Plan and a Mitigation Agreement for any burrowing owls identified. The City shall receive copies of the approved Mitigation Plan and Mitigation Agreement between the applicant and the CDFW prior to issuing a grading permit for the proposed project. All surveys and mitigation shall be coordinate by the applicant with CDFW. If such surveys demonstrate that burrowing owls do not occur on the project site, no further requirement for burrowing owls shall be required by the City.
- BB. In accordance with MM 11-8, the applicant shall retain a qualified raptor biologist to conduct spring nesting surveys the year grading is proposed. If nest(s) are found, the CDFG can be expected to require the following or similar protection measures:
- (1) Establishment of a fenced buffer of 1,000 feet around any survey-identified active raptor nest, or as otherwise determined by a qualified, CDFG-approved raptor biologist (see text below).
  - (2) Having a biological monitor present during all grading activity near the buffer zone; and
  - (3) Avoiding grading within the buffer zone until the raptor biologist states that the young have fledged and are flying well enough to avoid being impacted by project construction.

If such surveys demonstrate that raptor nests do not occur on the project site, no further requirements for these raptors shall be required by the City.

CC. In accordance with MM 11-9, the applicant shall retain a qualified biologist to conduct spring nesting surveys for loggerhead shrike, coordinated with the CDFG, the year grading is proposed. If nest(s) are found, the applicant shall complete the following measures:

- (1) Establish a 250-foot fenced buffer zone around each active nest location; and
- (2) Have a biological monitor present during all grading activity near the buffer zone.

If appropriately timed nesting surveys demonstrate that loggerhead shrikes do not nest on the project site, no further requirements for the bird shall be required by the City.

DD. In accordance with MM 11-10, the applicant shall retain a qualified biologist to conduct spring nesting surveys for California horned lark, coordinated with the CDFG, the year grading is proposed. If nest(s) are found, the CDFG can be expected to require the applicant to complete the following or similar measures:

- (1) Establish a 250-foot-wide fenced buffer zone around each survey-identified active nest location; and
- (2) Have a biological monitor present during all grading activity near the buffer zone.

If such surveys demonstrate that California horned larks do not nest on the project site, no further requirements for this bird shall be required by the City.

EE. In accordance with MM 12-1, a qualified archaeologist shall be retained at applicant's expense to monitor project-related on-site excavation. In the event that subsurface cultural resources are uncovered during approved ground-disturbing activities, work in the immediate vicinity shall be halted immediately and the retained archaeologist shall evaluate the finds and make a determination in regard to the cultural value of the discovery and warranted mitigation measures. Such preliminary field inspection may demonstrate the need for some form of additional subsurface testing; e.g. excavation by auger shovel or backhoe unit. The discovery or disturbance of any significant cultural resources should be reported to the California Historical Resources Information System (CHRIS). The discovery of any Native American cultural resources shall also be reported to the Native American Heritage Commission. If a significant archaeological resource is identified through this field inspection process the City and project proponent shall seek to avoid damaging effects to the resource. Preservation is the preferred manner of mitigating impacts to an

archaeological site. When in-place mitigation is determined by the City to be infeasible, a mitigation program, including measures set forth in sections 15064.4 and 15126.4 of the CEQA Guidelines shall be implemented. Specifically, a data recovery plan which makes provisions for adequate recovery of the scientifically consequential information about the site shall be prepared prior to any additional excavation being undertaken. The plan shall be submitted to the California Historical Resources Regional Information Center (i.e. the NWIC at Sonoma State University). If Native American artifacts are indicated the plan shall also be submitted to the Native American Heritage Commission (NAHC). Identified cultural resources should be recorded on State Department of Parks and Recreation form DPR 422 archaeological sites. The data recovery plan should be finalized as necessary to incorporate any mitigation additions or revisions recommended by these two groups and or required by the City. If human remains are found special rules set forth in State Health and Safety Code section 70505 and CEQA Guidelines section 15126.4(b) shall apply. The identified mitigations shall be undertaken to City satisfaction if necessary prior to resumption of grading activities. A data recovery plan and data recovery shall not be required if the City determines that testing or studies already completed have adequately recovered the necessary data provided that the data are available for review at the California Historical Resource Regional Information Center CEQA Guidelines section 15126.4(b).

FF. In accordance with MM 14-1, the developer shall:

- (a) Conduct an acoustical study in accordance with state Title 24 requirement that identified to City satisfaction the noise insulation and other features to be included in the design of the project residential structures in the vicinity of SR 4 and along West Leland Road sufficient to maintain interior noise levels at or below City and State standards (45 L<sub>dn</sub>);
- (b) Design common outdoor use areas in the residential portions of the project to maintain exterior noise levels to “normally acceptable” levels. These areas shall be situated away from predominant noise sources or should be shielded by natural or created topographical features, barriers or the buildings themselves; and
- (c) Construct a noise barrier for residences proposed adjacent to West Leland Road. The noise barrier should extend approximately five to ten feet above the pad elevations to reduce traffic-generated noise levels to 60 dBA L<sub>dn</sub>. The barrier shall take the form of a wall, berm, and/or structures that shield the outdoor use areas of the first row of residences north and south of West Leland Road.

GG. In accordance with EIR Mitigation Measure (MM) 14-3, the following conventional noise abatement measures shall be followed during all grading and construction phases:

1. *Construction Equipment Mufflers and Maintenance.* Properly muffle and maintain all construction equipment powered by internal combustion engines.
2. *Idling Prohibitions.* Prohibit unnecessary idling of internal combustion engines.
3. *Equipment Location and Shielding.* Locate all stationary noise-generating construction equipment such as air compressors as far as practical from any nearby school and residences.
4. *Quiet Equipment Selection.* Select quiet construction equipment, particularly air compressors, whenever possible. (Fit motorized equipment with proper mufflers in good working order.)
5. *Noise Disturbance Coordinator.* Designate a "noise disturbance coordinator" (e.g., a City staff member or site manager) who would be responsible for responding to any local complaints about construction noise. The disturbance coordinator would determine the cause of the noise complaint (e.g., starting too early, bad muffler, etc.) and institute reasonable measures warranted to correct the problem. Conspicuously post a telephone number for the disturbance coordinator at the construction site.
6. *Truck Routes.* Route all construction traffic to and from the project site via designated truck routes where practical. Prohibit construction-related heavy truck traffic in residential areas where feasible.

HH. In accordance with MM 15-1, the developer shall implement the following dust control measures during project construction activities:

- (a) Water all active construction areas at least twice daily and more often during windy periods. Active areas adjacent to existing land uses must be kept damp at all times or must be treated with non-toxic stabilizers or dust palliatives;
- (b) Cover all trucks hauling soil sand and other loose materials or require all trucks to maintain at least two feet of freeboard;
- (c) Pave or apply water three times daily or apply non-toxic soil stabilizers on all unpaved access roads parking areas and staging areas at construction sites;
- (d) Sweep daily (preferably with water sweepers) all paved access roads, parking areas and staging areas at construction sites;
- (e) Sweep streets daily (preferably with water sweepers) if visible soil material is carried onto adjacent public streets;
- (f) Hydroseed or apply non-toxic soil stabilizers to inactive construction areas;

- (g) Enclose, cover or water twice daily or apply non-toxic soil binders to exposed stockpiles (dirt, sand, etc.);
  - (h) Limit traffic speeds on unpaved roads to 15 miles per hour;
  - (i) Install sandbags or other erosion control measures to prevent silt runoff from grading onto adjacent roadways paths and other paved areas and in particular into nearby drainage channels;
  - (j) Replant vegetation in disturbed areas as quickly as possible;
  - (k) Install windbreaks or plant trees as vegetative wind breaks at windward side(s) of construction areas;
  - (l) Limit excavation and grading activity when winds' instantaneous gusts result in unmanageable dust; and
  - (m) Limit the area subject to excavation grading and other construction activity at any one time.
- II. In accordance with MM 15-2, the developer shall provide for strategies identified in the 2004 FEIR to reduce air emissions and encourage telecommuting, including but not limited to the following measures:
- (a) Homes shall be designed to provide facilities to allow the use of emerging electronic communication technologies;
  - (b) Use natural gas only fireplaces where fireplaces are included in the homes;
  - (c) Install outdoor electrical outlets or outlets within the garage to promote the use of electric lawn and landscaping maintenance equipment;
  - (d) Include restrictions in the CC&Rs to allow only natural gas or propane barbeques; and
  - (e) As feasible, require use of electrical or alternatively fueled equipment for maintenance.

Site Access and Circulation Assessment Recommendations:

7. In accordance with Recommendation 3, prior to approval of the final map, the developer shall submit a final refuse pickup plan to be reviewed by the City and refuse collection company, which shall include, at a minimum:
- 1. A map showing the general location where all trash bins shall be placed on pickup days, in substantial conformance with the draft refuse plan maps dated June 1, 2018;
  - 2. a copy of a disclosure to all residents detailing the trash pickup plan and homeowner responsibilities;
  - 3. a copy of language to be recorded within the Conditions, Covenants and Restrictions (CCRs) detailing the refuse plan requirements and homeowner responsibilities;

4. a striping plan identifying how curbs will be marked to identify trash receptacle placement areas; and
  5. any other materials deemed necessary by the City Engineer.
8. In accordance with Recommendation 4, the developer shall install signage and barricades prohibiting pedestrian crossing movements of West Leland Road at the intersection of the new project roadway and Tomales Bay Drive on both the east and west legs of the intersection. The final design and location of the signage and barricades shall be subject to review and approval by the City Engineer.
9. In accordance with Recommendation 6, the developer shall provide information on public transit opportunities to prospective and new residents to encourage transit use to and from the site.
10. In accordance with Recommendation 7, the developer shall include within the CC&Rs language requiring garages be reserved for vehicle storage.

Design Review:

11. The proposed dog park on Lot K shall be modified to allow for a 12-foot wide Class I trail starting from the eastern terminus of Street B to the eastern edge of the project area. The easement shall be improved to provide a 12-foot wide Class I trail.
12. The proposed Class I trail on either side of Lot H shall be continued across Lot H with a temporary 8-foot wide asphalt concrete pedestrian path to allow for a connection between Neighborhoods "C" and "D." A permanent trail connection may be conditioned upon the future commercial development.
13. Decorative crosswalks shall be installed at the following locations:
  1. Across Street A, immediately north of West Leland Road;
  2. Across Street A, immediately south of Street B
  3. Across Street B, to the west and east of Street A; and
  4. Across Street E, immediately north of West Leland Road.

Crosswalks described above shall be maintained by the City. Final design and locations of the decorative sidewalk shall be subject to approval by the City Planner and City Engineer.

14. Developer shall provide a "cool roof" on each residential building for reduction of heat island effect or installation of solar photovoltaic panels in conjunction with other Title 24 energy components to meet current code.

15. Developer shall install prewiring for electric vehicle (EV) charging within each residential unit's garage.
16. If solar photovoltaic panels are not installed on a house, the developer shall install pre-wiring for photovoltaic (solar) panels within the residential unit. The construction drawings for each plan shall include appropriate electrical and roof framing details as necessary to reflect the option for pre-wiring the houses for roof-mounted photovoltaic panels. The developer shall maintain and make available to all potential buyers, in each sales office, a brochure or list of vendors and installers of solar panels for residential use. A copy of the vendor list/brochure shall be provided to the Planning Division, prior to issuance of the first building permit for construction of a single-family residence.
17. The developer shall provide estimated water use calculations with the Final Landscape Plans to show compliance with the City's water efficient landscape ordinance.
18. Prior to occupancy of the residential units by residents, the developer shall complete installation of landscaping and automatic irrigation systems in street landscape areas and all front, side and rear yards that are to be maintained by the project Home Owners Association (HOA), in accordance with Article VII (Landscaping, Irrigation and Hydroseeding) of PMC Chapter 18.84, or other applicable water efficient landscape ordinance, subject to approval by the Community Development Department. The developer shall provide the irrigation system controller map, programming table, and annual maintenance schedules to the HOA. If required landscaping is not completed prior to final inspection and occupancy, the developer shall post a bond to assure that the work is completed and turned over to the HOA to the satisfaction of the City.
19. The developer shall include in the project Conditions, Covenants, and Restrictions (CC&Rs) and homebuyer disclosures information about integrated pest management and the principles of water-efficient landscapes, including but not limited to those principles that are described in PMC chapter 18.84, article VII.
20. Prior to issuance of a building permit, the developer shall provide a photometric plan to identify the appropriate street light spacing. In general, the lighting requirements used shall be as described in the Illuminating Engineering Society of North America (IESNA) standards. With the exception of Streets "A" and "B," the developer may opt to utilize lighting mounted to exterior house walls to provide street/alley and pathway lighting upon approval by the City Engineer. All light fixtures intended to provide lighting for streets/alleys and pathways shall be placed on a timer and shall automatically turn on at dusk and stay on until sunrise. The final design and location of the lighting fixtures shall be subject to approval by the Planning and Engineering Divisions.

21. The developer shall enter into an affordable housing agreement, subject to City Council approval, prior to the approval of a final map. The agreement shall comply with all applicable sections of the Vista Del Mar Development Agreement, previously adopted by the City Council through Ordinance No. 04-1231 and/or as amended in subsequent Development Agreements.
22. The developer shall provide a seating area between the basketball and bocce courts. The seating area shall include a charcoal bbq and shall be covered by a pergola or other cover. The developer shall also install a water fountain and trash and recycling bins. The final design and locations are subject to review and approval by the Planning Division prior to installation.
23. The mid-block bulb-out projecting into Street A shall be removed.
24. The developer shall install a landscape visual barrier to the future commercial development along the east side of Lot C. Landscape material shall include plants with a mature height of a minimum of six feet. The final design and location of the landscaping shall be subject to approval by the Planning Division.
25. Lot C shall reserve for a future walkway connection to the commercial site, to be determined with the commercial site development application, to provide for a pedestrian connection between Neighborhood D1 & D2 and the commercial site.
26. All side yard fencing along property lines adjacent to Streets E, F, G, and H within Neighborhood D shall not extend beyond 5 feet from the side of the building.
27. Roof vents shall be painted the same color as roofing material to which they are adjacent. Downspouts, side vents, attached utility boxes, and hose bibs shall be painted the same color or colors as the surface or surfaces to which they are adjacent.
28. All garage doors within residential neighborhoods shall be equipped with automatic openers.
29. For residential units exposed to exterior decibel levels of 60 dB or higher, as shown on the noise contour map in Appendix F of the EIR Addendum, all exposed windows shall be acoustically strengthened to reduce interior noise levels to a maximum of 45 decibels.
30. In addition to the areas shown on the proposed vesting tentative map and master plan, and as required in accordance with MM 14-1, the developer shall install a masonry wall or wood fencing in the following locations:
  1. Six-foot high wood fencing along the eastern boundary of Lots 66, 68, 70, 72, 74, and 76;

2. Minimum six-foot high masonry wall along the eastern boundary of Lots 325, 330, 335, 340, and 346; and
  3. Minimum 4-foot-high protective fencing, where there is no other fencing or wall, along the top of the slope of the stormwater basin on Parcel J and Parcel L.
31. The final design and colors of all masonry sound walls fronting West Leland Road shall be a Proto II or equal, split face block wall system in a tan color with a decorative wall cap and pilasters placed a maximum interval of 25 feet, similar to the existing wall design and color on the south side of the street. All masonry walls constructed as a part of this development shall be maintained by the applicable Homeowners' Association. The final design of the all masonry sounds walls shall be reviewed and approved by the Planning Division prior to issuance of a building permit.
32. Signage for the commercial site is not approved at this time. No signs shall be installed on-site until plans have been reviewed and approved by the City under a separate sign permit application.
33. The applicant shall install minimum four-inch-high, die cut, block style numbers on all residential units for address identification. The numbers shall be in a color that is contrasting to the background surface to which they are attached. Units in Neighborhoods A-1, A-2, and C shall be installed within 10 feet of each unit's main entry door and may also be installed on facades with garage doors, if different. Units in Neighborhood D shall be installed within 10 feet of each unit's entry door.
34. All air conditioning units, transformer boxes, and utility meters placed above-ground shall be substantially screened from public view by way of unit location, permanent wood screening fences, or landscape planting.
35. The developer shall install two wall-mounted bicycle racks within each garage.
36. All garages shall provide for a minimum of two 10-foot by 20-foot parking spaces. Garages for units within neighborhoods A-1 and A-2 shall provide eight (8) square feet for trash bin storage.
37. In order to ensure the perpetual maintenance of landscape improvements along West Leland Road, landscape, trail and perimeter wall maintenance within parcels D, E, F, G and lot P shall be performed by the Homeowner's Association. In addition, the developer shall enter into an Operations and Maintenance Agreement with the City for the landscaping and irrigation improvements. This agreement shall run with the land and allow the City to access and maintain these areas if the City deems the landscaping and /or irrigation improvements are not maintained appropriately. The agreement shall specify that the cost of any required maintenance performed by the City shall be solely borne by the

Homeowners' Association and shall be executed prior to issuance of a building permit.

Engineering Fees and Deposits:

38. Major Subdivision Map Processing Fee. The developer shall pay the fee according to the following amounts as applicable to the project:

| <u>1<sup>st</sup> - 3<sup>rd</sup> Final Map Check</u> |         | <u>4<sup>th</sup> Final Map Check</u>      |
|--------------------------------------------------------|---------|--------------------------------------------|
| 5-50 lots                                              | \$2,300 | \$2,300 + \$800/ea. additional map check   |
| 51-150 lots                                            | \$3,000 | \$3,000 + \$1,500/ea. additional map check |
| 151 or more                                            | \$3,365 | \$3,365 + \$1,330/ea. additional map check |

This fee shall be paid in full to the Engineering Division prior to the City Council's approval of the Final Map.

39. Improvement Plan Review Fee. The Plan Review Fee is based on the engineer's estimate, which shall be included with the first set of plans submitted for review. The current Improvement Plan Review Fee is 3.5% of the engineer's cost estimate for improvements.
40. Improvement Plan Review Deposit. The developer shall provide a deposit of 50% of the total Improvement Plan Review Fee with the initial submittal of improvement plans. This initial deposit will also be applied towards the total fees due for the project. The remaining balance of Improvement Plan Review fees shall be due payable prior to the issuance of an Engineering Site Development Permit.
41. Improvement Inspection Fee. The developer shall pay an Improvement Inspection Fee according to the following rates as applicable to the project:

| <u>Percent of engineer's estimate</u> | <u>Total estimated costs</u> |
|---------------------------------------|------------------------------|
| 6.5%                                  | ≥ \$500,000                  |
| 4%                                    | \$500,001 - \$5 million      |
| 3.6%                                  | < \$5 million                |

The improvement Inspection fee shall be due payable prior to the issuance of an Engineering Site Development Permit.

42. Grading Plan Review Fee. The Grading Plan Review Fee is based on the engineer's estimate for the cost of grading, or if cubic yard quantities are available, per the Grading Fee Table approved by City Council. The current Grading Plan Review Fee is 2.5% of the engineer's estimate for the cost of grading.

43. Grading Plan Review Deposit. The developer shall provide a deposit of 50% of the total Grading Plan Review Fee with the initial submittal of grading plans. This initial deposit will also be applied towards the total fees due for the project. The remaining balance of Grading Plan Review Fees are due payable prior to the issuance of the Grading Permit.
44. Grading Inspection Fee. The Grading Inspection Fee is based on the engineer's estimate for the cost of grading, or if cubic yard quantities are available, per the Grading Fee Table approved by City Council. The current Grading Inspection Fee is 3% of the engineer's estimate for the cost of grading. The fee shall be due payable prior to the issuance of a Grading Permit.
45. In Lieu Parkland Dedication Fee. The developer shall pay an In-Lieu Parkland Dedication Fee equivalent to providing 5 acres of park area per one thousand persons residing within the new development and shall be based on the fair market value of developed parkland, or as established with separate agreement as approved by the City Engineer.
46. Facility Reserve Charge. The applicant shall pay the City of Pittsburgh Facilities Reserve Charge (PMC Chapters 13.08, 13.12 and 13.24) (the "FRC") to the Engineering Department, for water and sewer service in the amounts in effect when the applicant obtains a Building Permit. The applicant understands that the current FRC on file effective August 20, 2005, shall be paid in accordance with the fee schedule approved by Resolution No. 05-10290, and amended by Resolution No. 12-11778 on February 21, 2012, a copy of which is available at the City.
47. Local Traffic Mitigation Fee. The developer shall pay the Local Traffic Mitigation Fee in accordance with PMC Chapter 15.90 to the Engineering Department prior to issuance of a building permit. The developer understands that the LTMF is reviewed and adjusted annually to the current Construction Cost Index (CCI) and may be increased at the City Council's discretion based on revised cost estimates for roadway and transit facilities and other factors that demonstrate an increase is needed to offset traffic impacts caused by new development.
48. Regional Transportation Development Impact Fee. The Developer shall pay the Regional Transportation Development Impact (RTDIM) Fee in accordance with PMC Chapter 15.103 to the Engineering Department prior to issuance of a building permit. The RTDIM will be automatically increased or decreased on January 1 of each year based on the percent change in the Engineering News-Record Construction Costs Index – San Francisco Bay Area between September 1 and September 1 of the preceding two calendar years.
49. Final Map Deposit. The developer shall provide a deposit of \$500 prior to City Council's approval of the final map. The deposit shall be returned to developer once the City is in receipt of a full-size vellum copy of the recorded final map.

50. Record Drawing Deposit. The developer shall provide a \$500 deposit prior to City Council's approval of the final map. The deposit shall be returned to developer once the City is in receipt of the Record Drawing AutoCAD and PDF file, and full sized vellum copy of Improvement Plans, that were signed by the City Engineer prior to Engineering Site Development Permit issuance.
51. Sanitary Sewer Inspection Deposit. The developer shall provide a sanitary sewer inspection deposit prior to the issuance of the Engineering Site Development Permit issuance. The current deposit amount is \$1,000 for the first 1,000 linear feet of sewer main plus \$1.10/linear foot of additional sewer pipe.
52. Storm Drain Inspection Deposit. The developer shall provide a storm drain inspection deposit prior to the issuance of the Engineering Site Development Permit issuance. The current deposit amount is \$1,000 for the first 1,000 linear feet of storm drain main plus \$1.10/linear foot of additional storm drain pipe.
53. Geographical Information System Fee. The current Geographical Information System (GIS) Fee is \$0.05/sf of building for non-residential projects, and \$100/dwelling unit for all residential projects. The GIS fee is due payable prior to the issuance of an Engineering Site Development Permit.
54. NPDES Plan Review Fee. The developer shall pay an NPDES plan review fee for review of stormwater control plans and processing of closeout agreements and / or review of Storm Water Pollution Prevention Plans (SWPPP). The current fee is:
  - \$3,000 for the first 10,000 sf up to 1st acre (projects with Risk Factor 1)
  - Add additional \$136/acre for projects greater than 1 acre, up to the first 5 acres (projects with Risk Factors 2 or 3)
  - Add additional \$31/acre for projects greater than 5 acres
55. NPDES Site Inspection Deposit. The developer shall pay an NPDES inspection deposit for City staff's inspection of C.3 compliant facilities constructed, and /or inspection of construction site for compliance with Best Management Practices in accordance with the City's Municipal Regional Stormwater NPDES Permit. The current rate is:
  - \$12,000 for the first 10,000 sf up to 1st acre ( projects with Risk Factor 1)
  - \$24,000 for projects greater than 1 acre (projects with Risk Factor 2 or 3)

This deposit shall remain in place for the duration of the first year of the project. If the project is completed prior to the project's anniversary, the remaining balance of the deposit will be returned to the developer.

56. Supplemental Studies. If additional engineering studies are deemed necessary by the City Engineer, i.e. geotechnical, structural, hydraulic, etc., or expedited reviews are requested by the developer, the developer shall pay for all costs related to the extra work. The costs may include the preparation of special studies, additional staff time, and/or reviews of the special studies if studies are prepared by the developer's engineer.

Submittals to the Engineering Division:

57. Final Map. The developer shall submit three (3), full size, hard copies of the Final Map with closure calculations, prior to City Council's approval of each final map, improvement, or grading plans.
58. Improvement Plans. The developer shall submit seven (7) full size, hard copies of Improvement Plans. The Improvement Plans shall include, but not be limited to, the following:
- Site Plan
  - Grading and Drainage Plan
  - Utilities Plan which identifies ownership and maintenance responsibilities of both wet and dry utilities;
  - Landscaping and Irrigation Plan
  - Joint Trench Plan
  - Offsite Improvements Due to Project Impacts
59. All CCRs recorded as part of the project shall identify the long-term maintenance responsibilities of the City and the Homeowners' Association, as shown in the Improvement Plans.
60. The developer shall submit two (2) copies of the Storm Water Pollution Prevention Plan (SWPPP) to the Engineering Department for review and comment prior to the issuance of a Grading Permit. The SWPPP shall identify Best Management Practices (BMPs) appropriate to the uses conducted on-site to effectively prohibit the entry of pollutants into storm water runoff. The SWPPP measures shall also include erosion control measures to prevent soil, dirt, and debris from entering the storm drain system. The developer shall provide the project WDID number as evidence of having obtained a construction permit from the Regional Water Quality Control Board. If a WDID number has not yet been issued, a copy of the Notice of Intent that was sent to the Regional Water Quality Control Board shall be submitted with the grading permit application.
61. The developer shall submit three (3) complete sets of plans and specifications of the project, including any of the following required built-in fire protection systems, to the Fire District for review and approval prior to construction to ensure compliance with minimum requirements related to fire and life safety. Plan review fees for the Fire District will be assessed at that time.

- a. Private underground service water mains
  - b. Building construction plans
  - c. Fire Sprinklers
  - d. Site improvement Plans
62. The developer shall submit a current geotechnical report to the Engineering Department prior to approval of any civil plans and issuance of an engineering permit.
63. The developer shall submit a complete area study specific to the Alves ranch project site only, for storm water (10-year storm design) capabilities, prior to the approval of the final map, and mitigate additional storm runoff demands anticipated under build out conditions. The study shall include a review of the impact of the site grading on the 10-year flood level in accordance with the Federal Emergency Management Agency (FEMA) guidelines. If additional mitigation measures are required then the study and measures shall be submitted to the City Council for its review and approval.
64. The developer shall submit grading and improvement plans to retrofit the existing detention basin, to accommodate stormwater runoff from the residential improvements of the Alves Ranch project and the Vista Del Mar subdivisions. These revisions are required to enable the detention basin to function both as a Stormwater Treatment, and Stormwater Detention Facility to meet the criteria for both provision C.3 of the Clean Water Program's Regional Permit, and Flood Control criteria, respectively. Improvement plans detailing modifications to the outlet and dewatering structures are to be submitted to the City and County Flood Control District for review and approval by the City prior to the issuance of any grading permits for the project. In addition, all such improvements to the basin must include adequate access for maintenance vehicles and equipment.
65. Prior to the City's acceptance of the Detention Basin, the developer shall submit an Operations and Maintenance Control Plan (O&M Plan) for the maintenance of the basin by the GHAD. Proper maintenance of the basin is essential for maintaining the functionality of the basin. The O&M Plan shall address maintenance of the spillway and standpipe and provide recommended intervals for silt removal. Developer understands that acceptance of the detention basin by the GHAD shall occur when all streets within the development are completed, and Street A has been accepted for continuous maintenance by the City.
66. Developer understands that all streets within the project, with the exception of Street A will be privately maintained by the HOA. However, upon City Council's acceptance of the public improvements for continuous maintenance, the Pittsburg Police Department is authorized to enforce all provisions of the State Vehicle Code on all private streets of the Alves Ranch Development. Enforcement of the Vehicle Code shall consist of but not be limited to enforcement of the following: Speed Limits, Off Street Parking, and Vehicle

Codes on the common private streets within the subdivision. Developer further understands all appropriate signage and striping are to be installed and completed prior to commencement of enforcement by the Pittsburg Police Department.

67. Developer understands that the establishment of a perpetual conservation easement, specifying management of the land to be for "Waters of the United States" and state California red-legged frog, and California tiger salamander values, is yet to be completed. This conservation easement was a mitigation measure to address the impacted wetland areas, of the previously approved overall project site. Recordation of this conservation easement shall occur prior to the recordation of the last final map for the residential subdivision, as outlined in the Development Agreement between The City of Pittsburg, Alves Ranch LLC, and William Lyon Homes, section 3.06a.
68. Annexation Documentation for CFD 2005-1. Community Facilities District 2005-1 is for Public Safety Services, the fee will provide funding for an increase of police coverage in the area. The rate of the CFD 2005-1 fee is subject to City Council Resolution No. 05-10342. The developer shall deliver written approval in a manner acceptable to the City Finance Director, that the owner of the parcel is electing to annex the subject property into the 2005-1 Community Facilities District (CFD 2005-1) for Public Safety Services, prior to the recordation of the first Final Map.
69. Annexation Documentation for CFD 2007-1. Community Facilities District 2007-1 is for Park Maintenance. The rate of the CFD 2007-1 fee is subject to City Council Resolution No. 07-10698. The developer shall deliver written approval in a manner acceptable to the City Finance Director, that the owner of the parcel is electing to annex the subject property into the 2007-01 Park Maintenance Community Facilities District (CFD 2007-1), prior to the recordation of the first Final Map.
70. Annexation Documentation for CFD 2017-1. Community Facilities District 2017-1 is for Fire Facilities and Fire Safety and Emergency Services. The rate of the CFD 2017-1 fee is subject to City Council Resolution No. 17-13311. The developer shall deliver written approval in a manner acceptable to the Community Development Director, that the owner of the parcel is electing to annex the subject property into the 21017-1 Fire Facilities and Fire Safety and Emergency Services Community Facilities District (CFD 2017-1), prior to the issuance of any building or engineering permits.
71. Street A shall be designed to meet City Standard Specifications within the 78-foot street right-of-way. Final design of Street A shall be subject to review and approval by the City Engineer.
72. Grading and/or building permit plans (including structural, mechanical, architectural, grading, drainage, site, landscape, and other drawings) shall show the details and methods of construction for site design features, measures to limit

directly connected impervious area, pervious pavements, self-retaining areas, treatment BMPs, permanent stormwater control BMPs, and other features that control stormwater flow and potential for stormwater pollutants.

73. The developer shall evaluate the existing, receiving storm, sewer, and water facilities for adequate capacity and provide the results to the City to identify any service or supply problems. The cost for installation of additional facilities or retrofit of existing facilities shall be borne by the developer.
74. The developer shall provide appropriate sanitary sewer, sized to adequately accommodate the project's wastewater demand.
75. The developer shall underground all new utility distribution facilities fronting the property. The location of all existing above ground utility distribution facilities to remain as-is and will be screened, to the best of the developer's ability, by landscape plantings.
76. The developer shall install all utility boxes underground and all wires and cables must be installed in conduits. Compliance with this condition shall be at the discretion of the City Engineer.
77. The developer shall incorporate and/ or adhere to all applicable provisions of the Development Agreement, between the City, Alves Ranch, LLC, and William Lyon Homes, recorded February 25, 2005, and subsequent amendments to the Development Agreement between the City of Pittsburg, Alves Ranch LLC, and William Lyon Homes. Provisions of this agreement shall be reviewed prior to the approval any final map. The City reserves the right to require the applicant to perform any of the applicant's obligations under the development agreement before recordation of the final map to the extent deemed necessary by the City Engineer.
78. The developer shall ensure that proposed revisions to the basin to the basin are in conformance with prior acceptance by the Division of Safety of Dams (DSOD). If changes to the basin are proposed, by the developer, these changes shall be subject to review and approval by the City Engineer.
79. The Developer shall submit to the Flood Control District for review a drainage study, with an updated hydrology map, that analyzes the feasibility of increasing the onsite basin's water treatment volumes and the impacts these proposed modifications will have on the basin's Flood Control storage capacity. Developer to obtain approval by the City for these improvements prior to the issuance of a Grading Permit.
80. The Developer shall pay all fees associated with Drainage Area 48B (DA 48B) to the Flood Control District prior to issuance of the first final map. The Flood Control District entered into a reimbursement Agreement (dated September 27,

2011) with the Vista Del Mar Developer, William Lyon Homes, for the construction of planned drainage lines "B" and "B-1" in DA 48B. Per the Reimbursement Agreement, the Alves ranch Development was afforded a credit of \$449,231 in DA 48B fees for construction of certain planned drainage facilities. Per the Agreement, "In the event there are changes in the land use, density, or impervious surfaces on the Alves property, Alves or its successor(s) in interest shall be responsible for paying the Flood Control District additional drainage fees based on the drainage fee ordinance applicable at that time." Should changes to the original site plan incur additional DA 48B fees, they are due payable to the Flood Control District prior to recordation of the first final map.

81. The developer shall maintain a minimum of fifteen (15') feet setback from top of detention basin, as recommended in Feb. 2008 - Preliminary Geotechnical Investigation prepared by BGC, or any design exception recommendations specifically noted by Geotechnical engineer in a supplemental report and approved by City Engineer.
82. The developer shall preserve the existing maintenance access road to the detention basin & overflow structure and provide an access point to the road. The final design of this access point shall be reviewed and approved by the City Engineer.
83. The developer shall provide a eight- foot (8') temporary asphalt concrete pathway fronting Lot H, the future commercial development. A permanent pathway may be conditioned to be constructed as part of the approvals for the commercial development.
84. The developer shall relinquish the abutter's rights for all corner lots.
85. The developer shall provide 6-foot wide sidewalks throughout the subdivision.
86. The developer shall construct walls made from concrete block, gravity concrete, or similar material when walls are required between lots.
87. The developer shall provide a safe release of drainage from sump areas, without conveying water over private property, allowing water to drain without damaging private or public improvements in the event of blockage to the storm drain system.
88. The developer shall provide a water sampling station as directed by the City Public Works Department.
89. The developer shall provide an adequate and reliable water supply for fire protection with a minimum fire flow of 2,000 gallons per minute (GPM). Required flow shall be delivered from not more than two hydrants flowing simultaneously

for the duration of 120 minutes while maintaining 20 pounds residual pressure in the main.

90. The developer shall install fire hydrants of the East Bay type. Hydrant locations shall be determined by the Contra Costa Fire Protection District upon submittal of three (3) copies of complete site improvement plans or utility plans. Hydrants shall be installed, in service, and inspected by the Fire District prior to construction.
91. The developer shall submit three (3) copies of a 300-foot scale parcel map indicating approved fire hydrant locations, street names, and addresses to the Fire District for mapping purposes. These maps are required prior to Fire District approval of final improvement plans.
92. The developer shall create and dedicate utility parcels to the City or provide adequate utility easement areas for City's maintenance and access.
93. The developer shall provide estimated water use calculations to show compliance with the City's water efficient landscape ordinance.
94. The developer shall provide two points of access to the satisfaction of the Contra Costa County Fire Protection District (CCCYPD) prior to issuance of the first building permit for any unit east of Street "A".
95. The developer shall paint all red curbs red where no parking stalls are shown, and "Fire Lane" markings shall be painted where appropriate.
96. The developer shall provide traffic signal pre-emption systems (Opticom) on any new or modified traffic signals installed in conjunction with this development.
97. The developer shall provide a Central Irrigation System, for portions of the site landscaping to be maintained by the City, that is compatible with Rainmaster DX 2 Evolution, with a remote controller included with the package. The installation of this system shall be certified by a John Deere Landscapes United Greentech representative prior to the City's acceptance of the installation.
98. The developer shall design the landscaping within the areas of public right of way in accordance with the provisions of Section 18.84.320 of the Pittsburg Municipal Code, and current standard details.
99. The developer shall incorporate long-term best management practices (BMP's) for the reduction or elimination of storm water pollutants. The project design shall incorporate wherever feasible, the following long-term BMP's in accordance with the Contra Costa Clean Water Program for the site's storm water drainage:

- Use pavers for walkways and other appropriate hardscape surfaces as an option to buyers to minimize impervious areas.
- Minimize the amount of directly connected impervious surface area.
- Delineate all storm drains with “No Dumping, Drains to Delta” permanent markings
- Construct concrete driveway weakened plane joints at angles to assist in directing run-off to landscaped/pervious areas prior to entering the street curb and gutter.
- Distribute public information items regarding proper use of pesticides to buyers.

*Standard Conditions:*

100. The Standards Conditions of Development as adopted by the Pittsburg Planning Commission by Resolution No. 8931 shall apply as conditions of approval of this project, as determined applicable by the Planning Division. Where there is a conflict between Resolution No. 8931 and the specific conditions identified in this resolution, the specific conditions of this resolution shall govern.
101. All site development shall comply with Title 12 (Streets, Sidewalks, and Utilities), Title 13 (Water and Sewers), and Title 15 (Buildings and Construction) of the Pittsburg Municipal Code as determined by the City Engineer. Issuance of a site development permit will be required whereby specific engineering requirements will be made as conditions of approval.
102. The design and construction of storm drain, water, and sewer facilities shall be in accordance with Section 17.28.020 of the Pittsburg Municipal Code.
103. The developer shall comply with all the requirements of the Community Development Department, including the Planning Division, Engineering Division, and Building Division, the Contra Costa Department of Environmental Health, the Contra Costa County Fire Protection District, the Contra Costa County Flood Control & Water Conservation District, the California Regional Water Quality Control Board, and all other applicable local, state and federal agencies. It is the responsibility of the applicant to check with each agency for requirements that may pertain to the project.
104. Developer agrees to indemnify, defend, and hold harmless the City, its officials, officers, employees, agents and consultants from any and all administrative, legal or equitable actions or other proceedings instituted by any person challenging the validity of this project approval, subsequent project approval, or other action arising out of, or in connection with, this project approval. The parties shall cooperate in defending such action or proceeding. The parties shall use reasonable efforts to select mutually agreeable defense counsel but, if the parties cannot reach agreement, City may select its own legal counsel at developer's sole cost and expense. Developer may select its own legal counsel to represent

developer's interests at developer's sole cost and expense. Developer shall pay for City's costs of defense, whether directly or by timely reimbursement to City on a monthly basis. Such costs shall include, but not be limited to, all court costs and attorneys' fees expended by City in defense of any such action or other proceeding, plus staff and City Attorney time spent responding to and defending the claim, action or proceeding.

105. The conditional design review approval of architectural plans and elevations will expire 36 months after the adoption of this resolution, unless a building permit or grading permit has been issued or a written request for extension is filed with the Planning Division prior to the expiration date and subsequently approved by the Planning Commission. The approval shall be valid for no more than six months from the date of building or grading permit issuance unless work is commenced and diligently pursued prior to the expiration of the building or grading permit.

- Notes:**
1. Site plan is for conceptual purposes only.
  2. Site plan must be reviewed by planning, building, and fire departments for code compliance.
  3. Base information per civil engineer.
  4. Civil engineer to verify all setbacks and grading information.
  5. Building Footprints might change due to the final design elevation style.
  6. Open space area is subject to change due to the balcony design of the elevation.
  7. Building setbacks are measured from property lines to building foundation lines.

- Notes:
1. Site plan is for conceptual purposes only.
  2. Site plan must be reviewed by planning, building, and fire departments for code compliance.
  3. Base information per civil engineer.
  4. Civil engineer to verify all setbacks and grading information.
  5. Building Footprints might change due to the final design elevation style.
  6. Open space area is subject to change due to the balcony design of the elevation.
  7. Building setbacks are measured from property lines to building foundation lines.

## FINAL MEMORANDUM

Date: August 14, 2018  
To: Mary Bean, First Carbon Solutions  
From: Kathrin Tellez and Mark Howard  
**Subject: Alves Ranch – Site Access and Circulation Assessment**

*WC18-3500.02*

---

Fehr & Peers prepared a trip generation assessment for the Alves Ranch project on West Leland Road at Alves Ranch Road in Pittsburg dated July 17, 2018 (attached to this memorandum as **Attachment A**). The results of the trip generation assessment indicated that although the currently proposed project would generate less peak hour traffic than the approved project, site access and circulation parameters have changed. Therefore, this supplemental site access and circulation assessment was prepared to determine if site access intersections would operate acceptably as proposed, to evaluate overall site access and circulation for all travel modes, and to identify potential project-specific transportation impacts at site access intersections that were not identified in the 2004 Environment Impact Report prepared for the project.

The following presents our project background and understanding, analysis parameters, existing conditions, project conditions, analysis results, and site plan review.

### PROJECT BACKGROUND AND UNDERSTANDING

The project site is located on West Leland Road at Alves Ranch Road in Pittsburg, as shown on **Figure 1**. The site is bound by State Route 4 to the north, a residential development to the west, West Leland Road to the south, and an undeveloped parcel to the east. Surrounding land uses are primarily residential, with the Pittsburg/Bay Point BART station in close proximity to the site (approximately 1,500 feet from the easternmost project boundary). A shopping center is located at the corner of West Leland Road at Bailey Road, less than one-mile from the site.

A certified Environment Impact Report was prepared in 2004 (2004 EIR), which documented the transportation impacts of the then proposed project, which included 563 apartment units, 206,000 square-feet of office, and 51,500 square-feet of retail. In 2008, a revised project was contemplated which included a mixture of housing types with up to 170 single-family homes, 308 apartment units, 170,000 square feet of office, and 51,500 square feet of retail uses; a trip generation assessment prepared for the 2008 project concluded that the trip generation was lower than the entitled project and that the severity of the transportation impacts identified as part of the 2004 EIR would not change.

As currently contemplated, the approximately 38-acre site is proposed to be developed with up to 346 dwelling units, including 136-attached single-family homes and 210 detached single-family homes on 26 acres. The remaining 12-acres would be developed with general retail uses, with a maximum development size of approximately 140,000 square feet, including up to a 40,000 square foot grocery store.

Access to the site is proposed from three locations on West Leland Road, including an extension of Alves Ranch Road north into the site, forming the fourth leg of an existing signalized intersection with West Leland Road. As part of the project, this intersection would be modified to provide two left-turn lanes and a through-right shared lane on both the northbound and southbound approaches. As part of this modification, a new crosswalk would be provided across the east leg of the intersection, and the traffic signal would be modified to accommodate a new pedestrian phase and the changed lane geometries on the north and south legs of the intersection.

A full access unsignalized intersection is proposed on West Leland Road, west of Alves Ranch Road. This intersection would be off-set with Tomales Bay Drive on the south side of West Leland Road, which would remain a right-in/right-out side-street stop controlled intersection. A secondary right-in/right-out access to the commercial site would also be provided from West Leland Road between Alves Ranch Road and the new roadway off-set with Tomales Bay Drive. In addition to the vehicular access locations, an emergency vehicle access location would be provided on the eastern portion of the site, approximately 500 feet east of Alves Ranch Road.

As part of the project, a 12-foot wide sidewalk would be constructed on the north side of West Leland Road along the residential project frontage, connecting to an existing sidewalk in the west; a temporary pedestrian connection would be constructed along the future commercial frontage with full improvements constructed once the commercial site is developed. A new crosswalk across the east leg of Leland Road would be constructed as part of the site access improvements, and the

signal modified to accommodate the additional pedestrian phase. Class II bicycle facilities are provided on West Leland Road, which would not be altered as a result of the project.

## ANALYSIS PARAMETERS

### Study Area and Analysis Scenarios

This site access assessment evaluates weekday morning (7:00 to 9:00 AM) and weekday evening (4:00 to 6:00 PM) peak periods to coincide with the time-periods when adjacent street traffic demands are greatest. The study addresses conditions without and with the project at the following intersections:

1. West Leland Road at Tomales Bay Drive/Project Access
2. West Leland Road at Alves Ranch Road

Intersection operations are evaluated for the following scenarios:

- **Existing** – Existing (2018) conditions based on recent traffic counts.
- **Existing with Project** – Existing (2018) conditions with project-related traffic.
- **Near-Term without Project** – Existing (2018) conditions with approved projects within the study area that could be constructed over the next five to ten years.
- **Near-Term with Project** – Near-Term conditions with project-related traffic.
- **Cumulative without Project** – Forecasts for the cumulative scenario based on traffic growth trends as described in both the Pittsburg General Plan EIR, and supplemented by a check of traffic forecasts for the study area in the most recent Contra Costa Transportation Authority Countywide travel demand model. The scenario reflects conditions over the next 20 to 25 years.
- **Cumulative with Project** – Future forecast conditions with project-related traffic.

In addition to an assessment of vehicle travel through the area, bicycle, pedestrian and transit circulation was evaluated.

## EXISTING CONDITIONS

This section describes transportation facilities in the project study area, including the surrounding roadway network, and transit, pedestrian, and bicycle facilities in the project site vicinity.

## Roadway System

**West Leland Road** is a four-lane east-west arterial street that forms the southern boundary of the project site and extends through the City of Pittsburg. At Century Boulevard it continues into the City of Antioch as Delta Fair Boulevard. In the west, it currently terminates west of San Marco Boulevard, but is proposed to connect with Avila Road, connecting to Willow Pass Road in Concord.

In the project vicinity, Class II bicycle lanes are provided on West Leland Road, and sidewalks are provided adjacent to developed parcels as well as along a portion of the project site. A landscaped median is also provided. No on-street parking is permitted. The posted speed limit is 45 miles per hour.

**Alves Ranch Road** is a generally a two-lane north-south collector roadway that intersects with West Leland Road and would be extended into the project site to provide primary access to the eastern residential neighborhood and the commercial center. South of West Leland Road, Class II bicycle facilities are provided. On-street parking is prohibited on portions of Alves Ranch Road where housing does not front the roadway. Where direct residential access is provided, on-street parking is permitted.

## Existing Pedestrian and Bicycle Facilities

**Pedestrian facilities** include sidewalks, crosswalks, and pedestrian signals. Pedestrian facilities are provided on public roadways adjacent to the site where development has occurred as well as for a segment along the project frontage. In the immediate project vicinity, marked crosswalks, push buttons and signals are provided on three legs (north, south and west) of the signalized intersection of West Leland Road at Alves Ranch Road. No pedestrian crossing of West Leland Road is provided at Tomales Bay Drive. The next closest pedestrian crossing of West Leland Road is at the BART station exit driveway.

**Bicycle facilities** in Pittsburg include the following:

- *Bike paths (Class I)* – Paved trails that are separated from roadways. These facilities are typically shared with pedestrians, although bicycles must yield to pedestrians.
- *Bike lanes (Class II)* – Lanes on roadways designated for use by bicycles through striping, pavement legends, and signs. There may or may not be parking allowed on the roadway.
- *Bike routes (Class III)* – Designated roadways for bicycle use by signs only; may or may not include additional pavement width for cyclists.

Class II bicycle facilities are provided on West Leland Road through the study area, as well as on Alves Ranch Road and Tomales Bay Drive, south of West Leland Road.

### Existing Transit Service

The center of the project site is approximately 1/2-mile from the Pittsburg/Bay Point Bay Area Rapid Transit (BART) station that connects the area to the greater region via transit. The BART station also serves as a hub for TriDelta Transit, the local transit provider, as well as other transit services.

The BART system provides regional rail transit service connecting San Francisco, Alameda County, Contra Costa County, and parts of San Mateo County. From the Pittsburg/Bay Point station, direct connections to San Francisco and Antioch are provided, with transfers available to access the entire BART system. During peak periods, trains operate on less than 15 minute headways to/from San Francisco. Trains run to/from San Francisco with 15 to 20 minute headways during off-peak periods.

Nine of the thirteen TriDelta Transit Routes serve the Pittsburg/Bay Point BART station (Routes 200, 201, 380, 387, 388, 389, 392, 394 and 396). Route 200 travels along the project frontage on West Leland Road, and connects the site to the BART station as well as to Martinez. Bus stops are provided on West Leland Road at Alves Ranch Road.

### Existing Roadway Operations

Weekday morning (7:00 to 9:00 AM) and evening (4:00 to 6:00 PM) peak period intersection vehicle turning movement counts, including a separate count of vehicles, trucks, bicycles and pedestrians, were conducted in May 2018 at the study intersections. For the study intersections, the single hour with the highest traffic volumes during the count periods was identified. These time periods also coincide when the project is expected to generate the most vehicle traffic. The morning peak hour was identified as 7:00 to 8:00 AM while the evening peak hour was identified as 5:00 to 6:00 PM. The existing peak hour vehicle volumes for weekday morning and evening are presented on **Figure 3** along with the existing lane configuration and traffic control. The traffic count data is attached (**Attachment B**).

Operations of roadway facilities for vehicles are typically described with the term level of service (LOS). LOS is a qualitative description of traffic flow based on such factors as speed, travel time, delay, and freedom to maneuver. Six levels are defined from LOS A, with the best operating conditions, to LOS F, with the worst operating conditions. LOS E represents "at-capacity" operations. Operations are designated as LOS F when volumes exceed capacity, resulting in stop-

and-go conditions. The level of service standard for the study locations is LOS D. **Attachment C** describes the LOS analysis methods for vehicles. Results of the existing conditions analysis are presented in **Table 1** which shows that the study intersections operate within the City's level of service standard. Level of service worksheets are provided as **Attachment D**.

**TABLE 1**  
**EXISTING CONDITIONS PEAK HOUR INTERSECTION LOS SUMMARY**

|   | Intersection                                         | Control <sup>1</sup> | Peak Hour | Delay <sup>2, 3</sup> | LOS   |
|---|------------------------------------------------------|----------------------|-----------|-----------------------|-------|
| 1 | West Leland Road at Tomales Bay Drive/Project Access | SSSC                 | AM        | 0 (11)                | A (B) |
|   |                                                      |                      | PM        | 0 (11)                | A (B) |
| 2 | West Leland Road at Alves Ranch Road                 | Signal               | AM        | 11                    | B     |
|   |                                                      |                      | PM        | 14                    | B     |

Notes: **Bold** text indicates potentially unacceptable intersection operations.

1. Signal = Signalized intersection; SSSC = Side-street stop-controlled intersections; traffic on the main street does not stop while traffic on the side-street is controlled by a stop sign.

2. Average intersection delay is calculated for all signalized intersections using the 2010 HCM method for vehicles.

3. For SSSC intersections, average delay or LOS is listed first followed by the delay or LOS for the worst approach in parentheses.

Source: Fehr & Peers, 2018.

## PROJECT TRAVEL CHARACTERISTICS

To estimate conditions with the project, vehicle trips expected to be added to the roadway system from the project were combined with existing (and projected future) traffic volumes through the following process:

1. **Trip Generation** – The *amount* of vehicle traffic entering and exiting the project site was estimated.
2. **Trip Distribution** – The *direction* trips use to approach and depart the site was projected.
3. **Trip Assignment** – Trips were then *assigned* to specific roadway segments and intersection turning movements.

### Trip Generation

Trip generation refers to the process of estimating the amount of vehicular traffic a project would add to the surrounding roadway system. Estimates are created for the daily condition and for the peak one-hour period during the morning and evening commute when traffic volumes on the

adjacent streets are typically the highest. Project trip generation was estimated using rates from the Institute of Transportation Engineers (ITE) *Trip Generation Manual* (10th Edition).

Similar to the trip generation estimates prepared for the 2004 EIR, the trip generation estimates considered a 6 percent transit reduction for the proposed residential uses to account for the close proximity to the BART station, and a 20 percent internalization factor between the retail and residential portions of the site, reflecting that many future retail patrons would already be within the general project vicinity and would not need to travel on the local or regional roadway system to access the site.

At retail establishments, such as the one that could be developed as part of the commercial parcel, driveway traffic comprises: (1) new traffic generated by the project, (2) traffic that would otherwise already be on the adjacent roadways but the driver decides to stop at the site (e.g., to purchase an item on their way home from work), and (3) traffic on other nearby roadways, but the driver decides to take a short detour to stop at the site. The trips in Item 2 are referred to as “pass-by” trips and the trips in Item 3 are referred to as “diverted-link” trips.

Information contained in the ITE *Trip Generation Handbook* and surveys of similar uses was used to estimate pass-by and diverted-link trips. For grocery stores, the average pass-by rate is 36 percent, and the average diverted linked trip rate is 32 percent during PM peak hour (limited data is available for the AM peak hour). In other words, at a grocery store, approximately, 68 percent of the traffic entering and exiting the site is already on the surrounding roadway system – not a new vehicle trip to the area. For shopping centers, the average pass-by rate is 32 percent and the average diverted linked trip rate is 16 percent, or approximately 50 percent of the vehicle traffic is already on the roadway system.

For this assessment, a pass-by/diverted trip reduction was applied to the grocery store component of the project only as this is a specific proposed use and the trip making characteristics are well documented. For the proposed general retail, no pass-by or diverted trip reduction was taken, similar to the 2004 EIR, as there is no information about the those proposed commercial uses. As the project components are better defined, the application of appropriate pass-by/diverted trip rates is recommended.

The resulting project trip generation estimates are presented in **Table 2**, which shows that the current project proposal is expected to generate approximately 7,810 weekday daily trips, including 436 morning peak hour and 774 evening peak hour trips when considering the same transit and

internal trip reductions as the 2004 EIR, as well as application of a pass-by/diverted-trip reduction for the grocery store component.

**TABLE 2**  
**PROJECT WEEKDAY TRIP GENERATION**

| Use                                                       | Size                | Daily  | Morning |     |       | Evening |     |       |
|-----------------------------------------------------------|---------------------|--------|---------|-----|-------|---------|-----|-------|

PM Peak Hour: T = 3.81 (X); Enter = 48%; Exit = 52%
  - Reflects a 40 percent pass-by/diverted trip reduction for grocery store only trips.
  - Reflects a 20 percent reduction of retail trips to account for internal interactions between the grocery store, retail and residential portions of the project.
- Source: *Trip Generation Manual* (10<sup>th</sup> Edition), ITE, 2017; Fehr & Peers, 2018.

As detailed in the July 17, 2018 Trip Generation Assessment, the currently proposed project would generate less peak hour vehicle traffic than the project evaluated in the 2004 EIR; as such, the projects off site impacts have already been identified and mitigation measures developed. Therefore, this assessment focuses on the site access intersections where conditions have changed. It should be noted that the proposed grocery store and supporting retail are intended to be locally serving, meaning that the vast majority of patrons come from within a 2 to 3-mile radius, with most patrons from within a 1-mile radius. As such, the vehicle trips lengths tend to be shorter than for other types of commercial uses, such as an office, and tend not to use the regional transportation system, such as State Route 4, unless they are part of an already planned trip, such as a stop at the grocery store on the way home from work. Additionally, the addition of retail to the area is expected to replace some retail trips that are already be occurring in the area by providing additional retail options closer to existing and planned residential neighborhoods where local retail is not present.

As future commercial development plans are future defined, use of the general shopping center rate, as presented in this assessment, may be appropriate if the proposed restaurant square-footage does not exceed 20 percent of the non-grocery store square-footage and other uses that are not yet defined. However, it is recommended that a detailed trip generation assessment be prepared once a development plan has been proposed, and the appropriate trip generation rates, internal trip reduction factors, and pass-by/diverted trip factors applied.

#### *Project Trip Distribution and Assignment*

Project trip distribution refers to the directions of approach and departure that vehicles would take to access and leave the site. Estimates of regional project trip distribution were developed based on the trip distribution patterns used in the 2004 EIR, existing travel patterns in the area, and the location of complementary land uses. The resulting trip distribution percentages are shown on **Figure 4**, along with the project trip assignment.

#### *Traffic Forecasts and Roadway Network*

The near-term scenario reflects existing traffic counts plus traffic from approved and pending developments that are expected to be completed and occupied in the next 5 to 10 years. The cumulative scenario considers development within the City of Pittsburg as described in the Pittsburg General plan EIR and supplemented by a check of traffic forecasts for the study area in the 2040 Contra Costa Countywide travel demand model.

To assess future growth with planned development in Eastern Contra Costa County, several sources of data were reviewed, including the Contra Costa County Travel Demand Model (CCTA Model), future traffic projections as documented in the recent planning efforts in the area, including the administrative draft Antioch Transportation Impact Fee, projections developed as part of the BART extension transportation impact studies, and projections developed as part of the Pittsburg/Bay Point Station Area Plan. Traffic forecasts within the immediate study area were reviewed to ensure that known developments were adequately reflected in the forecasts, such as the San Marco subdivision, and the planned connection of West Leland Road to Avila Road. The resulting forecasts are presented on **Figure 5** for the near-term and cumulative conditions. Project traffic volumes were then added to the without project volumes for all analysis scenarios, as shown on **Figure 6**.

No improvements are planned or assumed at the study intersections, except for the improvements proposed as part of the project.

## ANALYSIS RESULTS

### *Intersection Operations*

Signalized and unsignalized intersections were evaluated using Synchro software for the weekday AM and PM peak hours for analysis scenarios listed previously, based on the HCM 2010 analysis method described previously. **Table 3** presents level of service (LOS) operations at study intersections for the AM and PM peak hours for the existing, near-term and cumulative analysis scenarios.

Under all analysis scenarios, site access intersections would operate at overall acceptable service levels during both the morning and evening peak hours with the intersection configurations proposed as part of the project considering the addition of project traffic, with the West Leland Road at Alves Ranch Road intersection operating at an overall LOS D or better for all analysis scenarios, and the unsignalized access intersection on West Leland Road operating at an overall LOS A for all analysis scenarios.

At the unsignalized full-access location on West Leland Road, off-set from Tomales Bay Drive, the intersection would operate at an overall LOS A in the existing, near-term and cumulative conditions. However, operations for the southbound movement would degrade to LOS E in the near-term condition and LOS F in the cumulative condition during the morning peak hour. Delay is primarily experienced by vehicles waiting to turn left onto West Leland Road; through traffic on West Leland

Road would not experience any significant delay. Traffic signal warrants would not be satisfied, and vehicles exiting the site with an easterly destination could use the traffic signal at the West Leland Road at Alves Ranch Road intersection. It is expected that as traffic volumes increase on West Leland Road, some vehicles may choose to travel out of the site at the signalized intersection, especially during peak hours.

As the unsignalized site access intersection is projected to operate at an overall acceptable service level, peak hour signal warrants would not be met, and a signalized access is provided from the neighborhood at Alves Ranch Road, no modifications or signalization is recommended.

### *Signal Warrants*

Traffic signal warrants were reviewed for the unsignalized study intersection for all analysis scenarios. Signal warrants would not be satisfied at the West Leland Road at Tomales Bay Drive/Site Access intersection in any of the analysis scenarios.

## **SITE ACCESS, CIRCULATION AND PARKING**

This section evaluates the circulation of vehicles, bicycles and pedestrians around the project site and on the roadways adjacent to the project site based on the site plan presented on **Figure 2**. A parking assessment was also conducted.

### **Vehicle Access**

Access to the site is proposed from three locations on West Leland Road, including an extension of Alves Ranch Road north into the site that forms the fourth leg of an existing signalized intersection with West Leland Road. As part of the project, this intersection would be modified to provide two left-turn lanes and a through-right shared lane on both the northbound and southbound approaches and a new crosswalk would be provided across the east leg of the intersection. The traffic signal would be modified to accommodate a new pedestrian phase and the changed lane geometries on the north and south legs of the intersection. As detailed in the prior sections, this intersection would operate at acceptable service levels as proposed to be modified as part of the project.

A full access unsignalized intersection is proposed on West Leland Road, west of Alves Ranch Road. This intersection would be off-set with Tomales Bay Drive on the south side of West Leland Road, which would remain a right-in/right-out side-street stop controlled intersection. As detailed in the

previous sections, this access roadway would operate at an overall acceptable LOS A through the cumulative with project condition. However, poor operations may be experienced during the morning peak hour for vehicles turning left from the project site to eastbound West Leland Road in the near-term and cumulative condition. Neither turn restrictions or signalization is recommended as the intersection is projected to operate at an overall acceptable service level and vehicles have an alternative signalized access point to enter/exit the project site.

A secondary right-in/right-out access to the commercial site would also be provided from West Leland Road between Alves Ranch Road and roadway off-set with Tomales Bay Drive. The exact location of this driveway would be identified as the commercial parcel site plans are developed.

In addition to the vehicular access locations, an emergency vehicle access location would be provided on the eastern portion of the site, approximately 500 feet east of Alves Ranch Road.

### **Vehicle Circulation**

Daily traffic volumes were forecast for numerous locations throughout the site. The northerly extension of Alves Ranch Road (Street A) into the project site is expected to carry over 3,000 vehicles per day between Leland Road and the commercial entrance. Remaining streets are projected to accommodate lower traffic volumes, with Street B on the eastern portion of the site experiencing less than 1,700 vehicles per day, Street B connecting to the western portion of the site experiencing less than 1,000 vehicles per day, and Street E connecting the western neighborhood to West Leland Road experiencing less than 1,200 vehicles per day.

**Recommendation 1:** Design the Alves Ranch Road extension into the project site to Collector Street standards; design all other streets to Local Street standards.

Internal traffic controls are not shown on the conceptual site plan. It is expected that as the plan is further refined, all-way and side-street stop-controlled intersections would be incorporated into the overall site plan, including the Street A/Commercial Center driveway, Street E/Street F intersections, and other intersections along primary routes of travel through the site.

As part of the project, a 12-foot wide sidewalk would be constructed on the north side of West Leland Road along the residential project frontage, connecting to an existing sidewalk in the west; a temporary pedestrian connection would be constructed along the future commercial frontage with full improvements constructed once the commercial site is developed. A new crosswalk across the east leg of Leland Road would be constructed as part of the site access improvements, and the

signal modified to accommodate the additional pedestrian phase. Class II bicycle facilities are provided on West Leland Road, which would not be altered as a result of the project.

### **Loading Zone Requirements**

The City of Pittsburg Code also outlines off-street loading zone requirements for a variety of uses, as detailed in Section 18.78. For single-family homes, no off-street loading facilities are required. For commercial uses over 100,000, three loading spaces are required.

**Recommendation 2:** As the commercial plan is developed, accommodate at least three loading areas for large trucks.

Refuse collection would be provided by Mount Diablo Resource Recovery, with each home provided a garbage cart, recycling cart and green waste cart for weekly pick-up. For some homes, along A Street for example, it is not clear where refuse containers would be staged as an alley is located on one side of the home, and a collector street on the other. For other homes, refuse container staging may need to occur where on-street parking is provided and there could be conflicts on trash collection days between parked vehicles and refuse carts.

**Recommendation 3:** Consult with Mount Diablo Resource Recovery to ensure that each home has a clear refuse collection staging area that considers the need for some on-street parking to be provided on refuse collection days.

### **Pedestrian Access and Circulation**

Pedestrian access to the project would be from West Leland Road. A 12-foot wide sidewalk would be constructed along the West Leland Road residential project frontage as part of the project, with pedestrian connections provided at numerous locations, including a paseo between lots 169 and 170, as well as sidewalks connecting from the neighborhoods to West Leland Road via Street A and Street E. A temporary pedestrian connection would be constructed along the future commercial frontage with full improvements constructed once the commercial site is developed. A new crosswalk would be constructed as part of the project on the east leg of the West Leland Road at Alves Ranch Road intersection to provide a more direct connection to the transit stops on the south side of West Leland Road. This new crosswalk would also connect pedestrians to the sidewalk on the south side of West Leland Road connecting to the east.

The project would also provide a pedestrian and bicycle only connection to the parcel on the east side of the site such that when the parcel to the east of the site is developed, a more direct pedestrian and bicycle connection would be provided to the BART station.

As the commercial site plan is developed, it would include pedestrian connections from West Leland Road, Street A, and at least one connection from Street B and Street F.

Sidewalks are proposed on both sides of Street A and Street E throughout the site. For other streets, sidewalks are proposed on at least one side of the street. Given the low volume of vehicle traffic, on the local neighborhood streets, vehicle and pedestrian conflicts are expected to be minimal. The plan also shows curb extensions (bulbouts) and directional curb ramps at several locations in the project site; the final site plan will include some additional designated pedestrian crossing locations, and where crosswalks only cross one leg of an intersection, directional curb ramps (as opposed to diagonal) will be provided.

With the construction of a new access roadway on the western edge of the project, off-set from Tomales Bay Drive, a new legal pedestrian crossing of West Leland Road would be created.

***Recommendation 4:*** Either install signage and barricades prohibiting pedestrian crossing movements of West Leland Road at the new project roadway/Tomales Bay Drive on both the east and west legs of the intersection, or install a high visibility crosswalk with a pedestrian actuated flashing beacons or pedestrian hybrid signal across the west leg of the intersection and prohibit pedestrian crossings of the east leg through signage and barricades.

### **Bicycle Access and Circulation**

Bicycle access to the site would be provided from existing Class II bicycle facilities on West Leland Road. No designated bicycle facilities are proposed on any of the roadways internal to the site.

Short term and long term bicycle parking is required for the commercial portion of the project, and is based on the required amount of automobile parking, pursuant to Section 18.78.045 of the Pittsburg Municipal Code.

***Recommendation 5:*** As the commercial site plan is developed, provide a mixture of short-term (racks) and long-term (lockers or secure room) bicycle parking based on the requirements outlined in Section 18.78.045 of the Pittsburg Municipal Code.

Approximately 20 percent of the required bicycle parking shall be long-term parking for employee use.

### **Transit Access and Circulation**

The center of the project site is located approximately 1/2-mile from a BART station and is adjacent to a TriDelta Transit stop. It is expected that given the project's proximity to transit, some future site residents and employees would use transit on a regular basis. Pedestrian connections are provided from the project site to both the TriDelta Transit stops as well as the BART station.

**Recommendation 6:** Provide transit information to prospective and new residents to encourage transit use to/from the site.

### **Vehicle Parking**

City of Pittsburgh Code specifies off-street parking requirements for a variety of uses, including residential and commercial. For the residential portion of the project, two off-street spaces per unit are required, which is being accommodated by the proposed project. Additionally, on-street parking is provided to accommodate guest and additional resident parking. Overall, two off-street spaces would be provided per unit (692 spaces) and a total of 170 on-street parking spaces would be provided, for an overall parking ratio of 2.49 spaces per unit, or 2 off-street spaces and 0.49 on-street spaces per residential unit.

Given the site's close proximity to the Pittsburgh/Bay Point BART station, there is the potential for overflow vehicle parking demand within the project site.

**Recommendation 7:** To manage the on-site residential parking supplies, the following should be considered for implementation with the project:

- Require that for residents that own vehicles, garages must be used for vehicle storage

As the commercial site plan is developed, it is expected that parking would be provided based on the existing City code requirements outlined in Section 18.78.040 of the Pittsburgh Municipal Code.

**Recommendation 8:** As the commercial site plan is developed, evaluate the potential to reduce the overall parking requirement by up to 10 percent to account for walk/bike/transit trips to the commercial portion of the site. Consider allowing on-street parking along the

commercial parcel boundaries to count towards the off-street parking requirement provided the site plan provides direct pedestrian connections from those parking spaces to the commercial center. Provisions for ADA parking should also be incorporated into the commercial site plan.

### **Emergency Vehicle Access**

The proposed project is not expected to result in inadequate emergency access as access to the site would be provided from multiple access locations and if one location were to be blocked other means of access are provided. Additionally, the Fire Department has reviewed the site plan and has indicated that the proposed internal street cross-sections are sufficient for emergency vehicle circulation.

### **CONCLUSION**

Results of the Alves Ranch site access indicate that the proposed site access intersections would operate at acceptable overall levels of service as proposed. Additionally, site access and internal circulation is provided for all modes of travel, connecting to the regional network. As the currently proposed project would generate less peak hour traffic than evaluated in the 2004 EIR, implementation of the previously identified off-site mitigation measures would continue to mitigate the project's off-site impacts.

This completes our site access assessment for Alves Ranch. Please contact Kathrin or Mark at (925) 930-7100 if you have questions.

## FINAL MEMORANDUM

Date: July 17, 2018  
To: Mary Bean, First Carbon Solutions  
From: Kathrin Tellez and Mark Howard  
Subject: **Alves Ranch – Trip Generation Assessment**

*WC18-3500.02*

---

Fehr & Peers prepared a trip generation assessment for the Alves Ranch project on West Leland Road at Alves Ranch Road in Pittsburg. The site was originally entitled to develop 560 multi-family dwelling units and 257,000 square-feet of business commercial uses, and is currently proposed to be developed with up to 346 single-family dwelling units and up to approximately 140,000 square-feet of general retail uses, including up to a 40,000 square-foot grocery store. The purpose of this assessment is to determine if the currently proposed project would generate vehicle traffic at levels similar to or less than levels generated by the original entitlements.

Results of the comparison indicate that the current proposal would generate similar levels of vehicle traffic as compared to the project evaluated in the 2004 Environmental Impact Report (2004 EIR) that served as the basis for the initial project approvals and entitlements. Although the currently proposed project is expected to generate similar overall levels of vehicle traffic, some site access and circulation parameters have changed and additional assessment of site access and circulation was conducted to ensure that intersections that serve the site are adequate to accommodate the expected travel flows; please see Fehr & Peers Technical Memorandum dated July 18, 2018 for a site access and circulation assessment.

The following presents our project understanding, trip generation comparison, and conclusions.

### PROJECT BACKGROUND AND UNDERSTANDING

The project site is located on West Leland Road at Alves Ranch Road in Pittsburg, as shown on **Figure 1**. The site is bound by State Route 4 to the north, a residential development to the west,

West Leland Road to the south, and an undeveloped parcel to the east. Surrounding land uses are primarily residential, with the Pittsburg/Bay Point BART station in close proximity to the site (approximately 1,500 feet to the east). A shopping center is located at the corner of West Leland Road at Bailey Road, less than one-mile from the site.

A certified Environment Impact Report was prepared in 2004 (2004 EIR), which documented the transportation impacts of the then proposed project, which included 563 apartment units, 206,000 square-feet of office, and 51,500 square-feet of retail. In 2008, a revised project was contemplated which included a mixture of housing types with up to 170 single-family homes, 308 apartment units, 170,000 square feet of office, and 51,500 square feet of retail uses; a trip generation assessment prepared for the 2008 project concluded that the trip generation was lower than the entitled project and that the severity of the transportation impacts identified as part of the 2004 EIR would not change.

As currently contemplated, the approximately 38-acre site is proposed to be developed with up to 346 dwelling units, including 136-attached single-family homes and 210 detached single-family homes on 26 acres. The remaining 12-acres would be developed with general retail uses, with a maximum development size of approximately 140,000 square feet, including up to a 40,000 square foot grocery store.

Access to the site is proposed from three locations on West Leland Road, including an extension of Alves Ranch Road north into the site that forms the fourth leg of an existing signalized intersection with West Leland Road. A full access unsignalized intersection is proposed on West Leland Road, west of Alves Ranch Road. This intersection would be off-set with Tomales Bay Drive on the south side of West Leland Road, which would remain a right-in/right-out side-street stop controlled intersection. A secondary right-in/right-out access to the commercial site would also be provided from West Leland Road. In addition to the vehicular access locations, an emergency vehicle access location would be provided on the eastern portion of the site, approximately 500 feet east of Alves Ranch Road.

As part of the project, a 10-foot wide trail would be constructed on the north side of West Leland Road along the project frontage, connecting to an existing sidewalk in the west. As part of the project, the applicant would construct a temporary pedestrian path between the end of the trail along the project frontage and the Woodhill Drive/BART access roadway to close the pedestrian gap between the project site and the BART station prior to the development of the adjacent lot.

Class II bicycle facilities are provided on West Leland Road, which would not be altered as a result of the project.

## TRIP GENERATION

Trip generation is the process of estimating the total amount of trips generated by a site, as well as the expected travel mode. For this project, trip generation rates presented in the Institute of Transportation Engineers (ITE) *Trip Generation Manual* (10th Edition) were used. For the 2004 and 2008 analyses, the 7th Edition of the Trip Generation publication was used. Since the time those analyses were prepared, ITE released several updates to the *Trip Generation Manual* and the most current manual is the most appropriate source to estimate potential project trips. The 2004 and 2008 trip generation estimates considered a 6 percent transit reduction for the projects residential uses to account for the close proximity to the BART station, and a 20 percent internalization factor between the retail and residential portions of the site, reflecting that many future retail patrons would already be within the general project vicinity and would not need to travel on the local or regional roadway system to access the site.

At retail establishments, such as the one that could be developed as part of the commercial parcel, driveway traffic comprises: (1) new traffic generated by the project, (2) traffic that would otherwise already be on the adjacent roadways but the driver decides to stop at the site (e.g., to purchase an item on their way home from work), and (3) traffic on other nearby roadways, but the driver decides to take a short detour to stop at the site. The trips in Item 2 are referred to as "pass-by" trips and the trips in Item 3 are referred to as "diverted-link" trips.

Information contained in the ITE *Trip Generation Handbook* and surveys of similar uses was used to estimate pass-by and diverted-link trips. For grocery stores, the average pass-by rate is 36 percent, and the average diverted linked trip rate is 32 percent during PM peak hour (limited data is available for the AM peak hour). In other words, at a grocery store, approximately, 68 percent of the traffic entering and exiting the site is already on the surrounding roadway system – not a new vehicle trip to the area. For shopping centers, the average pass-by rate is 32 percent and the average diverted linked trip rate is 16 percent, or approximately 50 percent of the vehicle traffic is already on the roadway system.

For this assessment, a pass-by/diverted trip reduction was applied to the grocery store component of the project only as this is a specific proposed use and the trip making characteristics are well documented. For the proposed general retail, no pass-by or diverted trip reduction was taken,

similar to the 2004 EIR and 2008 Addendum as there is no information about the those proposed commercial uses. As the project components are better defined, the application of appropriate pass-by/diverted trip rates is recommended.

The proposed project trip generation estimates are presented in **Table 1**, which shows that the current project proposal is expected to generate approximately 7,810 weekday daily trips, including 436 morning peak hour and 774 evening peak hour trips when considering the same transit and internal trip reductions as the 2004 EIR and 2008 Addendum analysis, as well as application of a pass-by/diverted-trip reduction for the grocery store component.

The resulting trip generation estimates from Table 1 were then compared to the trip generation estimates for the project evaluated in the 2004 EIR and the 2008 Addendum, as presented in **Table 2**. This comparison shows that compared to the 2004 EIR project, the current proposal would generate slightly more daily vehicle trips (3 percent more) and fewer evening peak hour trips (2 percent less). As compared to the 2008 Addendum project, the current proposal would generate more daily vehicle trips (10 percent) and slightly more evening peak hour trips (3 percent).

During the PM peak hour, the directionality of some vehicle trips could change with the proposed project as compared to the 2004 EIR project, with more inbound trips (approximately 60 more trips) and fewer outbound trips (approximately 75 fewer trips). This is due to the increased level of retail proposed for the site, as compared to business commercial uses. It should be noted that the proposed grocery store and supporting retail are intended to be locally serving, meaning that the vast majority of patrons come from within a 2 to 3 mile radius, with most patrons from within a 1-mile radius. As such, the vehicle trips lengths tend to be shorter than for other types of commercial uses, such as an office, and tend not to use the regional transportation system, such as State Route 4, unless they are part of an already planned trip, such as a stop at the grocery store on the way home from work. Additionally, the addition of retail to the area is expected to replace some retail trips that are already be occurring in the area by providing additional retail options closer to existing and planned residential neighborhoods where local retail is not present.

As future commercial development plans are future defined, use of the general shopping center rate, as presented in this assessment, may be appropriate if the proposed restaurant square-footage does not exceed 20 percent of the non-grocery store square-footage and other uses are not yet well defined. However, it is recommended that a detailed trip generation assessment be prepared once a development plan has been proposed, and the appropriate trip generation rate, internal trip reduction factors, and pass-by/diverted trip factors applied.

**TABLE 1**  
**PROPOSED PROJECT WEEKDAY TRIP GENERATION**

| Use                                                       | Size                | Daily  | Morning |     |       | Evening |     |       |

## CONCLUSION

Results of the comparison indicate that the current proposal would generate slightly less vehicle traffic than the project evaluated in the 2004 Environmental Impact Report (2004 EIR) that served as the basis for the initial project approvals and entitlements. Although the currently proposed project is expected to generate less overall vehicle traffic, some site access and circulation parameters have changed and additional assessment of site access and circulation may be necessary to ensure that intersections that serve the site are adequate to accommodate the expected travel flows.

This completes our trip generation assessment for Alves Ranch. Please contact Kathrin or Mark at (925) 930-7100 if you have questions.

## ATTACHMENT C – INTERSECTION LEVEL OF SERVICE ANALYSIS METHODS

The operations of roadway facilities are for vehicles described with the term “level of service” (LOS). LOS is a qualitative description of traffic flow based on factors such as speed, travel time, delay, and freedom to maneuver. Six levels of service are defined ranging from LOS A (i.e., best operating conditions) to LOS F (worst operating conditions). LOS E corresponds to operations “at capacity.” When volumes exceed capacity, stop-and-go conditions result and operations are designated as LOS F. The level of service standard for the intersections included in this assessment is LOS D.

### Signalized Intersections

Traffic conditions at signalized intersections were evaluated using the method from the Transportation Research Board’s 2010 *Highway Capacity Manual*. This operations analysis method uses various intersection characteristics (such as traffic volumes, lane geometry, and signal phasing) to estimate the average control delay experienced by motorists traveling through an intersection. Control delay incorporates delay associated with deceleration, acceleration, stopping, and moving up in the queue. **Table C-1** summarizes the relationship between average delay per vehicle and LOS for signalized intersections.

### Unsignalized Intersections

Traffic conditions at unsignalized intersections were evaluated using the method from the 2010 *Highway Capacity Manual*. With this method, operations are defined by the average control delay per vehicle (measured in seconds) for each movement that must yield the right-of-way. At two-way or side street-controlled intersections, the control delay (and LOS) is calculated for each controlled movement, as well as the left-turn movement from the major street, and the entire intersection. For controlled approaches composed of a single lane, the control delay is computed as the average of all movements in that lane. The delays for the entire intersection and for the movement or approach with the highest delay are reported. **Table C-2** summarizes the relationship between delay and LOS for unsignalized intersections.

**TABLE C-1**  
**SIGNALIZED INTERSECTION LOS CRITERIA**

| Level of Service | Description                                                                                                                                                                                                      | Average Control Delay Per Vehicle (Seconds) |
|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------|
| A                | Operations with very low delay occurring with favorable progression and/or short cycle lengths.                                                                                                                  | $\leq 10.0$                                 |
| B                | Operations with low delay occurring with good progression and/or short cycle lengths.                                                                                                                            | > 10.0 to 20.0                              |
| C                | Operations with average delays resulting from fair progression and/or longer cycle lengths. Individual cycle failures begin to appear.                                                                           | > 20.0 to 35.0                              |
| D                | Operations with longer delays due to a combination of unfavorable progression, long cycle lengths, and/or high volume-to-capacity (V/C) ratios. Many vehicles stop and individual cycle failures are noticeable. | > 35.0 to 55.0                              |
| E                | Operations with long delays indicating poor progression, long cycle lengths, and high V/C ratios. Individual cycle failures are frequent occurrences.                                                            | > 55.0 to 80.0                              |
| F                | Operations with delays unacceptable to most drivers occurring due to over saturation, poor progression, or very long cycle lengths.                                                                              | > 80.0                                      |

| <b>2-G-1:</b> Maintain a compact urban form within the City’s projected municipal boundary. Ensure that hillside lands not environmentally suitable for development are maintained as open space.                                                                                                                                           | <b>Consistent.</b> The proposed project would be constructed on an infill site.                                                                                                                                                                                                                        |
| <b>2-G-2:</b> Promote large-scale office/business development, and reserve sites for Business Commercial uses in designated locations accessible from regional transportation systems.                                                                                                                                                      | <b>Consistent.</b> The proposed project would maintain an approximately 12-acre commercial area which is designated as Business Commercial and is located within walking distance from the Pittsburg/Bay Point BART Station.                                                                           |
| <b>2-G-3:</b> Emphasize concentrated commercial development, rather than linear commercial strips.                                                                                                                                                                                                                                          | <b>Consistent.</b> The proposed project would maintain an approximately 12-acre commercial area, which would allow for concentrated commercial development.                                                                                                                                            |
| <b>2-G-4:</b> Provide a range of development intensities, with the highest intensities in Downtown and in areas accessible to transit and services, and lower intensities in hillsides and at the City’s southern edge.                                                                                                                     | <b>Consistent.</b> The project site is within a half-mile distance of the Pittsburg/Bay Point BART Station and adjacent to bus stops located near the intersections of West Leland Road and Alves Ranch Road.                                                                                          |
| <b>2-G-5:</b> Promote a diversity of housing types, including opportunities for hillside estate development, as well as smaller lot, infill, and high-density housing.                                                                                                                                                                      | <b>Consistent.</b> The proposed project would construct provide higher-density, single-family development on smaller lots ranging from approximately 1,800 to over 4,000 square feet.                                                                                                                  |
| <b>2-G-7:</b> Promote flexibility and diversity in land use arrangements, including mixed-use development in appropriate areas.                                                                                                                                                                                                             | <b>Consistent.</b> The proposed project would promote commercial development in an area surrounding and dominated by existing and proposed residential development,                                                                                                                                    |
| <b>2-P-5:</b> Undertake planned development as a means to achieve high community design standards, not to circumvent development intensity standards.                                                                                                                                                                                       | <b>Consistent.</b> The proposed project would utilize PD Zoning to allow for a variety of high quality housing types and a commercial component that would reduce automobile reliance for residents in the area.                                                                                       |
| <b>2-P-6:</b> Ensure provision of community amenities within planned development projects, including parks and recreation facilities, streetscaping and pedestrian paths, transit facilities, parking areas, and public safety facilities. Ensure construction of amenities at a time that is in balance with the needs of the development. | <b>Consistent.</b> The proposed project would include a recreation area complete with a bocce court and basketball court, a Class I pedestrian path along the project frontage, a Class I connection to the property to the east and designated on-street parking areas as well as off-street parking. |
| <b>2-P-7:</b> During development review, consider project compatibility with existing surrounding land uses. Ensure that sensitive uses—such as residences, schools, and parks—are not subject to hazardous or unhealthy conditions.                                                                                                        | <b>Consistent.</b> The proposed project would include 346 residential units in an area surrounded by existing residential development. The commercial portion of the proposed project would serve the residents of the area.                                                                           |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                              |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>2-P-10:</b> Reserve sites for Business Commercial uses, including but not limited to:</p> <ul style="list-style-type: none"> <li>• Along State Route 4, focused at the Willow Pass Road/San Marco Boulevard interchange and Loveridge Road interchange;</li> <li>• Adjacent to the Pittsburg/Bay Point BART Station;</li> <li>• Between Willow Pass Road and the BNSF Railroad tracks, west of Downtown; and</li> <li>• Along Harbor Street, between State Route 4 and East Leland Road (the proposed Railroad Avenue BART Station).</li> </ul> | <p><b>Consistent.</b> The proposed project would reserve the Business Commercial land use and expand the zoning to also allow for support commercial uses such as retail or restaurants that serve the surrounding communities.</p>                                                                                          |
| <p><b>2-P-11:</b> Do not allow sites designated for Business Commercial uses to be changed to another land use designation unless it is determined that adequate sites are available elsewhere to meet the City's office and business development objectives.</p>                                                                                                                                                                                                                                                                                     | <p><b>Consistent.</b> The proposed project would not change the land use designation of the site.</p>                                                                                                                                                                                                                        |
| <p><b>2-P-15:</b> Ensure minimum residential densities, in accordance with the ranges stipulated in this Plan.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                    | <p><b>Consistent.</b> The proposed project would provide an overall residential density of approximately 14 dwelling units per acre, consistent with the High-Density Residential Land Use Designation.</p>                                                                                                                  |
| <p><b>2-P-16:</b> Develop criteria and standards for small-lot single-family residential development that:</p> <ul style="list-style-type: none"> <li>• Promotes design and development flexibility;</li> <li>• Includes design and bulk standards to ensure that development is appropriate and related to underlying lot size; and</li> <li>• Ensures that residential development promotes a neighborhood orientation, with limitation on frontage that can be occupied by garages.</li> </ul>                                                     | <p><b>Consistent.</b> The proposed project would utilize PD zoning to allow for small lot, single family residential development, which is appropriate for the underlying land use designation and reduced the prominence of garages.</p>                                                                                    |
| <p><b>2-P-30:</b> Encourage private developers to conduct geo-technical and biological studies prior to filing project applications to ensure environmentally sensitive project layout and design.</p>                                                                                                                                                                                                                                                                                                                                                | <p><b>Conditionally.</b> Recommended conditions of approval would require the developer provide confirmation of biological studies and geotechnical studies.</p>                                                                                                                                                             |
| <p><b>Land Use Element – Southwest Hills</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                              |
| <p><b>2-P-86:</b> Work with project developers to ensure that new residential neighborhoods and business commercial complexes built along West Leland Road provide transit amenities (such as pedestrian paths, bus shelters, bicycle racks) and convenient access to the Pittsburg/Bay Point BART Station.</p>                                                                                                                                                                                                                                       | <p><b>Consistent.</b> The proposed project would provide a Class I pedestrian path along the project frontage as well as a Class I connection to the property to the east.</p> <p>Further, a recommended condition of approval would require the developer install hanging bicycle racks within each residential garage.</p> |
| <p><b>2-P-87:</b> Ensure that all proposed residential development is set back from the edge of State Route 4 to mitigate visual and noise impacts.</p>                                                                                                                                                                                                                                                                                                                                                                                               | <p><b>Consistent.</b> The proposed project would be setback to adequately mitigate visual and noise impacts. Additionally, the developer would be required to install noise barriers in areas identified within the noise analysis.</p>                                                                                      |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                                                                                                                                                                                                                                                                                                                                                                                                         |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><b>2-P-89:</b> Allow development on the site east of the proposed West Leland Road/San Marco Boulevard intersection (Alves Ranch) as follows:</p> <ul style="list-style-type: none"> <li>• A maximum of 306 Hillside Low and Low-Density units, and 794 Medium and High Density residential units;</li> <li>• A maximum of 20 acres of Business Commercial between West Leland Road and State Route 4;</li> <li>• Grading to be kept to a minimum, all designated ridgelines protected, and impacts to creeks mitigated; and</li> <li>• Dedication of one school site.</li> </ul> | <p><b>Consistent.</b> The proposed project would stay within the maximum allowable number of units and commercial acreage. The amount of grading would be minimal as the site is relatively flat, and no ridgelines or creeks run through the site. As part of the Vista Del Mar development to the south, a school site was dedicated.</p>                                                             |
| <p><b>2-P-92:</b> Consider the development of a specific plan for the High Density Residential, Business Commercial, and Community Commercial areas adjacent to State Route 4, West Leland Road and San Marco Boulevard. Integrate all uses in this area into a mixed-use, transit-oriented village, featuring executive offices, research and development, entertainment, and hotel uses.</p>                                                                                                                                                                                       | <p><b>Consistent.</b> Staff believes the intent of this policy was to ensure that large areas of the identified subarea be developed in a cohesive manner that accounts for residents' housing, shopping and transportation needs. The proposed project would establish what accounts to a master planned community, with a variety of commercial and residential uses.</p>                             |
| <p><b>2-P-94:</b> Pursue construction of a landscaped multi-use path along West Leland Road, from Pittsburg/Bay Point BART Station to the proposed San Marco Village. Ensure that design of the linear parkway accommodates bicyclists.</p>                                                                                                                                                                                                                                                                                                                                          | <p><b>Consistent.</b> The proposed project would establish a Class I bicycle path along West Leland Road adjacent to the residential portions of the development, as well as a temporary 8-foot wide pathway along the commercial parcel.</p>                                                                                                                                                           |
| <p><b>Growth Management Element</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                         |
| <p><b>3-G-1:</b> Manage the City's growth to balance development of housing options and job opportunities, protection of open space and habitat areas, construction of transportation improvements, and preservation of high quality public facilities.</p>                                                                                                                                                                                                                                                                                                                          | <p><b>Consistent.</b> The proposed project would include the development of a residential neighborhood, as well as a commercial parcel which could be used for a variety of uses which would generate jobs. The use would also establish residential uses close to transit, which allows citizens additional access to job markets, and Class I pathways to encourage residents to utilize transit.</p> |
| <p><b>3-G-3:</b> Provide a range of development intensities, with the highest intensities in Downtown and in areas approximate to transit and services, and lower intensities in hillsides and at the City's southern edge.</p>                                                                                                                                                                                                                                                                                                                                                      | <p><b>Consistent.</b> The project itself would provide a range of densities and would create a greater mix of densities in the larger subarea.</p>                                                                                                                                                                                                                                                      |
| <p><b>3-G-6:</b> Support efforts to establish a regional approach to transportation and land use planning.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <p><b>Consistent.</b> The proposed project would include the development of a residential neighborhood, as well as a commercial parcel which could be used for a variety of uses which would generate jobs. The use would also establish residential uses close to transit, which allows citizens additional access to job markets, and Class I pathways to encourage residents to utilize transit.</p> |
| <p><b>3-G-9:</b> Encourage the provision of new and improved pedestrian, bicycle and transit facilities to serve all users of new development projects.</p>                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                         |
| <p><b>3-G-10:</b> Foster development of a variety of housing types, densities and prices to balance the City's housing stock and meet the City's regional fair share housing needs for people of all income levels. (Housing Element Goal 13-G-1)</p>                                                                                                                                                                                                                                                                                                                                | <p><b>Consistent.</b> The project itself would provide a range of densities and housing types, including single-family attached and detached units, and would create a greater mix of densities and types in the larger subarea.</p>                                                                                                                                                                    |

| <b>4-G-16:</b> Establish the City’s BART Stations as regional focal points, surrounded by a mix of urban activities and services.                                                                                                                            | <b>Consistent.</b> The proposed project would include the development of a residential neighborhood, as well as a commercial parcel which could be used for a variety of uses which would generate jobs. The use would also establish residential uses close to transit, which allows citizens additional access to job markets, and Class I pathways to encourage residents to utilize transit.               |
| <b>4-G-17:</b> Encourage development of diverse and distinctive neighborhoods that build on the patterns of the natural landscape and provide a sense of connection with surrounding uses.                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>4-G-18:</b> Ensure that neighborhood streets provide safe and attractive connections to local schools, parks, commercial centers, and transit facilities for pedestrians and bicycles.                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>4-P-30:</b> Ensure that all residential developers provide multi-use trails or trailheads connecting to local schools and parks, commercial centers, and regional open spaces.                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>4-P-59:</b> Pursue the development of a linear parkway along West Leland Road, west of Bailey Road, linking the Pittsburg/Bay Point BART Station Area to new residential neighborhoods within the southern hills.                                         |                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>4-P-75:</b> Encourage West Leland Road to be designed as a pedestrian-friendly street, with wide sidewalks, small plazas and benches, signaled crosswalks, pedestrian scale building massing, and parking tucked behind the buildings.                    |                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>4-P-76:</b> Pursue the development of a linear parkway along West Leland Road, connecting the Pittsburg/Bay Point BART Station Area to San Marco Village.                                                                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>4-P-84:</b> Use traffic calming measures to reduce speeds in residential areas, rather than limiting through-street connections.                                                                                                                          | <b>Consistent.</b> The proposed project would utilize bulb-outs and narrower streets which encourage slower automobile movement.                                                                                                                                                                                                                                                                               |
| <b>4-P-85:</b> Provide safe and comfortable pedestrian routes through local neighborhoods by requiring sidewalks on both sides of residential streets, except in hillside areas, by planting street trees adjacent to the curb, and by minimizing curb cuts. | <b>Consistent.</b> The City’s traffic engineer has determined that adequate sidewalks and pathways are provided to allow for safe pedestrian circulation.                                                                                                                                                                                                                                                      |
| <b>Economic Development Element</b>                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>6-G-2:</b> Establish economic development priorities and undertake targeted investments to facilitate expansion, retention and attraction of businesses that meet the City’s economic development objectives.                                             | <b>Consistent.</b> The proposed project would promote the development of commercial opportunities in the general area, consistent with the City’s economic goals, and creating an inviting climate for conducting business in Pittsburg. The development trend in the area is largely residential, with limited commercial opportunities; the proposed project would potentially help the City meet that need. |
| <b>6-G-4:</b> Maintain and enhance an attractive climate for conducting business in Pittsburg.                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>6-P-1:</b> Monitor land use and development trends in the City, specifically in the Economic Opportunity Areas established in Policy 6-P-9, to ensure a sufficient supply of land that offers appropriate use designations and development intensities.   |                                                                                                                                                                                                                                                                                                                                                                                                                |

| Transportation Element                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>7-G-15:</b> Encourage walking as a regular means of transportation for people who live within a half-mile walk of school, work, or routine shopping destinations.                                                                                                | <b>Consistent.</b> The proposed project would establish residential uses close to transit, which allows citizens to walk to BART, and Class I pathways to encourage residents to utilize transit and walk. The project would also allow for future commercial uses within walking distance of not only the project, but other residential uses as well. |
| <b>7-G-16:</b> Ensure that current bicycle-friendly roadways, featuring wide shoulders or marked bicycle lanes, are not redesigned to improve traffic LOS, unless all other alternative roadways possible to alleviate congestion are exhausted.                    | <b>Consistent.</b> West Leland Road would not be redesigned, and existing bicycle facilities would remain.                                                                                                                                                                                                                                              |
| <b>7-P-1:</b> Require mitigation for development proposals that are not part of the Traffic Mitigation Fee program which contribute more than one percent of the volume to an existing roadway or intersections with inadequate capacity to meet cumulative demand. | <b>Consistent.</b> The 2004 EIR identified traffic impact mitigations, which would be applicable to the project.                                                                                                                                                                                                                                        |
| <b>7-P-29:</b> Preserve options for future transit use when designing improvements for roadways. Ensure that developers provide bus turnouts and/or shelters, where appropriate, as part of projects.                                                               | <b>Consistent.</b> The project is adjacent to an existing bus stop.                                                                                                                                                                                                                                                                                     |
| <b>7-P-34:</b> As part of development approval, ensure that safe and contiguous routes for pedestrians and bicyclists are provided within new development projects and on any roadways that are impacted as a result of new development.                            | <b>Consistent.</b> The proposed project would provide a Class I pedestrian path along the project frontage as well as a Class I connection to the property to the east. The City's traffic engineer has determined that adequate sidewalks and pathways are provided to allow for safe pedestrian circulation.                                          |
| <b>7-P-39:</b> Ensure that residential and commercial developments provide pedestrian pathways between lots for direct routes to commercial centers, schools, and transit facilities.                                                                               |                                                                                                                                                                                                                                                                                                                                                         |
| <b>7-P-40:</b> Ensure provision of sufficiently wide sidewalks and pedestrian paths in all new residential development.                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                         |
| <b>7-P-48:</b> Ensure that construction of bulb-outs and curb extensions at intersections for pedestrian safety does not endanger bicyclists by forcing them into traffic lanes                                                                                     | <b>Conditionally Consistent.</b> A recommended condition of approval would require certain bulb-outs be removed to ensure bicyclist safety.                                                                                                                                                                                                             |
| Open Space, Youth and Recreation Element                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                         |
| <b>8-P-2:</b> Pursue the development of park and recreation facilities within reasonable walking distance of all homes.                                                                                                                                             | <b>Consistent.</b> The proposed project would include a recreation area with bocce courts and a basketball court, as well as a ¼ mile track. Several other open spaces are also available to residents.                                                                                                                                                 |

| Resource Conservation Element                                                                                                                                                                                                                                                                                                                                 |                                                                                                                                                                                                                                                                                                                                             |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>9-P-1:</b> Ensure that development does not substantially affect special status species, as required by State and federal agencies and listed in Table 9-1. Conduct assessments of biological resources as required by CEQA prior to approval of development within habitat areas of identified special status species, as depicted in Figure 9-1.         | <b>Conditionally Consistent.</b> Mitigation measures identified in the 2004 EIR and added as conditions of approval would require the project provide surveys to analyze if biological resources and special status species exist on the project site prior ton issuance of a grading permit.                                               |
| <b>9-P-8:</b> As a condition of approval of new development, ensure revegetation of cut-and-fill slopes with native plant species.                                                                                                                                                                                                                            | <b>Conditionally Consistent.</b> Mitigation measures identified in the 2004 EIR and added as conditions of approval would require the project provide revegetate cut and fill slopes as necessary.                                                                                                                                          |
| <b>9-P-41:</b> If archeological resources are found during ground-breaking for new urban development, halt construction immediately and conduct an archeological investigation to collect all valuable remnants                                                                                                                                               | <b>Conditionally Consistent.</b> Mitigation measures identified in the 2004 EIR and added as conditions of approval would require the project adhere to best management practices archeological resources be found on the project site.                                                                                                     |
| Health and Safety Element                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                             |
| <b>10-G-3:</b> Minimize the potential for soil erosion by wind and storm water runoff.                                                                                                                                                                                                                                                                        | <b>Conditionally Consistent.</b> Recommended conditions of approval would require the applicant submit a stormwater prevention plan, submit a soils report and geotechnical analysis, and comply with the City’s NPDES permitting requirements. The City Engineer shall review and approve all items prior to issuance of a grading permit. |
| <b>10-P-1:</b> Ensure preparation of a soils report by a City approved engineer or geologist in areas identified as having geological hazards in Figure 10-1, as part of development review.                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                                             |
| <b>10-P-9:</b> Ensure geotechnical studies prior to development approval in geologic hazard areas, as shown in Figure 10-1. Contract comprehensive geologic and engineering studies of critical structures regardless of location.                                                                                                                            |                                                                                                                                                                                                                                                                                                                                             |
| <b>10-P-10:</b> As part of development approval, ensure that a registered engineering geologist be available at the discretion of the City Engineer to review reports submitted by applicants in the geologic hazard areas identified in Figure 10-1. Project proponents shall pay all costs associated with engineering studies related to geologic hazards. |                                                                                                                                                                                                                                                                                                                                             |
| <b>10-P-18:</b> Evaluate storm drainage needs for each development project in the context of demand and capacity when the drainage area is fully developed. Ensure drainage improvements or other mitigation of the project’s impacts on the storm drainage system appropriate to the project’s share of the cumulative effect.                               |                                                                                                                                                                                                                                                                                                                                             |

Alves Ranch Subdivision, AP-18-1348 (RZ, SUBD, DR)

| Design Review Guideline                                                                                                                                                                                                      | Meets Guideline?                                                                                                                                    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1.a:</b> Reliefs and architectural treatments should be provided on all building elevations (360 degree architecture), i.e. 2"x4" (wood or styrofoam/stucco) window and door reveal treatment on all building elevations. | <b>Yes.</b> The proposed house designs include architectural treatments on all building facades.                                                    |
| <b>1.b:</b> Provide concrete and/or tile roof material. Architectural grade composition material may be used if rake treatment is included or roof pitch, greater than 4:12 is used.                                         | <b>Yes.</b> The proposed homes incorporate composite tile roof material.                                                                            |
| <b>1.c:</b> Each dwelling unit should be provided with complete front yard and corner-side yard xerophytic landscaping and automatic irrigation.                                                                             | <b>Conditionally.</b> The proposed landscaping would be required to meet the standards set forth in PMC Section 18.84.310.                          |
| <b>1.d:</b> Required front yards should vary in depth unless otherwise stated for a proposed PD (Planned Development) district.                                                                                              | <b>Not applicable.</b> This guideline does not appear to apply to PD districts.                                                                     |
| <b>1.e:</b> Decorative masonry walls should be provided between all arterial streets and future homes.                                                                                                                       | <b>Yes.</b> Decorative masonry walls are provided between West Leland Road and future homes, as applicable.                                         |
| <b>1.f:</b> Roof slopes should be considered greater than 4:12 unless inappropriate for architectural style (i.e. Ranch Style, etc.).                                                                                        | <b>Yes.</b>                                                                                                                                         |
| <b>1.g:</b> Provide articulated garage doors on all garages.                                                                                                                                                                 | <b>Yes.</b> The proposed homes will have articulated garage doors.                                                                                  |
| <b>1.h:</b> Garage doors designs should not be duplicated. Not less than four styles should be used in a subdivision.                                                                                                        | <b>Yes.</b> There are three distinct home designs with three different home elevations, each of which has a different garage door design and color. |
| <b>1.i:</b> Side-on garages are recommended intermittently through-out the subdivision (70' wide lots or greater).                                                                                                           | <b>Not applicable.</b> Seventy-foot wide lots are not proposed as part of the project.                                                              |
| <b>1.j:</b> Garage frontage should not occupy more than 60% of allowable lot frontage.                                                                                                                                       | <b>Not applicable.</b> The proposed project utilizes rear-loaded garages in order to reduce the dominance of garages within front yard facades.     |

|                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                  |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>1.k:</b> Provide board-on-board fencing on all side yards and rear yards (excluding side yards and rear yards adjacent to major thoroughfares), unless a view corridor is to be maintained.                                                                                                                                                                                                                                                        | <b>Yes.</b> Six-foot-high, wood, board-on-board fencing will be installed along side and rear yards, as applicable, unless other wall materials are required in order to mitigate visual or noise impacts.                                                                                                                       |
| <b>1.l:</b> The architectural treatments (such as sidings, shingles, window, and door trims) established on the front facades of each of the approved house designs shall be carried around to the sides and rear elevations of the buildings, except that masonry veneer treatments at the base of a structure need be carried only partly around the side elevations, to either the adjoining fence line or the closest interior right angle joint. | <b>Yes.</b> All architectural treatments are carried around sides of buildings to the nearest adjoining fence line, right angle, or utility area.                                                                                                                                                                                |
| <b>2.a:</b> Subdivision entry monuments should be provided on new major subdivisions, neighborhoods or villages, if appropriate.                                                                                                                                                                                                                                                                                                                      | <b>Not applicable.</b> The developer has not proposed signage into the subdivision in order to maintain adequate space for pedestrian amenities.                                                                                                                                                                                 |
| <b>2.b:</b> Perimeter wall and/or sound wall pilasters should not be greater than 50 feet on center.                                                                                                                                                                                                                                                                                                                                                  | <b>Conditionally.</b> A proposed condition of approval would require the developer to provide pilasters with a decorative concrete cap at intervals of 25 feet or less along West Leland Road. A decorative wall cap would also be provided along each wall.                                                                     |
| <b>2.c:</b> Sound walls exceeding 6 feet in height and visible from the public right-of-way should be treated with decorative features consistent with the neighborhood design.                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                  |
| <b>2.d:</b> All masonry walls should include a wall cap.                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                  |
| <b>2.e:</b> Retaining walls, exceeding three feet tall, adjacent to a public right-of-way should be constructed with the same materials as used for the sound walls.                                                                                                                                                                                                                                                                                  | <b>Not applicable.</b> The proposed project would not require any retaining walls.                                                                                                                                                                                                                                               |
| <b>2.f:</b> Masonry or sound walls should be staggered when adjacent to public right of ways.                                                                                                                                                                                                                                                                                                                                                         | <b>No.</b> However, staggering the masonry walls along West Leland Road is not considered appropriate because doing so would further reduce the sizes of the adjacent lots, making it tougher to meet the minimum setbacks that are sought for the PD district, as well as reducing the landscape buffer and Class I trail area. |

| <b>2.g:</b> Single story units should be located on corner lots whenever possible.                                                                                                                                                                                                                                       | <b>No.</b> However, staff believes that this guideline is partially intended to incorporate affordability by design. It should be noted that income-restricted accessory dwelling units would be incorporated into at least six homes throughout the subdivision.                                                                                        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>2.h:</b> Developer should select, at least one of the schemes provided in Appendix 1 of the DRDGs for screening all utility boxes, transformers, backflow preventers, meters and junction boxes.                                                                                                                      | <b>Conditionally.</b> A condition of approval would require all utility boxes and/or transformers to be undergrounded. Where undergrounding is deemed infeasible or not recommended by PG&E, utility boxes and/or transformers would be masked by either faux stone utility box covers or a landscape screen.                                            |
| <b>2.i:</b> Construct fence/walls at top down slope banks. Design fence at top of slope to take advantage of potential views.                                                                                                                                                                                            | <b>Not applicable.</b> The site is relatively flat and will not require fences/walls at top down slope banks.                                                                                                                                                                                                                                            |
| <b>2.j:</b> Dwelling unit driveways should align with on-coming street at three-way intersections when possible.                                                                                                                                                                                                         | <b>No.</b> The houses at the end of each motor court are not fully aligned with on-coming traffic. However, given the site constraints and lot configurations, very little can be done to achieve full alignment and no change is considered necessary.                                                                                                  |
| <b>Green Building Design Guideline</b>                                                                                                                                                                                                                                                                                   | <b>Meets Guideline?</b>                                                                                                                                                                                                                                                                                                                                  |
| <b>6.A.1:</b> Solar energy systems should be an option to the homebuyer by the builder.                                                                                                                                                                                                                                  | <b>Conditionally.</b> A condition of approval would require the developer to include, as part of the options package for buyers of single-family houses in the subdivision, an option that offers pre-wiring of the house for photovoltaic (solar) panels.                                                                                               |
| <b>6.A.2:</b> For homes without solar energy systems, green roofs or cool roofs, roofing should include the following features:<br>a) A minimum of 300 square feet of unobstructed roof area facing within 30 degrees of south.<br>b) South facing sloped roofs should be at an angle of approximately 38 degrees.       |                                                                                                                                                                                                                                                                                                                                                          |
| <b>6.A.3:</b> The external design of homes should feature up to date energy efficiency technologies:<br>a) For infill housing, homes without solar energy systems should be covered with a cool roof.<br>b) Roof overhangs should be sized to block the high summer sun but allow the lower winter sun to enter windows. | <b>Conditionally.</b> The project is required to meet the Residential Mandatory Measures specified under the 2016 California Green Building Standards Code, Part 11. A condition of approval would be included requiring the developer to implement additional Residential Voluntary Measures, including cool roofs for reduction of heat island effect. |

|                                                                                                                                                                                       |                                                                                                                            |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| <b>6.A.4:</b> Deciduous trees of approved native species should be planted to the south and west of the home to shade the home during summer and allow solar heat gain during winter. | <b>Conditionally.</b> The proposed landscaping would be required to meet the standards set forth in PMC Section 18.84.310. |
| <b>6.A.5:</b> Secure and convenient storage for at least two bicycles should be provided.                                                                                             | <b>Conditionally.</b> A recommended condition of approval would provide bicycle racks in each garage for secure parking.   |
| <b>6.A.6:</b> Outdoor design and features should maximize landscaping water conservation.                                                                                             | <b>Conditionally.</b> The proposed landscaping would be required to meet the standards set forth in PMC Section 18.84.310. |

# City of Pittsburg

**Community Development Department – Planning Division**

65 Civic Avenue, Pittsburg, CA 94565 | Tel: (925) 252-4920 | Fax: (925) 252-4814

## NOTICE OF PUBLIC HEARING

**NOTICE IS HEREBY GIVEN** that the **CITY COUNCIL** of the City of Pittsburg will conduct a public hearing on:

**DATE:** September 4, 2018  
**TIME:** 7:00 p.m.  
**PLACE:** City Council Chamber at City Hall  
65 Civic Avenue, Pittsburg, California

Concerning the following matter:

---

### **Introduction and Waive First Reading of an Ordinance and Consideration of a Resolution Approving the Alves Ranch Project, AP-18-1348 (RZ, SUBD, DR)**

This is a public hearing on a request to: 1) introduce and waive first reading of an ordinance approving a zoning map amendment and EIR addendum; and 2) adopt a resolution approving a vesting tentative map and design review, to allow for the construction of 346 single-family dwelling units, a 12-acre commercial site, and ancillary features. The project site is located along the north side of West Leland Road, south of State Route 4. Assessor's Parcel Nos. 097-700-001; 097-700-002; and 097-700-005. On August 21, 2018, the Planning Commission considered the proposal in its entirety and adopted Resolution No. 10102, recommending approval of the project.

**PROJECT PLANNER:** Jordan Davis, (925) 252-4015 or [jdavis@ci.pittsburg.ca.us](mailto:jdavis@ci.pittsburg.ca.us)

---

**Why am I receiving this notice?** You are receiving this notice because you have either previously requested notifications from the Planning Division, or a project has been proposed in your neighborhood and all property owners within a minimum 300-foot radius of the project site are required to be notified under the Pittsburg Municipal Code.

#### **Where can I get more information about this project?**

The complete file for this project is available for public inspection at the Planning Division, weekdays during the hours of 8:00 AM to 12:00 PM and 1:00 PM to 5:00 PM. You can also find out more about the project by contacting the project planner listed above.

#### **What can I do if I have comments on the project?**

Comments or objections to the project can be made by writing or through oral testimony during the public hearing. Written comments citing the project name may be emailed to the project planner listed above, or may be mailed or delivered to: Pittsburg Planning Division, 65 Civic Avenue, Pittsburg, CA 94565. You may also register your comments or objections by attending the public hearing on the date and time listed above.

Pursuant to Section 65009 of the California Government Code, if you challenge this matter in court, you may be limited to those issues you or someone else raised at the public hearing described in this notice, or in written correspondence on the matter delivered to this agency at, or prior to the public hearing. Any written correspondence delivered to the Planning Division before the hearing body's action on the matter will become a part of the administrative record.

Pittsburg, CA 94565

## NOTICE OF PUBLIC HEARING

**OFFICE OF THE CITY MANAGER/EXECUTIVE DIRECTOR  
65 Civic Avenue  
Pittsburg, CA 94565**

**DATE:** 8/16/2018

**TO:** Mayor and Council Members

**FROM:** Joe Sbranti, City Manager

**SUBJECT:** Adoption of a City Council Resolution Approving an Option Agreement between the City of Pittsburg and MWF Holdings, LLC for Four City Owned Properties Located at 385 E. 3rd Street, 389 E. 3rd Street, E. 3rd Street, and 495 E. 3rd Street

**MEETING DATE:** 9/4/2018

**EXECUTIVE SUMMARY**

The City of Pittsburg and MWF Holdings, LLC, a Delaware limited liability company (Making Waves), propose to enter into an option agreement (Agreement) for four City owned properties located at 385 E. 3rd Street, 389 E. 3rd Street, E. 3rd Street, and 495 E. 3rd Street, with County Assessor's Parcel Numbers 073-010-005, 073-010-004, 073-010-003, and 073-010-002 respectively (collectively, the "Properties").

**FISCAL IMPACT**

The Properties' collective size is 4.40 acres. Making Waves has made an offer to acquire the Properties for \$11 per square foot for a total value of Two Million, One Hundred Eight Thousand, Three Hundred Four Dollars (\$2,108,304). Because of potential benefits to the public, the City proposed and Making Waves agreed, to construct public benefit projects (Public Benefit Projects) equal to the Properties' value in exchange for the Properties.

Making Waves will commission to have an appraisal completed. If the appraised values of the Properties are higher than \$11/square foot, Making Waves will construct Public Benefit Projects at the higher value.

**RECOMMENDATION**

City Council adopt the Resolution approving the Agreement between the City and Making Waves for the Properties and authorize the City Manager to execute the Agreement and to execute such other documents and take such further actions as may be necessary or

appropriate to carry out the City Council's obligations pursuant to the accompanying Resolution.

## **BACKGROUND**

On July 28, 2016, the Successor Agency for the Redevelopment Agency of the City of Pittsburgh (Successor Agency) transferred the Properties to the City by adoption of Resolution 18-051OSB by the Oversight Board to the Successor Agency.

On August 15, 2016, the City Council adopted Resolution 16-13222, accepting the transfer of the Properties from the Successor Agency.

In April 2018, Making Waves offered to acquire the Properties for \$11 per square foot so that Making Waves may include the Properties to its project site and develop its sports facilities.

## **SUBCOMMITTEE FINDINGS**

Not Applicable

## **STAFF ANALYSIS**

Making Waves has met with the Pittsburgh Unified School District (PUSD) about its proposed project. Making Waves will be submitting an application to PUSD for a charter school and will follow the appropriate procedures related to its application. The City has no oversight responsibilities or authority over PUSD's process or decisions.

In the meantime, Making Waves negotiated and then purchased three privately owned parcels with the situs addresses of 420 E. 3rd Street, 3rd Street, and 595 E. 3rd Street, also known as County Assessor's Parcel Numbers 073-050-001, 073-010-007, and 073-010-013 respectively. In addition, Making Waves is negotiating to acquire the railroad right of way that is adjacent to its properties. Making Waves is proposing to construct and operate a charter school and related amenities on its properties that will include, but are not limited to, seven (7) two-story buildings totaling just under 400,000 square feet to serve up to 2,000 students in grades K through 12, and a track, fields, gymnasium, aquatic center, and tennis courts.

Making Waves approached the City about acquiring the Properties to improve its proposed project. The Properties were made available for purchase on the Long-Range Property Management Plan since its approval in 2014. Staff marketed the Properties to potential developers, but no offer was received.

Staff, therefore, took the necessary steps so that the Oversight Board may consider the transfer and the City may consider acceptance of the Properties. The purpose of the transfer is to develop the Properties into public multi-use facilities with anticipated uses such as gymnasium for various sports like basketball and volleyball, a track, fields, and aquatic center. With the repurposing of the Marina Center as the Sheriff's Academy and the elimination of the Del Monte Center/City Gym, the City no longer had a recreational facility to offer to the community.

The City retained the services of BKF Engineers to draft a conceptual plan for a multi-use facility and the estimated cost for just the gymnasium is approximately Fourteen Million Dollars (\$14,000,000). Due to funding challenges, the City postponed its pursuit of a multi-use facility.

Making Waves' offer to acquire the Properties has provided the community with an opportunity to receive Public Benefit Projects that may not have been possible such as: 1) 8th Street Linear Park Remediation; 2) completion of the balcony at the California Theatre; 3) construction of waterfront access, public space, and installation of a landmark honoring the soldiers who used this area as a point of embarkation; and 4) potential improvements that include, but are not limited to, lane reductions, median modifications, bicycle facilities, and sidewalk (including curb extensions). Making Waves will be required to complete one or more projects, equivalent to the Properties' value.

The City will proceed with the upfront effort necessary to remediate the 8th Street Linear Park which include retaining the services of an environmental consultant to conduct an environmental assessment, prepare a remedial action workplan, submit to and work with the California Department of Toxic Substances Control (DTSC), and prepare a completion report. Staff is trying to mirror Making Waves' schedule with regard to Making Waves' remedial action plan currently under review by DTSC so that the City's mobilization efforts for the remediation of the 8th Street Linear Park may be conducted during Making Waves' remediation effort resulting in a cost savings for mobilization.

The construction of the Making Waves' project and Public Benefit Projects are the subject of environmental review under the California Environmental Quality Act (Public Resources Code sections 21000, et seq.) ("CEQA") and require numerous discretionary approvals and agreements. Nothing in this Agreement shall constitute a commitment by the City to approve CEQA documentation, land use, or any other entitlements or agreements concerning the Making Waves' project or Public Benefit Projects, which shall follow applicable development ordinances and regulations and laws. Upon completion of CEQA the City and Making Waves may consider, approve, and execute a Purchase and Sale Agreement (PSA), Development Agreement (DA), and Joint Use Agreement (JUA). The PSA will identify the terms of the disposition and acquisition of the Properties, the form of payment, and the date to close escrow. The DA will detail the responsibilities and schedules that are placed on the City and Making Waves related to the development. The City will be allowed to have access to the sports facilities on Making Waves' campus which include a track, fields, gymnasium, aquatic center, and tennis courts. Making Waves will have access to the California Theatre for events such as a ceremony or live production. The JUA will specify the types of uses at specific facilities, schedules, and each parties' responsibilities.

By entering into this public-private partnership between the City and Making Waves, the City will receive the benefits of a cleaner park and have access to sports facilities where the City may directly, or through a third party, operate programs and events available to the public without having the multi-million dollar expense of construction.

ATTACHMENTS:     Resolution  
                         Option Agreement

Report Prepared By: Maria M. Aliotti, Director of Community Services

BEFORE THE CITY COUNCIL OF THE CITY OF PITTSBURG

In the Matter of:

Adoption of a City Council Resolution Approving an )  
Option Agreement between the City of Pittsburgh and)  
MWF Holdings, LLC for Four City Owned ) RESOLUTION NO. 18-  
Properties Located at 385 E. 3<sup>rd</sup> Street, 389 E. 3<sup>rd</sup> )  
Street, E. 3<sup>rd</sup> Street, and 495 E. 3<sup>rd</sup> Street )

The Pittsburgh City Council DOES RESOLVE as follows:

Whereas, 385 E. 3<sup>rd</sup> Street, 389 E. 3<sup>rd</sup> Street, E. 3<sup>rd</sup> Street, and 495 E. 3<sup>rd</sup> Street, with County Assessor's Parcel Numbers 073-010-005, 073-010-004, 073-010-003, and 073-010-002 respectively (collectively, the "Properties") were made available for purchase on the Long-Range Property Management Plan since its approval in 2014; and

WHEREAS, to date, no offer was received and on July 28, 2016, the Successor Agency for the Redevelopment Agency of the City of Pittsburgh (Successor Agency) transferred the Properties to the City of Pittsburgh by the adoption of Resolution 18-051OSB by the Oversight Board to the Successor Agency; and

WHEREAS, on August 15, 2016, the City Council adopted Resolution 16-13222, accepting the transfer of the Properties from the Successor Agency; and

WHEREAS, the purpose of the transfer is to develop the Properties into a public multi-use facility with anticipated uses such as gymnasium for various sports like basketball and volleyball, a track and field, and aquatic center. Due to funding challenges, the City postponed its pursuit of the multi-use facility; and

WHEREAS, MWF Holdings, LLC, a Delaware limited liability company (Making Waves), negotiated and then purchased three privately owned properties with the situs addresses of 420 E. 3<sup>rd</sup> Street, 3<sup>rd</sup> Street, and 595 E. 3<sup>rd</sup> Street, also known as County Assessor's Parcel Numbers 073-050-001, 073-010-007, and 073-010-013 respectively. In addition, Making Waves is negotiating to acquire the railroad right of way that adjacent to its properties; and

WHEREAS, Making Waves is proposing to construct and operate a charter school and related amenities on its properties that will include, but are not limited to, seven (7) two-story buildings totaling just under 400,000 square feet to serve up to 2,000 students in grades K through 12, a track, fields, gymnasium, aquatic center, and tennis courts; and

WHEREAS, the Properties' collective size is 4.40 acres. In April 2018, Making Waves offered to acquire the Properties for \$11 per square foot for a total value of Two Million, One Hundred Eight Thousand, Three Hundred Four Dollars (\$2,108,304,000). Making Waves will commission to have an appraisal completed. If the appraised values of the Properties are higher than \$11/square foot, Making Waves will construct public benefit projects at the higher value; and

WHEREAS, Making Waves plans to include the Properties to its project site and

develop the sports facilities for the school. Because of potential benefits to the public, the City proposed and Making Waves agreed, to construct public benefit projects (Public Benefit Projects) which consists of: 1) 8<sup>th</sup> Street Linear Park Remediation; 2) completion of the balcony at the California Theatre; 3) construction of waterfront access, public space, and installation of a landmark honoring the soldiers who used this area as a point of embarkation; and 4) potential improvements that include, but are not limited to, lane reductions, median modifications, bicycle facilities, and sidewalk (including curb extensions). Making Waves will be required to complete one or more projects, equivalent to the Properties' value; and

WHEREAS, the City will proceed with the upfront effort necessary to remediate the 8<sup>th</sup> Street Linear Park which include retaining the services of an environmental consultant to conduct an environmental assessment, prepare a remedial action workplan, submit to and work with the California Department of Toxic Substances Control (DTSC), and prepare a completion report. Staff is trying to mirror Making Waves' schedule with regard to Making Waves' remedial action plan currently under review by DTSC so that the City's mobilization efforts for the remediation of the 8<sup>th</sup> Street Linear Park may be conducted during Making Waves' remediation effort resulting in a cost savings for mobilization

WHEREAS, the City of Pittsburg and Making Waves, propose to enter into an option agreement (Agreement). By entering into this public-private partnership between the City and Making Waves, the City will receive the benefits of having access to the facilities where the City may directly, or through a third party, operate programs and events available to the public without having the multi-million dollar expense of construction.

NOW, THEREFORE, the City Council finds and determines as follows:

Section 1.

All the recitals above are true and correct and incorporated herein.

Section 2.

The City Council hereby adopts the Resolution approving the Agreement for the Properties.

Section 3.

The City Manager is hereby authorized to execute the Agreement and to execute such other documents and take such further actions as may be necessary or appropriate to carry out the City Council's obligations pursuant to this Resolution.

Section 4.

The City Clerk shall certify to the adoption of this Resolution.

Section 5.

This Resolution shall take effect immediately upon adoption.

PASSED AND ADOPTED by the City Council of the City of Pittsburgh at a regular meeting on the 4<sup>h</sup> day of September 2018, by the following vote:

**OPTION AGREEMENT BETWEEN  
THE CITY OF PITTSBURG AND MWF HOLDINGS, LLC,  
ALSO KNOWN AS MAKING WAVES**

This option agreement (this “**Agreement**”) is entered into as of September 4, 2018, by and between the CITY OF PITTSBURG, a municipal corporation (“**City**”) and MWF Holdings, LLC, a Delaware limited liability company (“**Making Waves**”), each a “**Party**” and together the “**Parties**.” This Agreement is based upon the following facts:

A. City owns four (4) parcels of real property in Pittsburg, California (each an “**Option Property**” and collectively the “**Option Properties**”) as follows:

| <u>Address</u>                | <u>Assessor’s Parcel Number</u> | <u>Acreage (+/-)</u> |
|-------------------------------|---------------------------------|----------------------|
| 385 E. 3 <sup>rd</sup> Street | 073-010-005                     | 0.29                 |
| 389 E. 3 <sup>rd</sup> Street | 073-010-004                     | 1.58                 |
| E. 3 <sup>rd</sup> Street     | 073-010-003                     | 1.99                 |
| 495 E. 3 <sup>rd</sup> Street | 073-010-002                     | 0.54                 |
|                               | Total Acreage:                  | 4.40                 |

The Option Properties are depicted on Exhibit A and more particularly described on Exhibit B, both exhibits attached hereto and incorporated herein by this reference.

B. A purpose of this Agreement is to establish procedures and standards for negotiation by the City with Making Waves for (i) a purchase and sale agreement (“**PSA**”) for disposition of the Option Properties and (ii) a Development Agreement (“**DA**”) relating to Making Waves’ proposed project as to the Option Properties and the proposed development of the public benefit projects (as such term is defined below).

C. Making Waves proposes to construct and operate a charter school and related amenities on property that will include the Option Properties including, but not limited to, seven (7) two-story buildings totaling just under 400,000 square feet to serve up to 2,000 students in grades K through 12, and a track, field, aquatic center, tennis courts and gymnasium (collectively, the “**Project**”). The Project will be entitled and constructed in two (2) phases, with the first phase (“**Phase 1**”) consisting of the construction of the school buildings on the parcel with a situs address of 420 E. 3<sup>rd</sup> Street, also known as Assessor’s Parcel Number 073-050-001 and the second phase (“**Phase 2**”) consisting of the construction of athletic fields and related facilities on the Option Properties and the parcels of land owned by a wholly owned affiliate of Making Waves that are adjacent to the Option Properties.

D. As consideration for the purchase of the Option Properties, City has requested, and Making Waves has agreed to consider the construction of certain public benefit projects (the “**Public Benefit Projects**”), that may consist of one or more

projects set forth below, each of which directly benefits the City and which the City would otherwise incur expenses to construct:

| Public Benefit Project                        | Description                                                                                                                                                  |
|-----------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8 <sup>th</sup> Street Linear Park            | Remediation                                                                                                                                                  |
| California Theatre – Balcony                  | Completion of the balcony and second floor of the California Theatre.                                                                                        |
| Waterfront Walkway                            | Provide waterfront access, construct a public space, and install a landmark honoring the soldiers who used this area as a point of embarkation.              |
| E. 3 <sup>rd</sup> Street Public Improvements | Potential improvements include, but are not limited to, lane reductions, median modifications, bicycle facilities, and sidewalk (including curb extensions). |

E. The cost of the construction of the Public Benefit Projects, including Reimbursement Payments associated with the Public Benefit Project, shall be the greater of: (i) the fair market value of the Option Properties, as established by an appraisal prepared by a third party licensed appraiser approved by Making Waves or (ii) Eleven Dollars (\$11.00) per square foot (the "**Required Expenditure**").

F. The Project and Public Benefit Projects are the subject of environmental review under the California Environmental Quality Act (Public Resources Code sections 21000, *et seq.*) ("**CEQA**") and require numerous discretionary approvals and agreements. Nothing in this Agreement shall constitute a commitment by the City to approve CEQA documentation, land use or any other entitlements or agreements concerning the Project or Public Benefit Projects, which shall follow applicable development ordinances and regulations and laws.

G. This Option Agreement recognizes that the Parties agree to negotiate definitive documents and potential approvals to be considered by the City regarding the potential transfer and sale of the Option Properties to Making Waves for Phase 2 of the Project and the construction, completion, and use of the Public Benefit Projects. The Parties agree that no obligation to enter into definitive transaction documents, or any transaction, shall exist by virtue of this Option Agreement and no Project or Public Benefit Projects, or definitive transaction documents shall be deemed to be approved, until after (i) the proposed Project and Public Benefit Projects are reviewed in accordance with the requirements of the CEQA, (ii) any additional conditions or changes to the project based on the CEQA review have been resolved in a manner acceptable to the City, and (iii) all required permits for Phase 1 of the Project and the Public Benefit Projects have been obtained from the City and other governmental authorities with jurisdiction in accordance with applicable laws and regulations.

H. As required by law, the City retains the sole and independent discretion as the lead agency under CEQA to, among other things, balance the benefits of the Project and Public Benefit Projects against any significant environmental impacts prior to taking final action if such significant impacts cannot otherwise be avoided, and determine not

to proceed with the Project Public Benefit Projects. No legal obligations to approve the Project or Public Benefit Projects, the permits for the Project or Public Benefit Projects, or the transaction will exist unless and until the Parties have negotiated, executed, and delivered definitive agreements based upon information produced during the CEQA environmental review process and on other public review and hearing processes, subject to all applicable governmental approvals.

NOW, THEREFORE, for good and valuable consideration, receipt of which is hereby acknowledged, the Parties agree as follows:

Section 1. Grant of Option.

City hereby grants to Making Waves an exclusive option to purchase the Option Properties, subject to the terms and conditions set forth in this Agreement (“**Option**” or “**Options**”). Making Waves anticipates seeking various land use entitlements for the Option Properties. Once the Project's CEQA environmental review process is completed and approved, Making Waves shall have the right in its discretion to exercise the Option to acquire the Option Properties consistent with the terms of this Agreement, the PSA and the DA to be negotiated between the Parties.

Section 2. Consideration.

Upon execution and delivery of this Agreement, Making Waves shall pay to City the sum of One Dollar (\$1.00) as consideration for the Options (the “**Independent Consideration**”). The Independent Consideration is and shall be deemed consideration solely for the granting of the Options by City. On expiration of the Option Term, as defined herein, City shall retain the Independent Consideration, and the Independent Consideration will not be applied to any Purchase Price negotiated under the PSA.

Section 3. Inspections.

3.1 Entry; Indemnity. With at least seven calendar days' prior written notice to the City's Director of Community Services during the term of the Option, Making Waves may enter the Option Properties for purposes of inspection, survey, tests, design of improvements, and other actions reasonably related to the investigation by Making Waves of the suitability of the Option Properties for the Project. Making Waves shall comply with all applicable governmental laws, ordinances, and regulations in the conduct of activity on the Option Properties under this section. Making Waves will indemnify, defend, and hold City, its officers, officials, employees, agents and consultants harmless from any loss, damage, claim, cost, lien, action, liability, or judgment (including, without limitation, City's attorney fees and defense costs) (i) incurred for, from, or by any person or entity acting on behalf of, at the request of, or for the purpose of the actions of Making Waves under this section; and (ii) for personal injury, property damage, or other loss or damage of any kind arising from, resulting from, or in any way related to such entry, except that caused by the sole negligence or willful misconduct of City.

3.2 Minor Changes. With the prior written authorization of the City's Director of Community Services, Making Waves may make minor changes in the Option Properties in the course of any investigation permitted under this section (e.g., soils borings), provided that the change or damage is only temporary, that it is reasonably necessary to the investigation of the physical characteristics of the Option Properties, and that Making Waves repairs such damage and restores the Option Properties to the original condition promptly on completion of the investigation.

3.3 Survival of Obligations. The obligations under this section 3 shall survive the termination of this Agreement or the expiration of the term of the Option for the purpose of Making Waves completing any obligations hereunder.

3.4 Insurance. Making Waves shall secure and maintain at all times during the Option Term (commencing thirty (30) days after the effective date hereof) a broad form commercial general liability policy of insurance, including bodily injury and property damage coverage, written on an "occurrence" basis, with limits of not less than two million dollars (\$2,000,000)/four millions dollars (\$4,000,000), single occurrence/aggregate, insuring against injury to persons or damage to property arising from or in connection with any action permitted under this Agreement; provided however, such limits may be achieved through the use of an Umbrella/Excess Policy. The insurance shall include an endorsement, in a form acceptable to the City Attorney naming as additional insureds the City, its officers, officials, employees, agents and consultants, and specifying that Making Waves insurance is primary, and the City's insurance is non-contributing. Making Waves shall also secure and maintain at all times during the Option Term (commencing thirty (30) days after the effective date hereof) workers' compensation and employers' liability insurance in accordance with California law. Making Waves shall deliver to City a copy of certificate(s) evidencing both insurance coverages, and an endorsement as specified herein, , before entering onto the Option Properties. Making Waves agrees to provide at least thirty days prior written notice to the City of any cancellation, modification, or reduction as to scope or amount of such policies. Making Waves may carry the insurance required to be carried by Making Waves hereunder under a blanket policy of insurance that covers other locations where Making Waves and its affiliates conduct business, provided that such blanket policy shall be endorsed to specifically cover this Agreement and shall provide the same amount and types of coverage for Making Waves' activities under this Agreement that would be provided by a separate policy meeting the requirements of this Section 3.4.

#### Section 4. Reimbursement Payments to City.

(a) As part of the Required Expenditures, Making Waves agrees to provide funds to the City to reimburse for staff and legal costs and expenses incurred by the City, that would normally be borne by the City in connection with this Agreement and Public Benefit Projects ("Reimbursement Payments"). The City will use the non-refundable Reimbursement Payments by Making Waves to reimburse the City for its

reasonable expenses incurred in providing and administering the services necessary and relating to this Agreement and the processing of any application resulting from this Agreement. These services may include the following:

(1) Staff and legal costs incurred by the City in connection with effectuating the terms of this Agreement, including charges by the City Attorney and legal counsel, Community Development or other City departments working with Making Waves;

(2) All environmental analysis in accordance with the requirements of the California Environmental Quality Act; and

(3) Such other analyses or similar matters which are reasonably related to the City's performance under this Agreement. Developer recognizes and accepts that any delay by the Developer in approving such costs and expenses may, in turn, delay the City's review and processing pursuant to this Agreement. Furthermore, Developer recognizes and accepts that Developer's decision to not approve analyses and costs and expenses hereunder may result in the City having insufficient information for good faith negotiation. Neither of these events, should they occur, constitute default or bad faith by the City, as referenced herein.

(4) Such other efforts and related expenses in connection with the Public Benefit Projects that may include but are not limited to assessments, plans and reports, review and oversight, and applications.

(b) Making Waves acknowledges the Reimbursement Payments do not include any additional fees and charges required by law, ordinance or resolution to be paid to the City by Making Waves, such as application fees, inspection fees, and other processing fees for entitlements or permits in connection with the Project that may be required by this Agreement or a possible DA or PSA.

(c) Making Waves shall pay to the City Ten Thousand Dollars (\$10,000) as an initial deposit for the Reimbursement Payments.

(d) Making Waves acknowledges that the nature and scope of the costs and expenses incurred by the City, as described herein, are dependent upon factors that may be largely outside of the control of the City. Accordingly, Making Waves acknowledges and agrees that the amount of the initial Reimbursement Payment made by Making Waves to the City for deposit does not represent an estimate of the actual final costs and expenses of such services that may need to be rendered by the City under this and related Agreements.

(e) City will bill Making Waves on a monthly basis for reasonable costs and expenses incurred by the City under this Agreement, and in conformance with the provisions hereof. The City will provide supporting documentation describing the costs

and expenses incurred and the time involved in each task. To avoid waiver of attorney-client privilege, supporting documentation for legal costs and expenses will be brief summaries. All bills for Reimbursement Payments with the supporting documentation shall be sent to the attention of:

MWF Holdings, LLC  
3220 Blume Dr. Ste 250  
Richmond, CA 94806  
Attention: Steven Roth  
Phone: (510) 243-5203

The City will provide Making Waves, on a monthly basis, costs and expenses deducted from the initial deposit with the supporting documentation describing the costs and expenses incurred and the time involved in each task. Thereafter, if Making Waves fails to make the Reimbursement Payment(s) within thirty (30) days of the date of the bill, or within such greater periods of time as may be provided in the notice or as agreed upon by the Parties in writing, then the City may direct that all negotiations and other actions to be performed under this Agreement be suspended until Making Waves has made such additional Reimbursement Payment(s). Such suspension shall not constitute default by the City as referenced herein.

(f) The Reimbursement Payments under this Agreement shall in no way influence the actions of the City in respect to the matters provided for by this Agreement. Neither Making Waves nor any other person providing funding for the Reimbursement Payments shall, because of such payments under this Agreement, have any expectation as to the results of the good faith negotiations.

#### Section 5. Term; Termination.

5.1 Option Term. The initial term of the Option shall begin on the Effective Date and will expire on the fifth anniversary of the Effective Date.

5.2 Termination by Making Waves. Making Waves may terminate this Agreement and the Option granted under this Agreement, with or without cause, at any time during the Option Term upon thirty (30) days' prior written notice to City.

5.3 Termination by City. From time to time and with thirty (30) days written notice, City may request oral or written progress reports from Making Waves regarding the Project and the Public Benefit Projects. City may terminate the Option upon a reasonable, good faith finding by City that progress in obtaining approvals for the Project or Public Benefit Projects has ceased, become ineffective, or non-productive. City shall provide Making Waves sixty (60) days written notice of its desire to terminate pursuant to this section and Making Waves will have one hundred twenty (120) days in which to cure to the City's reasonable satisfaction.

Section 6. Conditions Precedent to of Exercise of Option. The following must occur prior to the exercise by Developer of the Option to purchase any one of the Parcels:

- (a) CEQA has been completed for the Project.
- (b) City and Making Waves have entered into the following agreements:

- i. *Purchase and Sale Agreement.* Terms of the PSA shall include, but are not limited to, the purchase price and a detailed description of the Public Benefit Projects. The purchase price under the PSA shall consist of the construction of the Public Benefit Projects, including the Reimbursement Payments related to the Public Benefit Projects, for a total amount of not less than the Required Expenditure. Notwithstanding anything contained herein to the contrary, Making Waves may, but shall not be required to, expend more than the Required Expenditure in connection with the construction of the Public Benefit Projects.

- ii. *Development Agreement.* Terms of the DA shall include, but are not limited to, a detailed description of the proposed Project to be constructed on the Option Properties and of the Public Benefit Projects.

- iii. *Joint Use Agreement.* The Parties agree to have joint access to use of certain improvements that are a part of the proposed Public Benefits Projects. The Joint Use Agreement will describe in detail the terms of the use and related responsibilities of each Party.

- (c) Making Waves has received all development entitlements from the Planning Commission and, if appropriate, the City Council, for Phase 1 of the Project and the Public Benefit Projects, which entitlements shall include conditions of approval requiring Making Waves to construct Public Benefits Projects of a value greater than or equal to the Required Expenditure; and

- (d) Making Waves has obtained building permits for Phase 1 of the Project and, to the extent applicable, the Public Benefit Project.

Section 7. Exercise of Option. Developer may exercise the Option by giving written notice to City of its exercise of the Option at any time after the foregoing conditions have been satisfied, specifying a date for the close of escrow at least thirty (30) days after the date of such notice.

Section 8. General Provisions.

8.1 Time is of the Essence. Time is of the essence of this Agreement and is a material term of each and every Option granted herein. If any Option is not exercised as required by this Agreement before expiration of the Option Term, all unexercised Options and all applicable rights of Making Waves shall automatically and

immediately terminate without notice and Making Waves shall have no interest whatever in the Option Properties for which it has not provided an Exercise Notice.

8.2 Memorandum of Option. At the request of either the City or Making Waves, City and Making Waves shall execute and record in the official records of Contra Costa County a memorandum of option.

8.3 Notices. All notices and other communications authorized or required under this Agreement shall be in writing and transmitted by certified mail (return receipt requested), courier, or overnight delivery, and shall be addressed as follows:

City:

City of Pittsburg  
65 Civic Avenue  
Pittsburg, CA 94565  
Attention: City Manager  
Phone: (925) 252-4851  
Fax: (925) 252-4851

Making Waves:

MWF Holdings, LLC  
3220 Blume Dr. Ste 250  
Richmond, CA 94806  
Attention: Steven Roth  
Phone: (510) 243-5203

Notice provided to any Party under this paragraph shall be effective when received by the receiving Party's representative as identified above, or on such date as delivery is refused.

8.4 Assignment. This Agreement inures to the benefit of and binds the Parties and their respective representatives, successors, and permitted assigns. No Party may assign its rights or obligations hereunder without the prior written consent of the other Party.

8.5 Integration. This Agreement constitutes the entire agreement between the Parties regarding an Option on the Option Properties.

8.6 Modification. Any modification of this Agreement shall be in writing and executed by each Party.

8.7 Governing Law. The Parties agree that the laws of the State of California shall govern the construction and implementation of this Agreement.

**8.8 Severability.** If any provision of this Agreement is held by a court of competent jurisdiction to be illegal, unenforceable, or invalid in whole or in part for any reason, the validity and enforceability of the remaining provisions, or portions of them, shall not be affected.

**8.9 Ambiguities.** Each Party and its counsel have participated fully in the review and revision of this Agreement. Any rule of construction to the effect that ambiguities are to be resolved against the drafting Party shall not apply in interpreting this Agreement.

**8.10 Waiver.** No waiver of a breach, failure of any condition, or any right or remedy contained in or granted by the provisions of this Agreement shall be effective unless it is in writing and signed by the Party waiving the breach, failure, right or remedy. No waiver of any breach, failure, right or remedy shall be deemed a waiver of any other breach, failure, right or remedy, whether or not similar, nor shall any waiver constitute a continuing waiver unless the writing so specifies.

**8.11 Headings.** The headings in this Agreement are included for convenience only and shall not affect the construction or interpretation of any provision in this Agreement or any of the rights or obligations of the Parties.

**8.12 No Third Party Beneficiaries.** This Agreement is made and entered into solely for the benefit of the City and Making Waves and no other person shall have any right of action under or by reason of this Agreement.

**8.13 No Joint Venture.** No joint venture, partnership, or other fiduciary relationship shall be deemed to exist or arise with respect to the Project or Public Benefit Projects because of this Agreement.

**8.14 Recitals.** The Recitals incorporated into this Agreement as if fully set forth herein.

**8.15 Execution.** This Agreement may be executed in multiple counterparts, each executed copy of which shall constitute an original of the same instrument. Each Party represents and warrants that each individual executing this Agreement on such Party's behalf has the legal power, right and actual authority to do so

**SIGNATURES ON FOLLOWING PAGE**

By signing below, the Parties evidence their agreement with the provisions of this Option Agreement and agree to use this Option Agreement as the framework for the good faith negotiations of further binding definitive agreements. Any agreements resulting from negotiations will become effective only if and after such agreement has been considered and approved by the City following conduct of all legally required procedures.

Hooper and Co., to the County of Contra Costa, dated July 23, 1925 and recorded August 5, 1925 in Volume 3 of Official Records at page 188, and the westerly boundary of Harbor Street being the west line of the strip of land described as "Parcel 1" in the deed from C.A. Hooper and Co., to the Contra Costa County dated February 25, 1926, and recorded March 4, 1926 in Volume 29 of Official Records, at page 11; thence from said point of beginning along the northerly boundary of the road first above referred to, north 73° 07' west, 100.00 feet; thence north 16° 45'

east, 246.07 feet, to a point on the southerly boundary of the right of way described in a deed from C.A. Hooper and Co., to Atchison, Topeka and Santa Fe Railway Company, dated December 13, 1922, and recorded January 27, 1923 in Volume 428 of Deeds, at page 480; thence easterly along a curve to the right whose radius is 578.81 feet and whose tangent through the last named point bears south  $65^{\circ} 31'$  east, proceeding along the said curve 102.70 feet to a point in the northerly extension of the westerly boundary of Harbor Street; thence south  $16^{\circ} 45'$  west, 223.33 feet, to the point of beginning.

APN: 073-010-002

**OFFICE OF THE CITY MANAGER/EXECUTIVE DIRECTOR  
65 Civic Avenue  
Pittsburg, CA 94565**

**DATE:** 8/20/2018

**TO:** Mayor and Council Members

**FROM:** Joe Sbranti, City Manager

**SUBJECT:** Adoption of a City Council Resolution Approving the Use of Business Improvement District Funds by the Pittsburg Chamber of Commerce for Police and Staff Services for the 2018 Seafood and Music Festival

**MEETING DATE:** 9/4/2018

**EXECUTIVE SUMMARY**

The Pittsburg Chamber of Commerce (Chamber) proposes and the City accepts the use of Business Improvement District (BID) funds for police and staff services for the 2018 Seafood and Music Festival.

**FISCAL IMPACT**

The total BID budget for the cost of police and staff services for the Seafood and Music Festival is \$29,000. The estimated cost for police services is approximately \$27,980. The City Manager, at his discretion, may direct the remaining funds towards additional staff services associated with the event. Funding for this effort will be covered by the business improvement tax collected and therefore, does not impact the City's general fund.

**RECOMMENDATION**

City Council adopt the resolution approving the use of BID funds for police and staff services for the 2018 Seafood and Music Festival in an amount not to exceed \$29,000.

**BACKGROUND**

In 1972, the Chamber was designated as the advisory board for the Business Improvement Area, now known as the BID. The advisory board's role was to advise the City and provide recommendations as to how the business improvement tax is to be used. Since the inception of the BID, the City and the Chamber have shared the business improvement tax collected and the Chamber has used the funds to promote, retain, and attract businesses to the City and develop programs that support local businesses. Because all licensed businesses pay the business improvement tax, the City's direction to the Chamber has been

to provide support to all Pittsburg businesses and not just businesses who are Chamber members.

In addition to providing support to all Pittsburg businesses, the Chamber has been coordinating the Seafood and Music Festival since 1984. It is a two-day, outdoor extravaganza that draws thousands of visitors to Pittsburg every year. The Pittsburg Seafood & Music Festival, now in its 34th year, returns to the beautiful Pittsburg Marina Saturday, September 8 and Sunday, September 9, 2018.

### **SUBCOMMITTEE FINDINGS**

Not Applicable.

### **STAFF ANALYSIS**

The Seafood and Music Festival has long been one of the keystone events in Pittsburg. Having the necessary police and staff services present at the event will ensure that it is a safe and enjoyable environment for the whole family.

ATTACHMENTS:     Resolution

Report Prepared By: Melaine Venenciano, Senior Administrative Analyst

BEFORE THE CITY COUNCIL OF THE CITY OF PITTSBURG

Adoption of a City Council Resolution to Approving the )  
Use of Business Improvement District Funds by the ) RESOLUTION NO. 18-  
Pittsburg Chamber of Commerce for Police and Staff )  
Services for the 2018 Seafood and Music Festival )

The Pittsburg City Council DOES RESOLVE as follows:

WHEREAS, in 1972, the Pittsburg Chamber of Commerce (Chamber) was designated as the advisory board for the Business Improvement Area, now known as the Business Improvement District (BID); and

WHEREAS, the advisory board's role was to advise the City and provide recommendations as to how the business improvement tax is to be used; and

WHEREAS, since the inception of the BID, the City and the Chamber have shared the business improvement tax collected and the Chamber has used the funds to promote, retain, and attract businesses to the City and develop programs that support local businesses. Because all licensed businesses pay the business improvement tax, the City's direction to the Chamber has been to provide support to all Pittsburg businesses and not just businesses who are Chamber members; and

WHEREAS, in addition to providing support to all Pittsburg businesses, the Chamber has been coordinating the Seafood and Music Festival since 1984. It is a two-day, outdoor extravaganza that draws thousands of visitors to Pittsburg every year. The Pittsburg Seafood & Music Festival, now in its 34th year, returns to the beautiful Pittsburg Marina Saturday, September 8 and Sunday, September 9, 2018; and

WHEREAS, having the necessary police services present at the event will ensure that it is a safe and enjoyable environment for the whole family.

NOW THEREFORE, the City Council finds and determines as follows:

Section 1.

All the recitals above are true and correct and incorporated herein.

Section 2.

City Council hereby approves this Resolution and approves the use of BID funds for police and staff services for the 2018 Seafood and Music Festival in an amount not to exceed \$29,000.

Section 3.

The City Manager is hereby authorized to take such further actions as may be necessary or appropriate to carry out the City's obligations pursuant to this Resolution.

Section 4.

The City Clerk shall certify to the adoption of this Resolution.

Section 5.

This Resolution shall take effect immediately upon adoption.

PASSED AND ADOPTED by the City Council of the City of Pittsburg at a regular meeting on the 4th day of September 2018, by the following vote:

**OFFICE OF THE CITY MANAGER/EXECUTIVE DIRECTOR  
65 Civic Avenue  
Pittsburg, CA 94565**

**DATE:** 8/23/2018  
**TO:** Mayor and Council Members  
**FROM:** Joe Sbranti, City Manager  
**SUBJECT:** By Minute Order, Consider Commission Appointment to Vacancy on the Housing Authority Commission  
**MEETING DATE:** 9/4/2018

**EXECUTIVE SUMMARY**

One (1) opening exists on the Housing Authority Commission. Commissioners must be Section 8 tenants of the Pittsburg Housing Authority. The City has advertised for the opening and received two applications. Both applicants were invited to interview with the City Council on August 20 and one applicant was interviewed at that time.

**FISCAL IMPACT**

There is no fiscal impact.

**RECOMMENDATION**

Staff recommends either appointment of an eligible candidate to the Housing Authority Commission opening or continued advertising for the vacancy.

**BACKGROUND**

Staff has advertised for the vacancy and received applications. Two applications were received for the Housing Authority Commission. Both applicants are Section 8 tenants of the Pittsburg Housing Authority. The term will expire on June 30, 2022.

**SUBCOMMITTEE FINDINGS**

Not applicable.

**STAFF ANALYSIS**

On August 20, 2018 the City Council reviewed two applications for appointment to the Housing Authority Commission. On that date candidate interviews were held. The City Clerk's Office received an email from Melissa Griffin withdrawing her application. One candidate was in attendance and was interviewed. There is one vacancy. The candidates are:

S.L Floyd  
Melissa Griffin

Due to the lack of candidates, Council may wish to direct staff to continue advertising for the vacancy.

One (1) case

3. CONFERENCE WITH LEGAL COUNSEL - ANTICIPATED LITIGATION FOR THE CITY OF PITTSBURG; Initiation of litigation pursuant to paragraph (4) of subdivision (d) of Section 54956.9:

Two (2) cases

4. CONFERENCE WITH LABOR NEGOTIATORS (Pursuant to Section 54957.6):

Agency designated representatives: Joe Sbranti, Garrett Evans, Stacy Shell;  
Employee organization: AFSCME Miscellaneous A; AFSCME Management/  
Professional/Confidential; Teamsters Local 856

Vice Mayor Evola stated there was no reportable action taken in Closed Session.

## **ROLL CALL**

Mayor Longmire was absent and excused.

## **PLEDGE OF ALLEGIANCE**

The Pledge of Allegiance was recited.

## **CITY MANAGER'S REMARKS**

Assistant City Manager Evans reported on upcoming events throughout the city.

## **CITIZENS REMARKS**

Tim Manley, representing Pittsburg PAL, introduced the junior high and high school students that participated in the Next Generation to Save Lives CPR training. 23 students participated and he looked forward to continuing these training sessions in the future.

Bob Atlas, Battalion Chief with the Fire District, gave updates of activities in July. He also stated Hazmat 21 out of Station 87 was the first in California to be awarded the Type 2 Hazardous Material Unit by Cal OES.

Rosamaria Corral, Pittsburg, commented on the ongoing problem with their property and the notice of violation that they received to remove a portion of their building within 15 days.

Mike Nazari, Pittsburg, also commented on the problem with their property and the notice of violation.

## **PUBLIC HEARING**

Vice Mayor Evola recused himself from the following item due to his financial interests and his employer which this item is related to. Vice Mayor Evola left the dais at this time.

Member Banales presided over the next item.

8. Introduction and Waive First Reading of an Ordinance Amending Title 18 of the Pittsburg Municipal Code Related to Permitting Small Recycling Facilities and Mail Order or Direct Selling Establishments in the M District AP-17-1235 (RZ)

Mayor Longmire asked that the item be continued in his absence so that he can participate in the discussion and vote.

As there were no speakers for the item, Member Banales called for a vote to continue the item.

On motion by Member Craft, seconded by Member Killings to continue the item to September 4 and approved by the following vote:

AYES: Banales, Craft, Killings  
ABSENT: Evola [Recused], Longmire

Vice Mayor Evola returned to the dais at this time.

### **CONFLICT OF INTEREST STATEMENT**

There were no conflicts of interests on items on the Consent Calendar.

### **COMBINED CITY COUNCIL, PITTSBURG ARTS AND COMMUNITY FOUNDATION, PITTSBURG POWER COMPANY, AND SUCCESSOR AGENCY CONSENT CALENDAR**

On motion by Member Craft, seconded by Member Banales to adopt, and carried by the following vote:

AYES: Banales, Craft, Evola, Killings  
ABSENT: Longmire

9. Minutes of August 6, 2018
10. Adoption of a City Council Resolution to Amend Staffing Allocation in the City Manager's Office
11. Adoption of a City Council Resolution Approving an Exclusive Negotiating Rights Agreement between the City of Pittsburg and Global Resources Trading LLC for four Waterfront Parcels (APNs 085-071-030, 085-071-046, 085-071-038, 085-290-001)
12. Adoption of a City Council Resolution to Approve an Easement to PG&E at East 14th Street and Pittsburg-Antioch Highway
13. Adoption of a City Council Resolution to Create a Master Pay Schedule as Required by California Public Employees' Retirement System
14. Receive and File the Treasurer's Report for the Quarter Ending June 30, 2018

### **COUNCIL MEMBER REPORTS/REMARKS**

Member Craft attended several events over the weekend. The Yacht Club was unable to accommodate the Poker Run on the Delta so the City stepped in to help. That event was attended by some 300 people. That night was the Zinfandel Dinner which was well attended. Member Craft thanked staff for that event. She also attended the Jazz, Blues and Funk Concert on Saturday, which was also a success. Overall she expected some 2500 people came to the downtown area over the weekend.

Member Banales attended the TRANSPLAN meeting with a presentation on the Concord Naval Weapons Station reuse project which anticipates 12,000 housing units. Discussion at TRANSPLAN surrounded regional traffic concerns when this project begins.

Vice Mayor Evola thanked Member Banales for attending the TRANSPLAN meeting in his stead and noted that the agency is mindful of the mitigation fees that East County has been paying in the past that Concord will have to step forward to participate in.

Vice Mayor Evola also thanked City Attorney Ruthann Ziegler for her service the last 14 years and noted that this is her last meeting with the City. On behalf of the Mayor and Council Members, City Attorney Ziegler was given an Anchor Award in commemoration of her service.

### **ADJOURNMENT**

The City Council meeting was adjourned at 7:35 P.M. to September 17, 2018.

Respectfully submitted,

Alice E. Evenson, City Clerk

**OFFICE OF THE CITY MANAGER/EXECUTIVE DIRECTOR  
65 Civic Avenue  
Pittsburg, CA 94565**

**DATE:** 8/15/2018

**TO:** Chair and Agency Members

**FROM:** Joe Sbranti, Executive Director

**SUBJECT:** Adoption of a Pittsburg Power Company Resolution Approving a Purchase and Sale Agreement, a Loan Agreement, a Promissory Note, and a Deed of Trust and Security Agreement between the Pittsburg Power Company and Natalie Cooper for 615 Railroad Avenue

**MEETING DATE:** 9/4/2018

**EXECUTIVE SUMMARY**

The Pittsburg Power Company, a Joint Powers Authority (PPC, Seller, or Beneficiary) and Natalie Cooper, an individual, doing business as Lumpy's Diner Pittsburg (Buyer, Borrower, or Trustor), propose to enter into a purchase and sale agreement (PSA) and loan agreement, promissory note, and deed of trust and security agreement (collectively, the Loan Documents") for the purchase and sale of 615 Railroad Avenue, also known as County Assessor's Parcel Numbers 085-171-012 (Property).

**FISCAL IMPACT**

PPC and the Buyer have negotiated a purchase price of \$348,206.08 (Purchase Price). PPC will carry the acquisition loan at an interest rate of 5% for a 20-year term.

**RECOMMENDATION**

PPC Board adopt the Resolution and approve the PSA and the Loan Documents between PPC and the Buyer for the purchase and sale of the Property at the Purchase Price.

**BACKGROUND**

On March 18, 2013, PPC adopted Resolution 13-276, approving a lease agreement between PPC and the Buyer for the Property. The lease term expired February 28, 2018 and is now a month-to-month lease.

PPC commissioned an appraisal, dated February 28, 2018, from Smith & Associates, who appraised the Property at \$325,000.

On April 5, 2018, PPC received an offer from the Buyer of \$300,000 to purchase the Property. This offer's date was later revised to May 7, 2018.

Because the appraisal was perceived to be too low, PPC commissioned a second appraisal, dated June 27, 2018, from Krauss Appraisal, who appraised the Property at \$360,000.

The Parties negotiated and agreed to a purchase price of \$360,000 with four months total rent of \$11,793.92, from June-September 2018, to be applied as a credit since the Parties were negotiating the potential purchase and sale during this period. As a result of the credit, the purchase price is \$348,206.08.

### **SUBCOMMITTEE FINDINGS**

Not Applicable

### **STAFF ANALYSIS**

Currently, the lease payments that PPC receives from the Property is \$2,948.48. PPC proposes to carry the Buyer's acquisition loan of \$348,206.08 at 5% for a 20-year term. If approved, the monthly loan payments that PPC will receive from the Buyer is \$2,298.01. Although the loan payment is less than the lease payment, PPC will still see a savings since it will no longer be responsible for the major maintenance of the Property.

The Buyer has owned and operated Lumpy's Diner Pittsburg since 2013 and has run a successful business. The Buyer is invested in Pittsburg's Old Town and the community. The Buyer's acquisition of the Property will provide some assurance that a thriving business will remain in Pittsburg and continue to serve the community.

Purchase and Sale Agreement  
Loan Agreement  
Promissory Note  
Deed of Trust and Security Agreement

Report Prepared By: Maria M. Aliotti, Director of Community Services

BEFORE THE PITTSBURG POWER COMPANY OF THE CITY OF PITTSBURG

In the Matter of:

Adoption of a Pittsburg Power Company Resolution     )  
Approving a Purchase and Sale Agreement, a Loan     )  
Agreement, a Promissory Note, and a Deed of Trust     )     RESOLUTION NO. 18-  
And Security Agreement between the Pittsburg Power     )  
Company and Natalie Cooper for 615 Railroad Avenue)

The Pittsburg Power Company DOES RESOLVE as follows:

Whereas, on March 18, 2013, the Pittsburg Power Company, a Joint Powers Authority (PPC, Seller, or Beneficiary) adopted Resolution 13-276, approving a lease agreement between PPC and Natalie Cooper, an individual, doing business as Lumpy's Diner Pittsburg (Buyer, Borrower, or Trustor) for 615 Railroad Avenue, also known as County Assessor's Parcel Numbers 085-171-012 (Property). The lease term expired February 28, 2018 and is now a month-to-month lease; and

WHEREAS, PPC commissioned an appraisal, dated February 28, 2018, from Smith & Associates, who appraised the Property at \$325,000; and

WHEREAS, on April 5, 2018, PPC received an offer from the Buyer of \$300,000 to purchase the Property. This offer's date was later revised to May 7, 2018; and

WHEREAS, because the appraisal was perceived to be too low, PPC commissioned a second appraisal, dated June 27, 2018, from Krauss Appraisal, who appraised the Property at \$360,000; and

WHEREAS, the Parties negotiated and agreed to a purchase price of \$360,000 with four months total rent of \$11,793.92, from June-September 2018, to be applied as a credit since the Parties were negotiating the potential purchase and sale during this period. As a result of the credit, the purchase price is \$348,206.08; and

WHEREAS, PPC and the Buyer propose to enter into a purchase and sale agreement (PSA) and loan agreement, promissory note, and deed of trust and security agreement (collectively, the "Loan Documents") for the purchase and sale of the Property; and

WHEREAS, PPC will carry the acquisition loan at an interest rate of 5% for a 20-year term, commencing October 1, 2018.

NOW, THEREFORE, the Pittsburg Power Company Board of Directors finds and determines as follows:

Section 1.

All the recitals above are true and correct and incorporated herein.

Section 2.

The PPC Board hereby adopts the Resolution approving the PSA and Loan Documents between PPC and the Buyer.

Section 3.

The principal balance and interest shall be repaid over the term of two hundred thirty-nine (239) equal monthly payments of Two Thousand Two Hundred Ninety-eight Dollars and One Cent (\$2,298.01) and one (1) final payment of Two Thousand Two Hundred Eighty-Eight Dollars and Forty-Seven Cents (\$2,288.47). The first (1<sup>st</sup>) Monthly Payment shall be due October 1, 2018 and the first (1<sup>st</sup>) of every month thereafter.

Section 4.

The Executive Director is hereby authorized to execute the PSA and Loan Documents and to execute such other documents and take such further actions as may be necessary or appropriate to carry out the PPC Board's obligations pursuant to this Resolution.

Section 5.

The Executive Secretary shall certify to the adoption of this Resolution.

Section 6.

This Resolution shall take effect immediately upon adoption.

PASSED AND ADOPTED by the Pittsburg Power Company Board of Directors at a regular meeting on the 4<sup>th</sup> Day of September 2018, by the following vote:

## PURCHASE AND SALE AGREEMENT AND JOINT ESCROW INSTRUCTIONS

THIS PURCHASE AND SALE AGREEMENT AND JOINT ESCROW INSTRUCTIONS ("this **Agreement**") is entered into as of September 4, 2018 (the "**Effective Date**"), by and between the Pittsburg Power Company, a Joint Powers Authority ("**Seller**") and Natalie Cooper, an individual, doing business as Lumpy's Diner in Pittsburg ("**Buyer**"). Seller and Buyer are collectively referred to herein as the "**Parties.**"

### RECITALS

A. Seller is the owner of certain real property located at 615 Railroad Avenue, known as APN No. 085-171-012, in the City of Pittsburg (the "**Property**"), as more particularly described in Exhibit A attached hereto and incorporated herein by this reference.

B. The Parties entered into a lease agreement (the "**Lease**") of the Property on March 1, 2013 Property which expired February 28, 2018.

C. The Buyer is currently leasing the Property on a month-to-month basis while the Parties negotiated the terms of Buyer's purchase of the Property.

D. Krauss Appraisal, MAI appraiser, prepared an appraisal to determine the fair market value of the Property (the "**Appraisal**").

E. According to the Appraisal, the fair market value of the Property is Three Hundred Sixty Thousand Dollars (\$360,000).

F. Buyer has reviewed the Appraisal and has agreed to pay Three Hundred Sixty Thousand Dollars (\$360,000) (the "**Purchase Price**").

G. The parties have negotiated and agreed that the total lease payments of Eleven Thousand Seven Hundred Ninety-Three Dollars and Ninety-Two Cents (\$11,793.92) from June-September 2018 will be applied as the down payment on the Purchase Price, resulting in a remaining amount due of Three Hundred Forty-Eight Thousand Two Hundred Six Dollars and Eight Cents (\$348,206.08).

G. Buyer agrees to purchase the Property, and Seller agrees to sell the Property to Buyer, subject to the terms and conditions of this Agreement.

NOW, THEREFORE, for and in consideration of the mutual covenants and agreements contained in this Agreement, and other good and valuable consideration, the receipt and adequacy of which is hereby acknowledged by the Parties, Seller and Buyer hereby agree as follows:

1. INCORPORATION OF RECITALS AND EXHIBITS. The Recitals set forth above and the Exhibits attached to this Agreement are each incorporated into the body of this Agreement as if set forth in full.

2. PURCHASE AND SALE.

2.1 Agreement to Buy and Sell. Subject to the terms and conditions set forth herein, Seller agrees to sell the Property to Buyer, and Buyer hereby agrees to acquire the Property from Seller.

2.2 Purchase Price. The purchase price for the Property to be paid by Buyer to Seller (the "**Purchase Price**") is Three Hundred Sixty Thousand Dollars (\$360,000).

2.3 Payment of Purchase Price. The Buyer will enter into a loan agreement with the Seller, to be evidenced by a promissory note and secured by a deed of trust (collectively, the "**Loan Documents**"), in the amount of Three Hundred Forty-Eight Thousand Two Hundred Six Dollars and Eight Cents (\$348,206.08) (the "**Loan**") for the payment of the remaining amount of the Purchase Price.

3. ESCROW.

3.1 Escrow Account. Seller has opened an escrow account (the "**Escrow**") maintained by Old Republic Title Company (the "**Title Company**"), 1000 Burnett Ave, Suite 400, Concord, CA 94520 Attn: Jennifer Quigley (the "**Escrow Holder**"), with interest accruing, if applicable, to the benefit of Buyer. Escrow Holder shall perform all escrow and title services in connection with this Agreement.

3.2 Opening of Escrow. Within seven (7) business days after the Effective Date, the Parties will deposit into Escrow the fully executed Agreement, or executed counterparts thereto. The date such fully executed Agreement is received by Escrow Holder will be deemed the "**Opening of Escrow**" and Escrow Holder will give written notice to the Parties of such occurrence.

3.3 Buyer's Deposit. Buyer and Seller hereby agree that Buyer's lease payments in the amount of Eleven Thousand Seven Hundred Ninety-Three Dollars and Ninety-Two Cents (\$11,793.92) constitute the deposit (the "**Deposit**") for the purchase of the Property. Seller has already received the Deposit, and therefore there will be no initial deposit into escrow.

3.4 Satisfaction of Due Diligence Contingency. Buyer shall have the right, in its sole discretion, to terminate this Agreement for any reason prior to the expiration of the Due Diligence Contingency Period (as defined in Section 5.2 (a) below) if Buyer disapproves any due diligence items or approves all due diligence items ("**Approval Notice**"). If Buyer disapproves any items through the delivery of the Approval Notice to Seller before 5:00 p.m. on the last day of the Due Diligence Contingency Period, this Agreement shall terminate, and all amounts deposited by Buyer into escrow, if applicable, (except the Independent Consideration as defined in Section 3.5 below),

together with interest thereon, if any, will be returned to Buyer, and neither party shall have any further rights or obligations hereunder except those which expressly survive the termination hereof. Notwithstanding the foregoing, if Buyer fails to deliver its Notice of Approval prior to the expiration of the Due Diligence Period, it will be deemed Buyer's election not to proceed with the purchase of the Property and to terminate this Agreement and Buyer and Seller shall have no further obligations to each other except for any obligations which expressly survive termination.

3.5 **Independent Consideration.** As independent consideration for Seller's entering into this Agreement to sell the Property to Buyer, Buyer shall deliver the sum of Ten Dollars (\$10.00) to Seller through Escrow ("**Independent Consideration**"). In the event that Buyer terminates this Agreement in accordance with Section 3.4 above, Seller shall retain the Independent Consideration; in the event that Buyer does not terminate this Agreement as aforesaid, the Independent Consideration shall be applied to the Purchase Price at Closing.

#### 4. PROPERTY DISCLOSURE REQUIREMENTS.

4.1 **Condition of Title/Preliminary Title Report.** Escrow Holder shall deliver a Preliminary Title Report for the Property (the "**Preliminary Report**") to Buyer within five (5) days after the Opening of Escrow. Buyer shall have until the end of the Due Diligence Contingency Period to approve the condition of title to the Property. If Buyer delivers the Approval Notice, Buyer agrees to take title to the Property subject to the following "**Permitted Exceptions**:" (a) standard printed exceptions in the Preliminary Report; (b) general and special real property taxes and assessments constituting a lien not yet due and payable; and (c) the Schedule B exceptions to the title referenced in the Approval Notice.

4.2 **Environmental and Natural Hazards Disclosure.** California Health & Safety Code section 25359.7 requires owners of non-residential real property who know, or have reasonable cause to believe, that any release of hazardous substances are located on or beneath the real property to provide written notice of same to the buyer of real property. Other applicable laws require Seller to provide certain disclosures regarding natural hazards affecting the Property. Seller agrees to make all necessary disclosures required by law.

#### 5. CLOSING AND PAYMENT OF PURCHASE PRICE.

5.1 **Closing.** The closing (the "**Closing**" or "**Close of Escrow**") will occur no later than thirty (30) days after the Effective Date ("**Closing Date**"). In the event the Closing has not occurred within sixty (60) days after the Effective Date due to a delay beyond the Buyer's control, then Close of Escrow may be extended up to an additional thirty (30) days (the "**Extension Period**") at the sole discretion of the Executive Director of the Seller. If Close of Escrow has not occurred by the end of the Extension Period, Seller or Buyer may elect to terminate this Agreement.

5.2 Buyer's Conditions to Closing. Buyer's obligation to purchase the Property is subject to the satisfaction of all of the following conditions or Buyer's written waiver thereof (in Buyer's sole discretion) on or before the Closing Date:

(a) Buyer will have fifteen (15) days from Opening of Escrow (the "**Due Diligence Contingency Period**") to review and either approve or disapprove, in Buyer's sole and absolute discretion, the economic viability of the purchase of the Property for Buyer's intended use and all matters related thereto, including but not limited to physical inspections and to conduct any studies or evaluations of the Property. Seller shall provide to Buyer copies of all reasonably available and known documents relating to the ownership and operation of the Property, including but not limited to plans, permits and reports (environmental, structural, mechanical, engineering and land surveys) that Seller has in its possession not later than five (5) business days following the execution and delivery of this Agreement. Buyer hereby agrees to indemnify and hold Seller harmless for any damage to the Property caused (but not merely revealed) by Buyer's inspections.

(b) Seller has performed all obligations to be performed by Seller pursuant to this Agreement.

(c) Seller's representations and warranties herein are true and correct in all material respects as of the Closing Date.

(d) The Title Company is irrevocably committed to issue a CLTA Title Policy to Buyer, effective as of the Closing Date, insuring title to Buyer in the full amount of the Purchase Price subject only to the Permitted Exceptions.

5.3 Seller's Conditions to Closing. The Close of Escrow and Seller's obligation to sell and convey the Property to Buyer are subject to the satisfaction of the following conditions or Seller's written waiver (in Seller's sole discretion) of such conditions on or before the Closing Date:

(a) Buyer has performed all obligations to be performed by Buyer pursuant to this Agreement before Closing Date.

(b) Buyer's representations and warranties set forth herein are true and correct in all material respects as of the Closing Date.

(c) Buyer has executed (i) loan agreement between the Seller and Buyer in the amount of the Loan; (ii) a promissory note evidencing the Loan; and (iii) a deed of trust securing the Loan.

5.4 Conveyance of Title.

(a) Seller will deliver marketable fee simple title to Buyer at the Closing, subject only to the Permitted Exceptions.

(b) Buyer agrees the Property will be purchased by, conveyed to, and accepted by Buyer in its condition at the Closing **“AS IS, WHERE IS, WITH ALL FAULTS”**, with no warranty, express or implied, by Seller as to the physical condition including, but not limited to, the soil, its geology, or the presence of known or unknown faults or Hazardous Materials or hazardous waste (as defined by state and federal law); provided, however, that the foregoing shall not relieve Seller from disclosure of any such conditions of which Seller has actual knowledge and no patent or latent defect in the condition of the Property, whether or not known or discovered, shall give rise to any claim or cause of action against Seller. Any documents related to the Property and provided to Buyer by Seller are furnished as a courtesy to Buyer and without warranty from or recourse to Seller.

#### 5.5 Deliveries at Closing.

(a) Deliveries by Seller. Seller shall deposit into the Escrow for delivery to Buyer at Closing: (i) a grant deed; (ii) an affidavit or qualifying statement which satisfies the requirements of paragraph 1445 of the Internal Revenue Code of 1986, as amended, any regulations thereunder (the **“Non-Foreign Affidavit”**); (iii) a California Franchise Tax Board form 590 to satisfy the requirements of California Revenue and Taxation Code Section 18805(b) and 26131; (iv) Seller shall deposit into the Escrow at Closing immediately available funds in the amount of Seller’s closing costs; (v) the executed Loan Documents; (vi) such resolutions, authorizations, or other documents or agreements relating to Seller as shall be reasonably required by Title Company, and (vii) all other documents required by this Agreement to complete the Closing.

(b) Deliveries by Buyer. Buyer shall deposit into the Escrow at Closing the following: (i) the executed Loan Documents; (ii) the escrow fees and recording fees; and (iii) the cost of the Title Policy; (iv) such resolutions, authorizations, or other documents or agreements relating to Buyer as shall be reasonably required by Title Company, and (v) all other documents required by this Agreement to complete the Closing.

(c) Closing. Upon Closing, Escrow Holder shall: (i) record the grant deed and deed of trust; (ii) deliver to Seller fully executed Loan Documents; (iii) deliver to Buyer the Non-Foreign Affidavit, the California Certificate and the original recorded grant deed; (iv) pay any commissions and other expenses payable through escrow; and (v) distribute to itself the payment of escrow fees and expenses required hereunder.

(d) Closing Costs. Buyer and Seller will pay all escrow fees (including the costs of preparing documents and instruments), recording fees, title report, and title insurance at a 50/50 split. Seller will pay all governmental conveyance fees and all transfer taxes and Natural Hazard Disclosure Report.

(e) Pro-Rations. At the close of escrow, the Escrow Agent shall make the following prorations: (i) property taxes will be prorated as of the Close of Escrow

based upon the most recent tax bill available, including any property taxes which may be assessed after the close of escrow but which pertain to the period prior to the transfer of title to the Property to Buyer, regardless of when or to whom notice thereof is delivered; and (ii) any bond or assessment that constitutes a lien on the Property at the Close of Escrow will be assumed by Buyer. Seller does not pay property taxes.

6. REPRESENTATIONS, WARRANTIES AND COVENANTS.

6.1 Seller's Representations, Warranties and Covenants. In addition to the representations, warranties and covenants of Seller contained in other sections of this Agreement, Seller hereby represents, warrants and covenants to Buyer that the statements below in this Section 6.1 are each true and correct as of the Closing Date provided however, if to Seller's actual knowledge any such statement becomes untrue prior to Closing, Seller will notify Buyer in writing and Buyer will have three (3) business days thereafter to determine if Buyer wishes to proceed with Closing. If Buyer determines it does not wish to proceed, then the terms of Section 6.2 will apply.

(a) Authority. Seller is a Joint Powers Authority, lawfully formed, in existence and in good standing under the laws of the State of California. Seller has the full right, capacity, power and authority to enter into and carry out the terms of this Agreement. This Agreement has been duly executed by Seller, and upon delivery to and execution by Buyer is a valid and binding agreement of Seller.

(b) Encumbrances. Seller has not alienated, encumbered, transferred, mortgaged, assigned, pledged, or otherwise conveyed its interest in the Property or any portion thereof, nor entered into any Agreement to do so, and there are no liens, encumbrances, mortgages, covenants, conditions, reservations, restrictions, easements or other matters affecting the Property, except as disclosed in the Preliminary Report. Seller will not, directly or indirectly, alienate, encumber, transfer, mortgage, assign, pledge, or otherwise convey its interest prior to the Close of Escrow, as long as this Agreement is in force.

(c) There are no agreements affecting the Property except those which have been disclosed by Seller. There are no agreements which will be binding on the Buyer or the Property after the Close of Escrow, which cannot be terminated on thirty (30) days prior written notice.

The truth and accuracy of each of the representations and warranties, and the performance of all covenants of Seller contained in this Agreement are conditions precedent to Buyer's obligation to proceed with the Closing hereunder. The foregoing representations and warranties shall survive the expiration, termination, or close of escrow of this Agreement and shall not be deemed merged into the deed upon closing.

6.2 Buyer's Representations and Warranties. In addition to the representations, warranties and covenants of Buyer contained in other sections of this Agreement, Buyer hereby represents, warrants and covenants to Seller that the statements below in this Section 6.2 are each true as of the Effective Date, and, if to

Buyer's actual knowledge any such statement becomes untrue prior to Closing, Buyer shall so notify Seller in writing and Seller shall have at least three (3) business days thereafter to determine if Seller wishes to proceed with Closing.

(a) Buyer is an individual. Buyer has the full right, capacity, power and authority to enter into and carry out the terms of this Agreement. This Agreement has been duly executed by Buyer, and upon delivery to and execution by Seller shall be a valid and binding agreement of Buyer.

(b) Buyer is not bankrupt or insolvent under any applicable federal or state standard, has not filed for protection or relief under any applicable bankruptcy or creditor protection statute, and has not been threatened by creditors with an involuntary application of any applicable bankruptcy or creditor protection statute.

The truth and accuracy of each of the representations and warranties, and the performance of all covenants of Buyer contained in this Agreement are conditions precedent to Seller's obligation to proceed with the Closing hereunder.

7. REMEDIES In the event of a breach or default under this Agreement by Seller, if such breach or default occurs prior to Close of Escrow, Buyer reserves the right to either (a) seek specific performance from Seller or (b) to do any of the following: (i) to waive the breach or default and proceed to close as provided herein; (ii) to extend the time for performance and the Closing Date until Seller is able to perform; or (iii) to terminate this Agreement upon written notice to Seller, whereupon Seller shall cause Escrow Holder to return to Buyer any and all sums placed into the Escrow by Buyer, and except for the rights and obligations expressly provided to survive termination of this Agreement, neither party shall have any further obligations or liabilities hereunder. IN THE EVENT OF A BREACH OR DEFAULT HEREUNDER BY BUYER AND THE CLOSING DOES NOT OCCUR DUE TO SUCH DEFAULT, SELLER'S SOLE REMEDY SHALL BE TO RETAIN THE DEPOSITS AS LIQUIDATED DAMAGES. THE PARTIES AGREE THAT IN SUCH INSTANCE, THE DEPOSITS REPRESENT A REASONABLE APPROXIMATION OF SELLER'S DAMAGES AND ARE NOT INTENDED AS A FORFEITURE OR PENALTY BUT RATHER AN ENFORCEABLE LIQUIDATED DAMAGES PROVISION PURSUANT TO CALIFORNIA CIVIL CODE SECTION 1671, ET SEQ. IN NO EVENT SHALL EITHER PARTY BE ENTITLED TO LOST PROFITS OR CONSEQUENTIAL DAMAGES AS A RESULT OF THE OTHER PARTY'S BREACH OF THIS AGREEMENT.

Buyer's Initials

\_\_\_\_\_  
Seller's Initials

8. BROKERS. Seller represents that no real estate broker has been retained by Seller in the sale of the Property or the negotiation of this Agreement. Buyer represents that no real estate broker has been retained by Buyer in the procurement of the Property or negotiation of this Agreement. Buyer shall indemnify, hold harmless and defend Seller from any and all claims, actions and liability for any breach of the preceding sentence, and any commission, finder's fee, or similar charges arising out of Buyer's conduct.

9. ASSIGNMENT. Absent an express signed written agreement between the Parties to the contrary, neither Seller nor Buyer may assign its rights or delegate its duties under this Agreement without the express written consent of the other, which consent may be withheld for any reason. No permitted assignment of any of the rights or obligations under this Agreement shall result in a novation or in any other way release the assignor from its obligations under this Agreement.

10. MISCELLANEOUS.

10.1 Attorneys' Fees. If any party employs counsel to enforce or interpret this Agreement, including the commencement of any legal proceeding whatsoever (including insolvency, bankruptcy, arbitration, mediation, declaratory relief or other litigation), the prevailing party shall be entitled to recover its reasonable attorneys' fees and court costs (including the service of process, filing fees, court and court reporter costs, investigative fees, expert witness fees, and the costs of any bonds, whether taxable or not) and shall include the right to recover such fees and costs incurred in any appeal or efforts to collect or otherwise enforce any judgment in its favor in addition to any other remedy it may obtain or be awarded. Any judgment or final order issued in any legal proceeding shall include reimbursement for all such attorneys' fees and costs. In any legal proceeding, the "prevailing party" shall mean the party determined by the court to most nearly prevail and not necessarily the party in whose favor a judgment is rendered.

10.2 Interpretation. This Agreement has been negotiated at arm's length and each party has been represented by independent legal counsel in this transaction and this Agreement has been reviewed and revised by counsel to each of the Parties. Accordingly, each party hereby waives any benefit under any rule of law (including Section 1654 of the California Civil Code) or legal decision that would require interpretation of any ambiguities in this Agreement against the drafting party.

10.3 Survival. All indemnities, covenants, representations and warranties contained in this Agreement shall survive Close of Escrow.

10.4 Successors. Except as provided to the contrary in this Agreement, this Agreement shall be binding on and inure to the benefit of the Parties and their successors and assigns.

10.5 Governing Law. This Agreement shall be construed and interpreted in accordance with the laws of the State of California.

10.6 Integrated Agreement; Modifications. This Agreement contains all the agreements of the Parties concerning the subject hereof any cannot be amended or modified except by a written instrument executed and delivered by the parties. There are no representations, agreements, arrangements or understandings, either oral or written, between or among the parties hereto relating to the subject matter of this Agreement that are not fully expressed herein. In addition there are no representations, agreements, arrangements or understandings, either oral or written, between or among the Parties

upon which any party is relying upon in entering this Agreement that are not fully expressed herein.

10.7 Severability. If any term or provision of this Agreement is determined to be illegal, unenforceable, or invalid in whole or in part for any reason, such illegal, unenforceable, or invalid provisions or part thereof shall be stricken from this Agreement, any such provision shall not be affected by the legality, enforceability, or validity of the remainder of this Agreement. If any provision or part thereof of this Agreement is stricken in accordance with the provisions of this Section, then the stricken provision shall be replaced, to the extent possible, with a legal, enforceable and valid provision this is in keeping with the intent of the Parties as expressed herein.

10.8 Notices. Any delivery of this Agreement, notice, modification of this Agreement, collateral or additional agreement, demand, disclosure, request, consent, approval, waiver, declaration or other communication that either party desires or is required to give to the other party or any other person shall be in writing. Any such communication may be served personally, or by nationally recognized overnight delivery service (i.e., Federal Express) which provides a receipt of delivery, or sent by prepaid, first class mail, return receipt requested to the party's address as set forth below:

To Buyer: Natalie Cooper  
?  
Pittsburg, CA 94565

To Seller: Pittsburg Power Company  
65 Civic Avenue  
Pittsburg, CA 94565  
Attn: Executive Directory

To Escrow Holder: Old Republic Title Company  
1000 Burnett Avenue, Suite 400  
Concord CA 94520  
Attn: Jennifer Quigley

Any such communication shall be deemed effective upon personal deliver or on the date of first refusal to accept delivery as reflected on the receipt of delivery or return receipt, as applicable. Any party may change its address by notice to the other party. Each party shall make an ordinary, good faith effort to ensure that it will accept or receive notices that are given in accordance with this section and that any person to be given notice actually receives such notice.

10.9 Time. Time is of the essence to the performance of each and every obligation under this Agreement.

10.10 Days of Week. If any date for exercise of any right, giving of any notice, or performance of any provision of this Agreement falls on a Saturday, Sunday or holiday, the time for performance will be extended to 5:00 p.m. on the next business day.

10.11 Reasonable Consent and Approval. Except as otherwise provided in this Agreement, whenever a party is required or permitted to give its consent or approval under this Agreement, such consent or approval shall not be unreasonably withheld or delayed. If a party is required or permitted to give its consent or approval in its sole and absolute discretion or if such consent or approval may be unreasonably withheld, such consent or approval may be unreasonably withheld but shall not be unreasonably delayed.

10.12 Further Assurances. The Parties shall at their own cost and expense execute and deliver such further documents and instruments and shall take such other actions as may be reasonably required or appropriate to carry out the intent and purposes of this Agreement.

10.13 Waivers. Any waiver by any party shall be in writing and shall not be construed as a continuing waiver. No waiver will be implied from any delay or failure to take action on account of any default by any party. Consent by any party to any act or omission by another party shall not be construed to be a consent to any other subsequent act or omission or to waive the requirement for consent to be obtained in any future or other instance.

10.14 Signatures/Counterparts. This Agreement may be executed in two or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. Any one of such completely executed counterparts shall be sufficient proof of this Agreement.

10.15 Date and Delivery of Agreement. Notwithstanding anything to the contrary contained in this Agreement, the parties intend that this Agreement shall be deemed effective, and delivered for all purposes under this Agreement, and for the calculation of any statutory time periods based on the date an agreement between parties is effective, executed, or delivered, as of the Effective Date.

10.16 Representation on Authority of Parties. Each person signing this Agreement represents and warrants that he or she is duly authorized and has legal capacity to execute and deliver this Agreement. Each party represents and warrants to the other that the execution and delivery of the Agreement and the performance of such party's obligations hereunder have been duly authorized and that the Agreement is a valid and legal agreement binding on such party and enforceable in accordance with its terms.

10.17 Approvals. Whenever this Agreement calls for Seller approval, consent, extension or waiver, the written approval, consent, or waiver of the Seller's Executive Director or his or her designee(s) shall constitute the approval, consent, extension or waiver of the Seller, without further authorization required from the Seller's Board. The Seller hereby authorizes the Agency's Executive Director and his or her designee(s) to deliver any such approvals, consents, or extensions or waivers as are required by this Agreement, or that do not otherwise reduce Seller's rights under this Agreement, and to waive requirements under this Agreement, on behalf of the Seller.

## **LOAN AGREEMENT**

This Loan Agreement (this “**Agreement**”) is made as of the 4<sup>th</sup> day of September 2018 by and between the Pittsburg Power Company, a Joint Powers Authority (“**PPC**”) and Natalie Cooper, an individual, doing business as Lumpy’s Diner in Pittsburg (the “**Borrower**”). PPC and Borrower may be collectively referred to herein as the “**Parties**” and individually as a “**Party**.”

### **RECITALS**

- A. PPC is the owner of certain real property located at 615 Railroad Avenue, known as APN No. 085-171-012, in the City of Pittsburg (the “**Property**”).
- B. The Parties entered into a lease agreement (the “**Lease**”) of the Property on March 1, 2013 Property which expired February 28, 2018. The Borrower is currently leasing the Property on a month-to-month basis while the Parties negotiate the terms of the purchase by Borrower of the Property.
- C. Krauss Appraisal, MAI appraiser, prepared an appraisal for the fair market value of the Property (the “**Appraisal**”).
- D. According to the Appraisal, the fair market value of the Property is Three Hundred Sixty Thousand Dollars (\$360,000).
- E. Borrower has reviewed the Appraisal and has agreed to pay Three Hundred Sixty Thousand Dollars (\$360,000) (the “**Purchase Price**”). The Parties have negotiated and agreed that the total payments under the Lease of Eleven Thousand, Seven Hundred Ninety-Three Dollars and Ninety-Two Cents (\$11,793.92) from June-September 2018 will be applied to the Purchase Price, leaving the remaining amount due as Three Hundred Forty-Eight Thousand Two Hundred Six Dollars and Eight Cents (\$348,206.08).
- F. Borrower agrees to purchase the Property, and Seller agrees to sell the Property to Buyer, subject to the terms and conditions of a purchase and sale agreement dated the date hereof (the “**Purchase Agreement**”).
- G. The Parties have negotiated and Agreed that PPC will provide a loan to Buyer in the amount of Three Hundred Forty-Eight Thousand Two Hundred Six Dollars and Eight Cents (\$348,206.08) (the “**Loan**”), pursuant to the terms and conditions hereof.
- H. Concurrently herewith, Borrower shall execute a promissory note (“**Note**”) evidencing the amount of the Loan substantially in the form attached as Exhibit A attached hereto and incorporated herein by this reference.

I. Concurrently herewith, the Borrower shall execute a Deed of Trust and Security Agreement ("**Deed of Trust**") substantially in the form attached as Exhibit B attached hereto and incorporated herein by this reference to provide PPC with security for the Loan. This Agreement, the Note, and the Deed of Trust are referred to herein collectively as the "**Loan Documents**."

NOW, THEREFORE, in consideration of the foregoing, and of the conditions, terms, covenants and agreements set forth herein and of other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties hereby agree as follows:

## **ARTICLE I** **DEFINITIONS**

As used in this Agreement, the terms set forth herein shall have the following meanings:

1.1 "**Agreement**" means this Loan Agreement and all amendments and supplements hereto which may from time to time become effective hereafter in accordance with the terms hereof.

1.2 "**Deed of Trust**" means that certain Deed of Trust and Security Agreement dated the date hereof, executed by Property Owner securing the Property as security for Borrower's obligations under this Agreement, substantially in the form attached as Exhibit B.

1.3 "**Default Rate**" means ten (10%) per annum.

1.4 "**Events of Default**" have the meaning set forth in Article VIII hereof.

1.5 "**Loan**" has the meaning set forth in Recital G.

1.6 "**Note**" means the promissory note of Borrower executed concurrently with this Agreement, substantially in the form attached as Exhibit A.

1.7 "**Property**" has the meaning ascribed to it in Recital A.

## **ARTICLE II** **THE LOAN**

2.1 Loan Terms.

(a) Loan Amount. PPC agrees provide the Loan, subject to the terms of this Agreement, in the amount of Three Hundred Forty-Eight Thousand Two Hundred Six Dollars and Eight Cents (\$348,206.08).

(b) Purpose of Loan. The purpose of this loan is to acquire the Property so that the Borrower may continue to operate Lumpy's Diner Pittsburgh.

(c) Interest Rate. Interest shall accrue and be paid in accordance with the following terms:

(1) Commencing on October 1, 2018 and continuing until all amounts due under the Note are repaid, interest shall accrue at the rate of five percent (5%), computed on the basis of the actual number of days principal is outstanding and a year of 360 days.

(2) From and after October 1, 2018, interest shall be due and payable monthly on the first day of each month, together with principal amounts due under Section 2.2 herein.

2.2 Loan Repayment. The principal balance and interest shall be repaid over the term of two hundred thirty-nine (239) months in equal monthly payments of Two Thousand Two Hundred Ninety-eight Dollars and One Cent (\$2,298.01) and one (1) final payment of Two Thousand Two Hundred Eighty-Eight Dollars and Forty-Seven Cents (\$2,288.47) (the "**Monthly Payments**"). The first (1<sup>st</sup>) Monthly Payment shall be due on October 1, 2018 and on the first (1<sup>st</sup>) day of each month thereafter through the Maturity Date (defined below).

(a) Late Payment Fees. For any monthly payment that is not received by the fifteenth (15<sup>th</sup>) calendar day after which it was due, Borrower shall pay a late fee of ten percent (10%) of the amount unpaid. PPC and Borrower agree that the actual damages and costs sustained by PPC due to failure to make timely payments would be extremely difficult to measure and that the charges specified in this paragraph represent a reasonable estimate by PPC and Borrower of fair average compensation for such damages and costs. Such charges shall be paid by Borrower without prejudice to the right of PPC to collect any other amounts provided to be paid under this Loan Agreement, Promissory Note, or Deed of Trust, or with respect to late payments, to declare default.

2.3 Term. The final principal and interest payment, and all other amounts that may be due under this Loan Agreement or the Note, is due and payable on September 1, 2038 (the "**Maturity Date**").

2.4 Prepayment. The Note or any portion of the outstanding principal balance due under the Note may be prepaid at any time and from time to time, without premium or penalty. Any prepayment of principal must be accompanied by interest accrued but unpaid to the date of receipt of prepayment. Prepayments shall be applied first to any unpaid late charges and other costs and fees then due, then to accrued but unpaid interest and then to principal.

2.5 Due on Sale. Unless PPC in its sole discretion agrees otherwise in writing, the entire unpaid principal balance and all interest and other sums accrued under the Note shall be due and payable upon the transfer or sale of all or any part of, or interest in, the Property.

2.6 Conditions Precedent to PPC's Obligation to Disburse. The obligation of PPC to make the Loan is conditioned upon the receipt by PPC of the following:

- (a) The executed Loan Documents, acknowledged where appropriate, duly executed by Borrower;
- (b) Evidence that the Loan Documents do not violate any of Borrower's agreements with any other lenders;
- (c) Recordation of the Deed of Trust in the official records of Contra Costa County; and
- (d) Copies of such other documents related to the Property as PPC may reasonably request.

2.7 No Changes to Loan Terms. Borrower shall not request the PPC, City, Successor Agency, or any agency, department or division of or affiliated with the PPC, to amend the terms of this Article II or to otherwise restructure, refinance, or alter the Loan terms. PPC, City, Successor Agency, or any agency, department or division of or affiliated with the PPC shall not grant such request to amend the terms of this Article II or to otherwise restructure, refinance, or alter the Loan terms.

### **ARTICLE III** **SECURITY FOR THE LOAN**

3.1 Deed of Trust and Security Agreement. Borrower shall, if necessary, execute and deliver such additional documents to PPC as may be necessary or advisable to perfect PPC's security interest in the Property. Pursuant to Section 2.6, the Deed of Trust shall be recorded at the close of escrow for the purchase of the Property under the Purchase Agreement.

### **ARTICLE IV** **REPRESENTATIONS AND WARRANTIES**

To induce PPC to enter into this Agreement, Borrower hereby makes the following representations and warranties, which shall survive the execution and performance of this Agreement and the other Loan Documents, and continue until all obligations to PPC hereunder and thereunder have been satisfied in full:

4.1 Legal Status. Borrower has the authority to enter into this Agreement, and to obtain and secure the Loan.

4.2 No Violation. The execution and performance by Borrower of this Agreement, the Note and the other Loan Documents have been duly authorized by the appropriate and necessary action and constitute legal, valid and binding agreements of Borrower, enforceable in accordance with their respective terms. Borrower's execution and performance of this Agreement and the other Loan Documents will not result in the creation of any lien, charge or encumbrance upon any property of the Borrower pursuant to any indenture or other agreement or instrument to which Borrower is a party, or by which the Borrower or Borrower's property may be bound or affected, other than as specifically provided herein.

4.3 Permits and Franchises. Borrower possesses all permits, franchises, contracts and licenses required, and all trademarks, trade names, patents, patent rights and fictitious name rights necessary, to conduct the businesses in which it is now engaged without conflict with the rights of others.

4.4 Litigation. To the knowledge of Borrower, there are no pending or threatened actions or proceedings before any court or administrative agency or other governmental body which may have a material adverse effect on the financial condition or operation of Borrower, or on the collateral securing Borrower's performance under any Loan Document, other than those actions or proceedings previously disclosed in writing by Borrower to PPC. Borrower will immediately notify PPC of any litigation in which Borrower is named as a party.

4.5 Taxes and Tax Returns. Borrower has filed all tax returns and other reports required by law to be filed and has paid all taxes, assessments, fees and other charges, against Borrower or Borrower's properties, income or franchise, that are due and payable.

4.6 Assets and Liens. Borrower has good and marketable title to all assets reflected in any financial statement delivered to PPC. There exists no lien, security interest, claim or encumbrance on any property of Borrower, except those in favor of PPC, City, Agency, or to which PPC, City, or Agency has consented in writing.

4.7 Obligations. From and after the date of this Agreement, Borrower shall not be in default on any obligation for borrowed money (including purchase money obligations) or under any other material lease, commitment, contract, instrument or obligation.

## **ARTICLE V** **COVENANTS**

Borrower agrees that so long as Borrower is indebted to PPC under this Agreement, and until payment in full is received under the terms of the Note, Borrower shall, in addition to any other covenants in the Loan Documents, faithfully perform the following covenants:

5.1 Accounting Records/Collateral Inspection. Borrower shall maintain adequate books and accounts in accordance with generally accepted accounting principles, consistently applied, and Borrower shall permit any authorized representative of PPC, at any reasonable time, to inspect, audit and examine such books and to inspect the real and personal properties of Borrower.

5.2 Maintenance of Licenses and Permits/Legal Compliance. Borrower will preserve and maintain the existence of Borrower's respective licenses, rights, franchises and privileges in the jurisdiction of their formation and all authorizations, consents, approvals, orders, licenses, permits, or exemptions from or registrations with, any governmental agency that are necessary for the transaction of their respective businesses, and qualify and remain qualified to transact business in each jurisdiction in which such qualification is necessary. Borrower agrees to comply with, and will cause each guarantor to comply with, all federal, state and local rules, statutes, ordinances and laws which apply to the conduct of its business activities and the construction, improvement and maintenance of its property; Borrower further agree to notify PPC in writing within ten (10) days of its receipt of service or notice in any administrative or judicial proceeding in which Borrower or any guarantor is named as a party; that is related to the occupation or use of the premises which are security for the loans made hereunder; or that is related to the licensing of Borrower or any guarantor, including any petitions, complaints or administrative proceedings to amend, modify, counsel, revoke, diminish or otherwise affect any licenses or authorities currently granted to, or in the possession of, Borrower or any guarantor including, but not limited to, business licenses, liquor licenses, or grants or authorities.

5.3 Insurance. Borrower shall maintain insurance in responsible companies in such amounts and against such risk as is satisfactory to PPC, including, without limitation, the insurance in the amount of the replacement value for all the collateral for the Loan. As required by PPC, Borrower will cause PPC to be designated as additional insured and loss payee with respect to such insurance, and will obtain the written agreement of such insurers that such insurance shall not be canceled or terminated, nor will the coverage or terms or exclusions thereof be materially modified, without at least thirty (30) days prior written notice to PPC. For any claims related to the Property, Borrower's insurance coverage shall be primary insurance as respects the PPC, its officers, employees and agents. Borrower hereby grants to PPC a waiver of any right to subrogation which any insurer of Borrower may obtain against the PPC, its officers, employees or agents by virtue of the payment of any loss under such insurance. Borrower agrees to obtain any endorsement that may be necessary to effect this waiver of subrogation, but this provision applies regardless of whether or not Borrower has received a waiver of subrogation endorsement from the insurer.

5.4 Notice to PPC. Borrower shall, within ten (10) calendar days of any of the following, provide notice to PPC of the occurrence of any Event of Default as defined in this Agreement or in any other Loan Document, or any event, act or condition which, with the giving of notice or the passage of time or both would constitute an Event

of Default hereunder or thereunder; and (b) any uninsured, or partially insured, loss from fire, theft, liability or other damage to the Property in excess of an aggregate of Fifty Thousand Dollars (\$50,000).

5.5 Payment of Taxes and Other Potential Liens. Borrower will promptly pay all taxes, assessments and governmental charges or levies imposed upon her, upon her respective properties, except that Borrower shall not be required to pay or cause to be paid any tax, assessment, charge or levy that is not yet past due, or is being contested by Borrower in good faith by appropriate proceedings, so long as the relevant entity has established and Borrower maintains adequate reserves for the payment thereof and by reason of such nonpayment and contest no material asset of Borrower are in jeopardy of being seized, levied upon or forfeited.

5.6 Maintenance of Properties. Borrower will maintain, preserve and protect the Property in good order and condition, subject to wear and tear in the ordinary course of business, and not permit any waste of its assets, except that the failure to maintain, preserve and protect a particular item of property that is not of significant value, either intrinsically or to the operations of Borrower will not be a violation of this covenant.

5.7 Financial Covenants. At all times during the pendency of the Loan, Borrower shall incur no additional secured or unsecured debt in any amount without prior written consent of PPC.

## **ARTICLE VI**

### **OTHER OBLIGATIONS; INDEMNIFICATION**

6.1 Prevailing Wages. If applicable, Borrower and all of Borrower's contractors, if any, shall comply with California Labor Code Sections 1720, *et seq.*, and all regulations adopted pursuant thereto and be responsible for carrying out the requirements of such provisions. Borrower shall indemnify, defend and hold harmless the PPC, its officers, employees and agents from and against any and all claims whether known or unknown, and which directly or indirectly, in whole or in part, are caused by, arise from, or relate to, or are alleged to be caused by, arise from, or relate to, the payment or requirement of payment of prevailing wages or the requirement of competitive bidding in the construction improvements to the Property Failure to comply with any state or federal labor laws, regulations or standards in connection with this Agreement, including but not limited to California Labor Code Sections 1720, *et seq.*, or any act or omission of PPC or Borrower related to this Agreement with respect to the payment or requirement of payment of prevailing wages or the requirement of competitive bidding, whether or not any insurance policies shall have been determined to be applicable to any such claims. The Parties further agree that PPC does not, and shall not, waive any rights against Borrower which it may have by reason of this indemnity and hold harmless provision because of the acceptance by PPC, or the deposit with PPC by Borrower, of any of the insurance policies described in this Agreement.

6.2 Indemnification. Borrower shall indemnify, defend (with counsel reasonably acceptable to PPC), and hold harmless the PPC, its officers, agents and employees from and against all claims arising directly or indirectly in any manner in connection with or as a result of (i) any breach of Borrower's covenants under the Loan Documents, (ii) any representation by Borrower in any Loan Document which proves to be false or misleading in any material respect when made, (iii) injury or death to persons or damage to property or other loss occurring on the Property or in any improvement located thereon, whether caused by the negligence or any other act or omission of Borrower or any other person or by negligent, faulty, inadequate or defective design, building, construction or maintenance or any other condition or otherwise, and (iv) any claim, demand or cause of action, or any action or other proceeding, whether meritorious or not, brought or asserted against PPC which relates to or arises out of the Property, or any Loan Document or any transaction contemplated thereby, or any failure of Borrower to comply with all applicable state, federal and local laws and regulations applicable to the Property, provided that PPC shall not be entitled to indemnification under this Section for matters caused PPC's gross negligence or willful misconduct. The obligations of Borrower under this Section shall survive the repayment of the Loan. Notwithstanding any contrary provision contained herein, the obligations of Borrower under this Section shall survive any foreclosure proceeding, any foreclosure sale, any delivery of a deed in lieu of foreclosure, any reversion in interest, and any release or reconveyance of the Deed of Trust.

## **ARTICLE VII**

### **DEFAULT**

7.1 Events of Default. Upon the happening of any one or more of the following events of default, the principal unpaid balance of the Note, plus accrued and unpaid interest thereon, shall, at the option of PPC and without notice or demand, become due and payable. The following shall constitute events of default:

- (a) Borrower's failure to make any payment of interest or principal when due in accordance with the Note.
- (b) The failure of Borrower to perform any covenant or obligation to the PPC, under the Note, this Agreement, or the Loan Documents.
- (c) The failure of Borrower to perform under the terms of any other agreement, note, or instrument, now or hereafter existing, as and when due (whether at maturity or by acceleration and no prior demand therefore by the PPC being necessary).
- (d) The filing by Borrower of a voluntary petition in bankruptcy, or other proceeding seeking liquidation, reorganization or other relief with respect to themselves or their respective debts under any bankruptcy, insolvency or other similar debtor relief

law now or hereafter in effect or seeking the appointment of a trustee, receiver, liquidator, custodian or other similar official of them, or any of them, or any substantial part of their property, or shall consent to any such relief or to the appointment or taking possession by any such official in any involuntary case or other proceeding commenced against any of them.

(e) The commencement of an involuntary case or other proceeding against Borrower seeking liquidation, reorganization or other relief with respect to themselves or their respective debts under any bankruptcy, insolvency or other similar debtor relief law now or hereafter in effect or seeking the appointment of a trustee, receiver, liquidator, custodian or other similar official of them, or any substantial part of their property, and such involuntary case or other proceeding remaining undismissed and unstayed for a period of sixty (60) days.

(f) Borrower and/or any guarantor, or any of them, making an assignment for the benefit of creditors, or admitting in writing their inability to pay their debts generally as they become due.

(g) Any representation or warranty made by Borrower in connection with this Agreement or the Loan Documents, or any document or agreement made or submitted in connection herewith, is materially false or misleading.

(h) The acquisition at any time of any interest (in whole or in part), by any person or entity other than Borrower, in either the Property or the collateral secured by the Deed of Trust.

(i) A voluntary or involuntary lien is attached to the Property in favor of a person or entity other than PPC.

(j) A material adverse change in Borrower's financial condition.

7.2 Default Interest. In the event that any amount due under this Agreement is reduced to judgment, or if the Borrower is ten (10) or more days late in making any payment required to be made under the Note, or if any non-monetary Event of Default shall occur, and said default is not cured within thirty (30) days after the date of written notice sent by PPC to the Borrower at the address set forth herein notifying Borrower of the default, the total unpaid balance of principal of the Note and accrued and unpaid interest thereon (past due interest being compounded) shall then begin accruing interest at the Default Rate, to the fullest extent permitted by law, until such time as the Event of Default in question is cured. At that time, the interest rate will revert to that rate provided in the Note. Borrower acknowledges that the effect of this Default Rate could operate to compound some of the interest obligations due, and the Borrower hereby expressly assents to such compounding should it occur. Notwithstanding the foregoing, nothing in this section shall be construed as allowing Borrower to cure any default and reinstate the terms of this Note absent the express written consent of PPC. Borrower specifically consents to the compounding of interest.

7.3 Remedies. Without limiting the foregoing, upon the occurrence of an Event of Default, PPC may:

(a) declare any indebtedness owed by Borrower to PPC to be forthwith due and payable, whereupon the unpaid principal amount of such indebtedness, together with accrued interest thereon, shall become immediately due and payable without presentment, demand or protest, or other notice of any kind, all of which are hereby expressly waived, anything contained herein or in any Loan Documents to the contrary notwithstanding; and

(b) foreclose under the Deed of Trust; and

(c) proceed to enforce any of its remedies under this Agreement, any Loan Document or pursuant to California law or any other applicable law.

No remedy conferred upon or reserved to PPC herein is intended to be exclusive of any other remedy given under this Agreement or the Loan Documents, or now or hereafter existing at law or in equity or by statute.

## **ARTICLE VIII** **MISCELLANEOUS**

8.1 Waiver. No delay or failure of PPC, or any holder of the Note, in exercising any right, power or privilege, nor any single or partial exercise thereof or any abandonment or discontinuance of steps to endorse such a right, power or privilege, shall be deemed a waiver of PPC's right to exercise such power or privilege in the future. The rights of PPC hereunder are cumulative and not exclusive. Any waiver, permit, consent or approval of any kind by PPC, or any holder of the Note, of any breach or default hereunder must be in writing and shall be effective only to the extent set forth in such writing.

8.2 Notices. All notices, requests and demands given to, or made upon, any party to this Agreement shall be deemed to have been given or made when properly deposited in the U.S. mail and addressed as follows:

Borrower: Natalie Cooper  
[INSERT ADDRESS]  
Pittsburg, CA 94565

Pittsburg Power Company: Pittsburg Power Company  
Attn: Executive Director  
65 Civic Avenue  
Pittsburg, CA 94565

With copy to: Ruthann G. Ziegler  
Agency Counsel  
555 Capitol Mall, Suite 1200  
Sacramento, CA 95814

8.3 Attorney Fees. Borrower shall reimburse PPC for all costs, expenses and attorney's fees expended or incurred by PPC in negotiating, preparing, amending or enforcing this Agreement or any provision of any Loan Document, in actions for declaratory relief in any way related to this Agreement or any other Loan Document, or in collecting any sum which becomes due PPC on the Note.

8.4 Applicable Law. This Agreement shall be constructed and construed in accordance with the laws of the State of California.

8.5 Binding Effect. This Agreement shall be binding upon and inure to the benefit of PPC and Borrower and to their respective heirs, successors and assigns.

8.6 Amendments. This Agreement may not be altered or amended, except with the written consent of each of the Parties. PPC hereby authorizes the Executive Director to execute minor amendments to this Agreement, or to waive requirements under this Agreement, on behalf of PPC.

8.7 PPC's Reliance on Borrower's Representation. All covenants, warranties, representations and affirmations made by Borrower are considered material to this Agreement, and PPC has relied upon same in contemplating the extension of credit to Borrower.

8.8 Joint and Several Liability. The Borrower hereunder consists of more than one person, each of whom shall be jointly and severally liable to PPC for the performance of this Agreement and the Loan Documents. Each individual comprising Borrower is responsible for this Agreement with respect to each Borrower's separate and community property.

8.9 Severability. The invalidity or unenforceability of one or more provisions of this Agreement shall in no way affect the remaining provisions.

8.10 Construction. The singular shall include the plural; the plural shall include the singular, unless the context of the Agreement requires otherwise.

8.11 Counterparts. This Agreement may be executed in any number of counterparts, each of which, when taken together, will be deemed to be an original and one and the same instrument. This Agreement will not become effective until all counterparts hereof have been duly executed by all parties hereto.

8.12 PPC's Right to Assign. Notwithstanding any other provision of this Agreement, there shall be no restrictions on PPC's right to assign this Agreement, any note and any obligation arising hereunder to any third person or entity.

8.13 Waivers. To the extent permitted by law, Borrower hereby waives and relinquishes: (i) the defense of the statute of limitations in any action hereunder or in any action for the collection of any indebtedness or the performance of any obligation arising in connection with the Note; (ii) any defense that may arise by reason of the incapacity, lack of authority, death or disability of any other person or persons or the failure of PPC to file or enforce a claim against the estate (in administration, bankruptcy or any other proceeding) of any other person or persons; (iii) demand, protest and notice of any kind; (iv) any defense based upon an election of remedies by PPC, including, without limitation, the marshaling of assets (or any defense based upon any statute or rule of law which provides that the obligation of a surety must be neither larger in amount nor in other respects more burdensome than that of the principal); (v) any defense arising because of PPC's election, in any proceeding instituted under the Federal Bankruptcy Code, of the application of Section 1111(b) of the Federal Bankruptcy Code; (vi) any defense based on any borrowing or grant of a security interest under Section 364 of the Federal Bankruptcy Code; (vii) any defense based upon an election of remedies by PPC, including, without limitation, any election to proceed by judicial or non-judicial foreclosure of any security, whether real property or personal property security, or by deed in lieu thereof, and whether or not every aspect of any foreclosure sale is commercially reasonable, or any election of remedies.

8.14 Renewal. PPC has made no commitment to extend the term of this Agreement or the Note.

8.15 No Joint Venture. By entering into this Agreement, the Parties do not intend to create a joint venture among them. The purpose of this Agreement is as indicated in the Recitals.

8.16 Entire Agreement. This Agreement and the Exhibits attached hereto contain all the representations and the entire agreement between the Parties with respect to the subject matter hereof. This Agreement supersedes any prior agreement between the Parties with respect to the subject matter of this Agreement.

8.17 Time. Time is of the essence in the performance of the terms and conditions of this Agreement.

8.18 No Liability of Officials, Officers, Employees or Agents. No official, officer, employee or agent of PPC shall be held personally liable in the event of any default or breach hereunder by either Party.

8.19 Headings. The headings within this Agreement are for the purpose of reference only and shall not limit or otherwise affect any of the terms of the Agreement.

9.20 No Third Party Beneficiaries. This Agreement is made solely for the benefit of the parties hereto, with no intent to benefit any non-signator third parties.

IN WITNESS WHEREOF, the parties above-mentioned have entered into this Agreement the day and year first above mentioned.

## EXHIBIT A

### Form of Promissory Note

#### **PROMISSORY NOTE SECURED BY DEED OF TRUST AND SECURITY AGREEMENT**

**Pittsburg, California**

September 4, 2018

FOR VALUE RECEIVED, the undersigned, Natalie Cooper, an individual, doing business as Lumpy's Diner Pittsburg (the "**Maker**" or "**Borrower**"), promises to pay to the order of the Pittsburg Power Company, a Joint Powers Authority ("**PPC**" or "**Holder**"), the principal sum of Three Hundred Forty-Eight Thousand, Two Hundred Six Dollars and Eight Cents (\$348,206.08), or so much thereof that may be advanced hereunder, together with interest at an annual rate as set forth below. Capitalized terms used but not defined herein shall have the same meaning as set forth in the Loan Agreement (defined below).

1. This Promissory Note (this "**Note**") has been executed and delivered in accordance with a Loan Agreement dated September 4, 2018, (the "**Loan Agreement**") between Maker and Holder, which details the terms under which Holder agrees to lend Maker up to Three Hundred Forty-Eight Thousand Two Hundred Six Dollars and Eight Cents (\$348,206.08). The rights and obligations of Maker under this Note shall be governed by the Loan Agreement, the Deed of Trust (defined below) and by the terms set forth in this Note.

2. Terms of Promissory Note.

(a) Loan Amount. Agency agrees to lend to Borrower, subject to the terms of the Loan Agreement, a loan not to exceed Three Hundred Forty-Eight Thousand, Two Hundred Six Dollars and Eight Cents (\$348,206.08).

(b) Interest Rate. Interest shall accrue and be paid in accordance with the following terms:

(1) Commencing on October 1, 2018 and continuing until all amounts due under the Note are repaid, interest shall accrue at the rate of five percent (5%) per annum, computed on the basis of the actual number of days principal is outstanding and a year of 360 days.

(2) From and after October 1, 2018, interest shall be due and payable monthly, together with principal amounts due under Section 2(c) herein.

(c) Loan Repayment. The principal balance and interest shall be repaid over the term of two hundred thirty-nine (239) months in equal monthly payments of Two Thousand Two Hundred Ninety-eight Dollars and One Cent (\$2,298.01) and one (1) final payment of Two Thousand Two Hundred Eighty-Eight Dollars and Forty-Seven Cents (\$2,288.47) (the "Monthly Payments"). The first (1<sup>st</sup>) Monthly Payment shall be due October 1, 2018 and the remaining payments are due on the first (1<sup>st</sup>) day of every month thereafter.

(1) Late Payment Fees. For any monthly payment that is not received by the fifteenth (15<sup>th</sup>) calendar day after which it was due, Borrower shall pay a late fee of ten percent (10%) of the amount unpaid. PPC and Borrower agree that the actual damages and costs sustained by PPC due to failure to make timely payments would be extremely difficult to measure and that the charges specified in this paragraph represent a reasonable estimate by PPC and Borrower of fair average compensation for such damages and costs. Such charges shall be paid by Borrower without prejudice to the right of PPC to collect any other amounts provided to be paid under this Loan Agreement, Promissory Note, or Deed of Trust, or with respect to late payments, to declare default.

(d) Term. The final principal and interest payment, and all other amounts that may be due under the Loan Agreement or this Note, is due and payable on September 1, 2038 (the "Maturity Date").

(e) Prepayment. The Note or any portion of the outstanding principal balance due under the Note may be prepaid at any time and from time to time, without premium or penalty. Any prepayment of principal must be accompanied by interest accrued but unpaid to the date of receipt of prepayment. Prepayments shall be applied first to any unpaid late charges and other costs and fees then due, then to accrued but unpaid interest and then to principal.

(f) Security. This Note is hereby secured by that certain Deed of Trust and Security Agreement ("**Deed of Trust**") dated September 4, 2018, executed by Borrower as trustor for the benefit of Holder and all sums advanced hereunder are secured thereby.

### 3. Terms of Payment.

(a) Place and Manner of Payment. Payment shall be made in lawful money of the United States at Holder's address for notices set forth in Section 8 of this Note.

(b) Lawful Interest. Notwithstanding any other provisions of this Note, or any instrument securing the obligations of Maker under this Note, if, for any reason whatsoever, the payment of any sums by Maker pursuant to the terms of this Note would result in the payment of interest which would exceed the amount that Holder may legally charge under the laws of the State of California, then the amount by which

payment exceeds the lawful interest rate shall automatically be deducted from the principal balance owing on this Note, so that in no event shall Maker be obligated under the terms of this Note to pay any interest which would exceed the lawful rate.

4. Default.

(a) Events of Default. Each of the following events will constitute an event of default ("Event of Default") under this Note:

(1) Loan Agreement/Promissory Note Default. Maker's breach of any other promise or obligation in this Note, the Loan Agreement or in any other instrument now or hereafter securing the indebtedness evidenced by this Note.

(2) False Representations. Any material representation or disclosure made to Holder by Maker in this Note that proves to be false or misleading in any way.

(3) Bankruptcy. The filing by or against Maker of a voluntary or involuntary petition in bankruptcy or the adjudication of Maker as bankrupt or insolvent, or the filing of any petition or answer seeking any reorganization, arrangement, composition, readjustment, liquidation, dissolution, or similar relief under present or any future federal bankruptcy act or any other present or future applicable federal, state or other statute or law, or the seeking or consenting to or acquiescing in the appointment of any trustee, receiver, liquidator of Maker or any substantial part of or all of the property of Maker, and if any such proceeding is not dismissed within sixty (60) days; the Maker is named in any such proceeding and the same is not dismissed within one hundred twenty (120) days.

(b) Default Interest. Upon the occurrence of any Event of Default all amounts owing under this Note shall accrue interest at the rate of 10% per annum.

5. Remedies. Upon the occurrence of any Event of Default, in addition to its other rights in this Note, the Deed of Trust, and the Loan Agreement, at law, or in equity, Holder may exercise any one or more of the following rights and remedies without prior demand:

(a) Acceleration. Holder may declare the outstanding principal balance of this Note, all interest accrued thereon, if any, and all other sums owing to Holder immediately due and payable; and

(b) Foreclosure. Holder may foreclose under the Deed of Trust.

(b) Proceed as Authorized at Law or in Equity. Holder may proceed as authorized at law or in equity with respect to the Event of Default, and in connection with that, remain entitled to exercise all other rights and remedies described in this Note, or the Loan Agreement.

6. Maker's Waivers.

(a) Additional Security. Maker expressly agrees that Holder may accept further security for this Note, all without in any way affecting the obligations of Maker under this Note.

(b) Original Liability. No extension of time for payment of this Note or any installment hereof made by agreement by Holder with any person now or hereafter liable for the payment of this Note shall operate to release, discharge, modify, change or affect the original liability of Maker under this Note, either in whole or in part.

(c) Obligations Absolute. The obligations of Maker under this Note shall be absolute and Maker waives any and all rights to offset, deduct or withhold any payments or charges due under this Note for any reasons whatsoever.

(d) Waivers. Maker hereby waives (i) any notice of default or delinquency in addition to any notice expressly required by this Note; (ii) notice of acceleration; (iii) any notice of nonpayment in addition to any notice required by this Note; (iv) notice of costs, expenses, losses and interest thereon; (v) notice of interest on interest and late fees; (vi) diligence in taking any action to collect any sums owing under the Promissory Note or in proceeding against any of the rights and interest in and to properties securing payment of the Promissory Note; and (vii) presentment for payment, demand, protest, and notices of dishonor and/or protest.

7. Holder Forbearance. No waiver of any breach, default or failure of condition under the terms of this Note or the Loan Agreement or the obligations secured thereby shall be implied from any failure of Holder to take, or any delay by Holder in taking, action with respect to such breach, default or failure or from any previous waiver of any similar or unrelated breach, default or failure; and a waiver of any term of this Note, or the Loan Agreement or any of the obligations secured thereby must be made in writing and shall be limited to the express written terms of such waiver.

8. Miscellaneous Provisions.

(a) Notices. All notices, requests and demands given to, or made upon, any party to this Agreement shall be deemed to have been given or made when properly deposited in the U.S. mail and addressed as follows:

If to Borrower:                      Natalie Cooper  
                                                 [INSERT ADDRESS]  
                                                 Pittsburg, CA 94565

If to City:                                Pittsburg Power Compnay  
                                                 Attn: Executive Director  
                                                 65 Civic Avenue  
                                                 Pittsburg, CA 94565

With copy to: Ruthann G. Ziegler  
Agency Counsel  
555 Capitol Mall, Suite 1200  
Sacramento, CA 95814

or to such other addresses as the parties may designate by notice as set forth above.

(b) Successors and Assigns. This Promissory Note (i) may not be assigned by Maker, (ii) may be assigned by Holder, at its sole option, and (iii) shall be binding on all successors and assigns of Holder and Maker.

(c) Attorneys' Fees. If any action is instituted by Holder to enforce this Note or to collect any sums due hereunder, Holder shall be entitled to collect from Maker all costs and expenses of such action, including, but not limited to, reasonable attorneys' fees.

(d) Severability. If a court of competent jurisdiction finds any provisions of this Note invalid or unenforceable, the remaining provisions shall not in any way be affected or impaired thereby, and all other provisions of this Note shall remain in full force and effect.

(e) Time. Time is of the essence in the performance of the terms and conditions of this Note.

(f) Governing Law. The laws of the State of California shall govern this Note.

(g) Joint and Several Liability. Maker consists of more than one person, each of whom is jointly and severally liable to Agency for the performance of this Note.

(h) Amendment. This Promissory Note may not be changed orally, but only by an amendment in writing signed by Maker and approved by Holder.

(i) Headings. The headings within this Note are for the purpose of reference only and shall not limit or otherwise affect any of the terms of the Promissory Note.

(j) Assumptions. This Promissory Note, may not be assumed in whole or in part without the prior written consent of Holder, which consent shall be given or withheld at the sole discretion of Holder. Holder may condition its consent to an assumption of this Note on the satisfaction of conditions reasonably required by Holder at the time of the assumption. Conditions may include, but not be limited to, Holder's satisfaction, in its sole discretion, with the proposed assuming party's ability to meet the obligations required hereunder, the payment of an assumption fee and reimbursement

of Holder's fees and costs incurred by reason of the assumption.

EXECUTED IN PITTSBURG, CALIFORNIA AND DELIVERED AS OF  
THE 4<sup>th</sup> DAY OF September 2018.

**DEED OF TRUST AND SECURITY AGREEMENT**

THIS DEED OF TRUST AND SECURITY AGREEMENT (this "**Deed of Trust**") is made as of September 4, 2018, by Natalie Cooper, an individual, doing business as Lumpy's Diner Pittsburg ("**Trustor**") to Old Republic Title Company, as trustee ("**Trustee**") for the benefit of the Pittsburg Power Company, a Joint Powers Authority ("**Beneficiary**").

RECITALS

A. Trustor owns fee simple title to the real property known as 615 Railroad Avenue, known as APN No. 085-171-012, in the City of Pittsburg as more particularly described in Exhibit A attached hereto and incorporated herein by this reference ("**Land**").

B. Trustor and Beneficiary have entered into a loan agreement dated September 4, 2018 ("**Loan Agreement**") pursuant to which Beneficiary will carry an acquisition loan to Trustor not to exceed Three Hundred Forty-Eight Thousand, Two Hundred Six Dollars and Eight Cents (\$348,206.08) ("**Loan**"). Trustor has also executed a promissory note evidencing the amount of the Loan ("**Note**").

C. As a condition to making the Loan, Beneficiary has required that Trustor enter into this Deed of Trust and grant to Trustee for the benefit of Beneficiary, a lien and security interest in the Property (as defined below) to secure repayment of the Loan.

NOW THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Trustee agrees as follows:

1. Grant in Trust. Trustor irrevocably grants and conveys the Land to Trustee, in trust, with power of sale, together with all improvements now or hereafter erected on the property, and all easements, rights, appurtenances and rents (subject however to the rights and authorities given herein to Beneficiary to collect and apply such rents), all of which shall be deemed to be and remain a part of the Property secured by this Deed of Trust; and all of the foregoing, together with the Land are hereinafter referred to as the "Property."

Trustor covenants that it lawfully holds the estate hereby conveyed and has the right to grant and convey the Property, and that, to the best of Trustor's knowledge, the Property is unencumbered except for encumbrances of record. Trustor warrants and will defend generally the title to the Property against all claims and demands, subject to encumbrances of record.

2. Obligations Secured. This Deed of Trust is given for the purpose of securing payment and performance of all present and future indebtedness evidenced by the Note, the Loan Agreement and any amendment thereof, including principal, interest, and all other amounts payable under the Loan Agreement and the Note.

3. Preservation and Maintenance of Property. Trustor agrees to keep the Property in good condition and repair; not to remove or demolish any building thereon; to complete or restore promptly and in good and workmanlike manner any building which may be constructed, damaged, or destroyed thereon and to pay when due all claims for labor performed and materials furnished therefore; to comply with all laws affecting the Property or requiring any alterations or improvements to be made thereon; not to commit or permit waste thereof; not to commit, suffer, or permit any act upon the Property in violation of law; to cultivate, irrigate, fertilize, fumigate, prune, and do all other acts which from the character or use of the Property may be reasonably necessary, the specific enumerations herein not excluding the general.

4. Hazardous Materials. Trustor shall not cause or permit any Hazardous Materials (as defined in below) to be brought upon, kept, stored or used in, on, or about the Land by Trustor, or the agents, employees, contractors or invitees of Trustor except for materials commonly used in operation and maintenance of the Property, in each case in compliance with all applicable laws, and shall not cause any release of Hazardous Materials into, onto, under or through the Land. If any Hazardous Material is discharged, released, dumped, or spilled in, on, under, or about the Land and results in any contamination of the Land or adjacent property, or otherwise results in the release or discharge of Hazardous Materials in, on, under or from the Land, Trustor shall promptly take all actions at Trustor's sole expense as are necessary to comply with all Hazardous Materials Laws (as defined below).

Trustor shall indemnify, defend (with counsel approved by Beneficiary) and hold Beneficiary harmless from and against any and all claims, judgments, damages, penalties, fines, costs, liabilities and losses (including, without limitation, diminution in value of the Property, and sums paid in settlement of claims, attorney's fees, consultant

fees and expert fees) which arise during or after the term of this Deed of Trust as a result of any breach, contamination, discharge, or release of Hazardous Materials. This indemnification of Beneficiary by Trustor includes, without limitation, costs incurred in connection with any investigation of site conditions or any cleanup, remedial, removal or restoration work required by any federal, state or local governmental agency or political subdivision because of Hazardous Materials present in, on or under the Land or adjacent property caused by or a result of Trustor's activities. If any Hazardous Materials are discharged, released, dumped, or spilled in, on, under, or about the Land after Trustor obtains ownership and results in any contamination of the Land or adjacent property, or otherwise results in the release or discharge of Hazardous Materials in, on, under or from the Land, Trustor shall promptly take all actions at its sole expense as are necessary to comply with all Hazardous Materials Laws.

4.1 As used in this Deed of Trust, "**Hazardous Materials**" means any substance, material, or waste which is or becomes regulated by any local, state or federal authority, agency or governmental body, including any material or substance which is: (i) defined as a "hazardous waste," "hazardous material," "hazardous substance," "extremely hazardous waste," "restricted hazardous waste," "pollutant," or any other terms comparable to the foregoing terms under any provision of California law or federal law as any such statutes and regulations now exist or may hereafter be amended, (ii) petroleum or petroleum products; (iii) asbestos; (iv) polychlorinated biphenyls, (v) radioactive chemicals, (vi) any material determined to hazardous based on deleterious properties such as ignitability, corrosivity, reactivity, carcinogenicity or toxicity, (vii) designated as a "hazardous substance" pursuant to Section 311 of the Clean Water Act (33 U.S.C. § 1317); (viii) defined as a "hazardous waste" pursuant to Section 1004 of the Resource Conservation and Recovery Act, 42 U.S.C. § 6901, *et seq.* (42 U.S.C. § 6903); (ix) defined as "hazardous substances" pursuant to Section 101 of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. § 9601, *et seq.*; or (x) determined by California, federal or local governmental authority to be capable of posing a risk of injury to health, safety or property.

4.2 As used in this Deed of Trust "**Hazardous Materials Laws**" means all federal, state and local laws, ordinances, regulations, orders and directives pertaining to Hazardous Materials, including without limitation, the laws, statutes and regulations cited in the preceding Section 4.1, as they may be amended from time to time.

5. Charges; Liens. Trustor shall pay at least ten days before delinquency all taxes, levies, assessments and other charges affecting the Property that are (or if not paid may become) a lien on all or part of the Property. Trustor shall pay when due, all obligations secured by or reducible to a lien, charge or encumbrance which does now or later may encumber all or part of the Property or any interest in it, whether or not such lien, charge or encumbrance is or would be senior or subordinate to this Deed of Trust. Trustor shall give prompt notice to Beneficiary of any default under any mortgage, deed of trust or other security agreement with a lien on the Property.

6. Insurance. At all times during the term hereof, Trustor shall at Trustor's

expense, maintain the insurance policies required under Section 5.3 of the Loan Agreement. Trustor shall file with Beneficiary prior to recordation of this Deed of Trust, certificates (or such other proof as Beneficiary may reasonably require, including without limitation copies of the required insurance policies) evidencing each of the insurance policies and endorsements thereto, and such certificates (or policies) shall provide that at least thirty (30) days' prior written notice shall be provided to Beneficiary prior to the expiration, cancellation or change in coverage under each such policy. If any insurance policy required pursuant to this Deed of Trust is canceled or the coverage provided thereunder is reduced, Trustor shall, within ten (10) days after receipt of written notice of such cancellation or reduction in coverage, but in no event later than the effective date of cancellation or reduction, file with Beneficiary a certificate showing that the required insurance has been reinstated or provided through another insurance company or companies. Upon failure to so file such certificate, Beneficiary may, without further notice and at its option, procure such insurance coverage at Trustor's expense, and Trustor shall promptly reimburse Beneficiary for such expense upon receipt of billing from Beneficiary.

7. Defense of Security. Trustor agrees to appear in and defend an action or proceeding purporting to affect the security hereof or the rights or powers of Beneficiary or Trustee; and to pay all costs and expenses, including cost of evidence of title and attorney's fees, in any such action or proceeding in which Beneficiary or Trustee may appear.

8. Reimbursement of Costs. Trustor agrees to pay immediately and without demand all sums expended by Beneficiary or Trustee pursuant to the provisions hereof, with interest from date of expenditure at the amount allowed by law in effect at the date hereof.

9. Right to Cure. Should Trustor fail to make any payment or to comply with any provision herein, then Beneficiary or Trustee, each shall have the right but not the obligation, to make such payment or comply with such provision without notice to or demand upon Trustor and without releasing Trustor from any obligation hereof, may make or do the same in such manner and to such extent as either may deem necessary to protect the security hereof. Beneficiary and Trustee are hereby authorized to enter upon the Land for such purposes; appear in and defend any action or proceeding purporting to affect the security hereof or the rights or powers of Beneficiary or Trustee; to pay, purchase, contest, or compromise any encumbrance, charge, or lien which in the judgment of either appears to be prior or superior hereto; and, in exercising any such powers, or in enforcing this Deed of Trust by judicial foreclosure, pay necessary expenses, employ counsel, and pay reasonable attorney's fees. Beneficiary may make or cause to be made reasonable entries upon the Land and inspections of the Property, provided that Beneficiary shall give Trustor reasonable notice prior to any such inspection.

10. Condemnation Award. Any award of damages in connection with any condemnation for public use of or injury to the Property or any part thereof is hereby

assigned and shall be paid to Beneficiary who may apply such moneys received by it to any indebtedness secured hereby and in such order as Beneficiary may determine, or at option of Beneficiary the entire amount so collected or any part thereof may be released to Trustor. Such application or release shall not cure or waive any default or notice of default hereunder or invalidate any act done pursuant to such notice.

11. Late Payment. By accepting payment of any sum secured hereby after its due date, Beneficiary does not waive its right either to require prompt payment when due of all other sums so secured or to declare an event of default under the Loan Agreement for failure so to pay.

12. Release and Subordination. At any time or from time to time, without liability therefor and without notice, upon written request of Beneficiary and presentation of this Deed of Trust and Loan Agreement for endorsement, and without affecting the personal liability of any person for payment of the indebtedness secured hereby, Trustee may reconvey all or any part of said property; consent to the making of any map or plat thereof; join in granting any easement thereon; or join in any extension agreement.

13. Reconveyance. Upon written request of Beneficiary stating that all sums secured hereby have been paid, Trustee shall reconvey, without warranty, the Property. The recitals in any reconveyance executed under this Deed of Trust of any matters or facts shall be conclusive proof of the truthfulness thereof. Trustor shall pay all fees to Trustee and all recordation fees related to such reconveyance.

14. Indemnification. Trustor shall indemnify, defend (with counsel reasonably acceptable to Beneficiary), and hold harmless the Trustee and the Beneficiary from and against all claims arising directly or indirectly in any manner in connection with or as a result of (i) any breach of Trustor's covenants under the Loan Agreement, the Note, or this Deed of Trust (collectively the "**Loan Documents**"), (ii) any representation by Trustor in any Loan Document which proves to be false or misleading in any material respect when made, (iii) injury or death to persons or damage to property or other loss occurring on the Land or in any improvement located thereon, whether caused by the negligence or any other act or omission of Trustor or any other person or by negligent, faulty, inadequate or defective design, building, construction or maintenance or any other condition or otherwise, and (iv) any claim, demand or cause of action, or any action or other proceeding, whether meritorious or not, brought or asserted against Beneficiary which relates to or arises out of the Property, or any Loan Document or any transaction contemplated thereby, or any failure of Trustor to comply with all applicable state, federal and local laws and regulations applicable to the Property, provided that Beneficiary shall not be entitled to indemnification under this Section for matters caused Beneficiary's gross negligence or willful misconduct. The obligations of Trustor under this Section shall survive the repayment of the Loan. Notwithstanding any contrary provision contained herein, the obligations of Trustor under this Section shall survive any foreclosure proceeding, any foreclosure sale, any delivery of a deed in lieu of foreclosure, any reversion in interest, and any release or reconveyance of this Deed of

Trust.

15. Limitation of Liability. Beneficiary shall not be directly or indirectly liable to Trustor or any other person as a consequence of any of the following: (i) Beneficiary's exercise of or failure to exercise any rights, remedies or powers granted to Beneficiary in this Deed of Trust; (ii) Beneficiary's failure or refusal to perform or discharge any obligation or liability of Trustor under any agreement related to the Property or under this Deed of Trust; (iii) any waste committed by Trustor or any third parties, or (iv) any dangerous or defective condition of the Property. Trustor hereby expressly waives and releases all liability of the types described in this Section, and agrees that Trustor shall assert no claim related to any of the foregoing against Beneficiary.

16. Notice. Except for any notice required under applicable law to be given in another manner, any notice, request or consent required pursuant to this Agreement shall be deemed delivered upon receipt when delivered personally or by facsimile transmission, provided that a transmission report is generated reflecting the accurate transmission thereof, or three (3) business days after being deposited in the U.S. mail, first class postage prepaid, return receipt requested, or one (1) day after deposit with a nationally recognized overnight carrier addressed as follows:

City:               Pittsburg Power Company  
                      65 Civic Avenue  
                      Pittsburg, CA 94565  
                      Attn: Executive Director

Copy to:       Ruthann G. Ziegler  
                    Agency Counsel  
                    555 Capitol Mall, Suite 1200  
                    Sacramento, CA 94565

Developer:    Natalie Cooper  
                    [INSERT ADDRESS]  
                    Pittsburg, CA 94565

or to such other addresses as the parties may designate by notice as set forth above.

17. Due On Sale Without the Consent of Beneficiary. If the Property, any part of it, or interest in it is sold, or if Trustor agrees to sell, convey, or alienate said property, by operation of law or otherwise pursuant to the transfer provisions of Section 2.5 of the Loan Agreement, all obligations secured by this Deed of Trust shall immediately become due and payable.

18. Trustor's Right to Reinstate. Notwithstanding Beneficiary's acceleration of the sums secured by this Deed of Trust due to Trustor's breach, Trustor shall have the right to have any proceedings begun by Beneficiary to enforce this Deed of Trust discontinued at any time prior to entry of a judgment enforcing this Deed of Trust if:

(i) Trustor pays Beneficiary all sums which would be then due under this Deed of Trust if the Loan had no acceleration provision; (ii) Trustor cures all breaches of any other covenants or agreements of Trustor contained in this Deed of Trust; (iii) Trustor pays all reasonable expenses incurred by Beneficiary and Trustee in enforcing the covenants and agreements of Trustor contained in this Deed of Trust, and in enforcing Beneficiary's and Trustee's remedies as provided herein, including, but not limited to, reasonable attorney's fees; and (iv) Trustor takes such action as Beneficiary may reasonably require to assure that the lien of this Deed of Trust, Beneficiary's interest in the Property and Trustor's obligation to pay the sums secured by this Deed of Trust shall continue unimpaired. Upon such payment and cure by Trustor, this Deed of Trust and the obligations secured hereby shall remain in full force and effect as if no acceleration had occurred.

19. Successors and Assigns. The terms, covenants and conditions of this Deed of Trust shall be binding on and inure to the benefit of the heirs, legatees, devisees, administrators, executors, successors in interest, transferees and assigns of the Trustor, Beneficiary and Trustee.

20. Substitution of Trustee. Beneficiary may from time to time or at any time substitute a Trustee or Trustees to execute the trust hereby created, and when any such substitution has been filed for record in the office of the recorder in Contra Costa County, it shall be conclusive evidence of the appointment of such Trustee or Trustees, and such new Trustee or Trustees shall succeed to all of the powers and duties of the Trustee or Trustees named herein.

IN WITNESS WHEREOF, the Trustor has executed this Deed of Trust.

3009913.2

**OFFICE OF THE CITY MANAGER/EXECUTIVE DIRECTOR  
65 Civic Avenue  
Pittsburg, CA 94565**

**DATE:** 8/17/2018

**TO:** Mayor and Council Members

**FROM:** Joe Sbranti, City Manager

**SUBJECT:** Adoption of a City Council Resolution Approving the Terms and Conditions of Employment for Teamsters Union, Local 856 for the Period July 1, 2018–June 30, 2020.

**MEETING DATE:** 9/4/2018

**EXECUTIVE SUMMARY**

The Memorandum of Understanding between the City of Pittsburg and the Teamsters Union, Local 856 expired on June 30, 2018. The City and Teamsters representatives have reached a tentative agreement on the terms and conditions of employment for fiscal years 2018–2019 and 2019–2020 that provides for a salary adjustment for all classifications, as well as the implementation of significant cost sharing measures relating to the California Public Employees Retirement System (CalPERS). Should Council approve these terms, staff will prepare successor MOUs that incorporate the agreed upon changes.

**FISCAL IMPACT**

The total net cost of the comprehensive compensation package is approximately \$463,000 over fiscal years 2018–19 and 2019–20. The Teamster agreement includes significant cost containment of the City's CalPERS employer contributions that reduces the City's financial obligation by approximately \$41,000 over the contract and has members contributing 8% normal costs and 1% toward the CalPERS unfunded liabilities. Due to the structure of the package negotiated approximately \$150,000 in costs were moved up to the first year of the two-year contract.

Additional appropriations in the amount of \$24,443 for the General Fund and a net increase of \$2,710 for all other funds are required for the current fiscal year as per attached.

Additionally, authorization is required for the use of one-time funds as described below.

Funding for FY 2019–20 will be incorporated into the City's future annual budgets.

The City shall issue all Teamsters employees a single payment of \$500 upon ratification of the contract and all Teamsters employees will be eligible payment(s) for one-time non-budgeted general fund revenues during the time period of April 1, 2019 to June 30, 2020 up to 50% of the total amount collected but not more than \$1,500 per employee or above 50% of any single payment received up to one-time payments received up to \$400,000.

Payments will be paid out based upon total available to all members proportionally to the total received when the funds are received on the next payroll check run after receiving the one-time funds.

## **RECOMMENDATION**

Adopt a Resolution approving the August 10, 2018 tentative agreement, authorizing the City Manager to prepare and execute a successor memorandum of understanding between the City of Pittsburgh and the Teamsters Union, Local 856 for the period of July 1, 2018 – June 30, 2020, and authorizing corresponding budget appropriations, expenditures, and funding to be incorporated into the 2019 and 2020 annual budgets.

## **BACKGROUND**

Pittsburg employees are deeply committed to providing a level of excellence in public service and strive to respond effectively and efficiently to the needs of the Pittsburgh community. City employees within the Teamsters bargaining unit have not received a salary adjustment since July 2017, at which time a 4% increase was applied. No other wage increase or cost of living adjustments have been provided since that time. The City is cautious that recruitment efforts may be impacted as the City's pay ranges for member classifications have remained stagnant while other organizations have provided cost of living increases and adjusted salary ranges accordingly. In addition, in recognition of the increasing cost and future liability created by CalPERS, the parties agreed to cost sharing of employer contributions made on behalf of the employee to the retirement system that results in significant cost containment savings. Council received a detailed briefing on these financial aspects at their public meeting of March 19, 2018.

The key terms of the agreement are as follows, and apply to all employees represented by Teamsters:

### **COMPENSATION & TERM**

Term of contract:

Two (2) years (July 1, 2018 – June 30, 2020)

Compensation Adjustment:

Effective July 1, 2018, all employees will receive a five percent (5%) cost of living increase.

CalPERS UAL Cost Sharing:

Effective July 1, 2018, Tier I (2% @ 55 formula) and Tier II (2% @ 60 formula) employees will pay an additional one percent (1%) of his/her salary toward CalPERS unfunded accrued liability pension costs for a total of 9%.

Off Salary Range One-Time-Only Payment:

Effective the first full pay period following the ratification and adoption of this agreement by both parties, the City shall pay each bargaining unit member \$500.00.

Should the City realize up to \$400,000.00 in non-budgeted one-time general fund revenues between April 1, 2019 and June 30, 2020, the City shall pay each Teamsters member up to \$1,500.00 following receipt of the one-time revenue. If amounts less than the full \$400,000.00 are received, proportionate payments will be made to Teamsters members based upon the funds received on a quarterly basis or as soon as possible.

## BENEFIT ADJUSTMENTS

### Medical Insurance:

The City's contribution toward a medical insurance plan shall be set at 100% of the applicable Kaiser rate.

### Uniform Allowance:

The City shall increase uniform allowance for work boots/shoes and work pants to \$550.00 per year.

### Deferred Compensation:

The City's matching contribution to the 457 Plan shall increase to \$125.00 per month.

### Service Awards:

Effective July 1, 2018, the City shall discontinue issuing service awards.

### Service Achievement Incentive Plan:

Effective July 1, 2018, at the completion of milestones of service, the City shall issue the following hours into the employee's reserve vacation bank:

Five (5) years of service – 40 hours

Ten (10) years of service – 50 hours

Fifteen (15) years of service – 60 hours

Twenty (20) years of service – 70 hours

Twenty-five (25) years of service – 80 hours

Thirty (30) years of service – 80 hours

Thirty-five (35) years of service – 80 hours

Forty (40) years of service – 80 hours

Upon implementation, employees with at least five (5) years of service, but less than 10 years of service, shall receive a preliminary reserve vacation bank of 20 hours; employees with 10 years or more of service shall receive a preliminary reserve vacation bank of 40 hours.

The Teamsters membership ratified the parameters of the tentative agreement on August 15, 2018. For additional details and changes to terms and conditions of employment, please refer to Attachment 1 (Tentative Agreement between the City of Pittsburgh and Teamsters, dated August 10, 2018).

## **SUBCOMMITTEE FINDINGS**

Not applicable.

## **STAFF ANALYSIS**

The Memorandums of Understanding between the City of Pittsburgh and the Teamsters Union, Local 856 expired on June 30, 2018. The City and Teamsters representatives have been meeting since May 2018 to develop a successor Memorandum of Understanding.

The City Council had four goals for this round of negotiations:

1. Treat employees fairly;
2. Position the City to be competitive for recruitment and retention;
3. Obtain agreements that meet the City's long-term goal of fiscal sustainability; and

4. Modify CalPERS cost sharing to achieve sustainability of the benefit and significantly reduce the City's unfunded liability.

All of these goals have been achieved by the Agreement. The cost containment measures for the CalPERS cost sharing will have a positive and significant financial impact on the City and result in a more sustainable retirement program for current and future retirees. Should Council approve these terms, staff will prepare a successor MOU that incorporate the agreed upon changes.

## 2. Term

This Memorandum of Understanding shall be in effect July 1, 201~~8~~<sup>5</sup>, except for those provisions of the Memorandum of Understanding which have been assigned other effective dates as hereinabove set forth, and shall remain in full force and effect to and including June 30, 20~~2018~~<sup>2018</sup> and shall continue thereafter from year to year unless during the thirty (30) day period beginning February 15, 20~~2018~~<sup>2018</sup> or February 15 of any subsequent year either party has delivered written notice to the other of its desire to amend, modify, or terminate this Memorandum of Understanding. Unless mutually agreed to otherwise, negotiations for a successor Memorandum of Understanding shall begin no later than thirty (30) days subsequent to the delivery of such notification.

## **4. Salaries**

Salary ranges for represented classification shall be as set forth in Appendix A, which is attached hereto and made a part hereof.

- A. Effective ~~July 5, 2015~~ July 1, 2018 the City shall provide a five percent (5%) ~~four percent (4%)~~ increase to all current salary steps within the unit.

- B. Off Salary Range One-Time-Only Payment(s)

Effective the first full pay period following the ratification and adoption of this agreement by both parties, the City shall pay each bargaining unit member \$500.00.

Should the City realize up to \$400,000.00 in non-budgeted one-time general fund revenue between April 1, 2019 and June 30, 2020, the City shall pay each bargaining unit member up to \$1,500.00 following the receipt of the one-time funds. If amounts less than the full \$400,000.00 are received, proportionate payments will be made to Teamsters members based upon the funds received. Proportionate payments will occur on the following quarter basis. ~~Effective the first pay period in Fiscal Year 2017/2018 (July 2, 2017) the City shall provide a five percent (5%) increase to all salary steps within the unit.~~

- C. Beginning July 5, 2015, the City shall implement 40.00 hours of an unpaid winter closure in each fiscal year. This shall be accomplished by a mandatory wage reduction of one point nine two five percent (1.925%). The Winter Closure shall take place sometime during the period of December 1 and January 31 of each fiscal year and shall consist of forty (40) hours time off during that time frame. The City shall determine the actual winter closure schedule for each employee in the unit based on the service needs of their department. This winter closure shall become the status quo.

**TEAMSTERS LOCAL 856**

To accomplish a one point nine two five percent (1.925%) reduction in pay, bargaining unit members will have their salaries reduced by 1.54 hours per pay period beginning July 5, 2015. The hours will be noted as a separate line item deduction on the employee's paycheck and will equal 1.54 times the hourly rate of pay in effect at the time of the deduction. This deduction will not otherwise reduce the bargaining unit member's existing base salary amount for City benefit accrual purposes.

If a non-exempt employee is called in to work on an unplanned or emergency basis during his or her scheduled holiday closure time, that employee shall be paid overtime for any such hours worked (versus receiving additional holiday closure time to be taken at a later time).

## 5.1 Medical Insurance

The City will provide a medical insurance plan through Kaiser Permanente, and will make every reasonable effort to maintain a second option through a Non-Kaiser HMO plan that allows members to choose their physician based on that physician's ability to accept coverage through said plan. Additionally, the City will explore providing multiple co-pay options.

City's contribution toward ~~medical insurance~~Kaiser Permanente

~~Effective January 1, 2015 the City's contribution for a full-time employee and his/her eligible dependents for each level of benefit (single, dual, and family) for Kaiser Permanente medical insurance shall be set at:~~

|                                    |                      |
|------------------------------------|----------------------|
| Employee only (single)             | \$708.91 per month   |
| Employee plus one (dual)           | \$1,417.87 per month |
| Employee plus two or more (family) | \$2,006.32 per month |

~~Effective January 1, 2016 the City's contribution for a full-time employee and his/her eligible dependents for each level of benefit (single, dual, and family) for Kaiser Permanente medical insurance shall be set at:~~

|                                    |                      |
|------------------------------------|----------------------|
| Employee only (single)             | \$751.44 per month   |
| Employee plus one (dual)           | \$1,502.94 per month |
| Employee plus two or more (family) | \$2,126.70 per month |

~~Effective January 1, 2017 the City's contribution for a full-time employee and his/her eligible dependents for each level of benefit (single, dual, and family) for Kaiser Permanente medical insurance shall be set at ninety-nine percent (99%) of the actual premium costs. Employees will be responsible for one percent (1%) of actual premium costs for the Kaiser Plan.~~

Effective January 1, 201~~9~~<sup>98</sup> the City's contribution for a full-time employee and his/her eligible dependents for each level of benefit (single, dual, and family) for ~~Kaiser Permanente~~ medical insurance shall be set at one hundred percent (100%) of the Kaiser Permanente actual-premium ~~rate~~costs. Employees electing

**TEAMSTERS LOCAL 856**

to enroll in a medical insurance plan with premium rates higher than the Kaiser Permanente premium rate shall be required to pay the difference in premium rates between the Kaiser Permanente premium rate and the higher plan premium rate selected by the employee.

City's contribution toward Non-Kaiser HMO Plan Option

In so long as the City maintains the ability to provide a Non-Kaiser HMO Plan option, the City shall provide:

Effective January 1, 2015 the City's contribution for a full-time employee and his/her eligible dependents for each level of benefit (single, dual, and family) for Non-Kaiser HMO Plan medical insurance shall be set at:

|                                    |                      |
|------------------------------------|----------------------|
| Employee only (single)             | \$791.27 per month   |
| Employee plus one (dual)           | \$1,582.51 per month |
| Employee plus two or more (family) | \$2,239.27 per month |

Effective January 1, 2016 the City's contribution for a full-time employee and his/her eligible dependents for each level of benefit (single, dual, and family) for Non-Kaiser HMO Plan medical insurance shall be set at:

|                                    |                      |
|------------------------------------|----------------------|
| Employee only (single)             | \$838.75 per month   |
| Employee plus one (dual)           | \$1,677.46 per month |
| Employee plus two or more (family) | \$2,373.63 per month |

Effective January 1, 2017 the City's contribution for a full-time employee and his/her eligible dependents for each level of benefit (single, dual, and family) for Non-Kaiser HMO Plan medical insurance shall be set at:

|                                    |                      |
|------------------------------------|----------------------|
| Employee only (single)             | \$893.26 per month   |
| Employee plus one (dual)           | \$1,786.50 per month |
| Employee plus two or more (family) | \$2,527.91 per month |

Effective January 1, 2018 the City's contribution for a full-time employee and his/her eligible dependents for each level of benefit (single, dual, and family) for Non-Kaiser HMO Plan medical insurance shall be set at:

|                          |                      |

## 5.9 Retirement

All current and new employees will be covered by the Public Employees' Retirement System (PERS) plans in accordance with the California Public Employees' Pension Reform Act of 2013 (PEPRA).

- A. For all represented employees hired by the City of Pittsburg before July 10, 2011 and enrolled in the City's non-safety PERS benefit with an effective date before July 10, 2011 the employee shall be covered by a pension program provided by the State of California Public Employees' Retirement System (PERS) to the City through a contract. This system, known as the 2% at 55 formula, is described periodically in brochures distributed by PERS.

The City agrees to provide PERS retirement benefits and maintain the following enhancements to the basic PERS 2% at 55 formula:

- a) One Year Final Compensation (Section 20042)
- b) Annual Cost-of-Living Increase at 3% (Section 21335)
- c) Military Service Credit as Public Service (Section 21024)
- d) Credit for Unused Sick Leave (Section 20965)
- e) EPMC as Additional Compensation (Section 20691)

- B. For all represented employees hired by the City of Pittsburg on or following July 10, 2011 and enrolled in the City's non-safety PERS benefit with an effective date of July 10, 2011 or later the employee shall be covered by a pension program provided by the State of California Public Employees' Retirement System (PERS) to the City through a contract under the 2% at 60 formula, based on the average monthly pay over a thirty-six month period ("3 year average") with a 2% annual cost-of-living increase and as is described periodically in brochures distributed by PERS. The City agrees to provide and maintain the following enhancements to the basic PERS 2% at 60 formula:

- a) Military Service Credit as Public Service (Section 21024)

**TEAMSTERS LOCAL 856**

- b) Credit for Unused Sick Leave (Section 20965)
- c) EPMC as Additional Compensation (Section 20691)

Employees enrolled in the 2% at 55 formula or the 2% at 60 formula shall contribute the entire seven percent (7%) employee share.

- C. For all represented employees hired on or after January 1, 2013, who are considered "new members" under California Government Code Section 7522.04(f), shall be in the 2% at 62 CalPERS retirement formula described in Government Code Section 7522.20(a). In addition, "new members" shall be subject to the equal sharing and contribution requirements in Section 7522.30(a) and (c) and shall pay at least 50% of the normal costs.

Effective for Fiscal Year 2017/18 and implemented on July 2, 2017 all employees within the unit will contribute an additional 1% of salary towards pension costs.

Effective July 1, 2018 all classic members within the unit will contribute an additional one percent (1%) of salary toward CalPERS unfunded accrued liability pension costs.

July 17, 2018

Revised: July 27, 2018

## 6.1 Uniform Allowance

Employees who are required by their department head to wear a uniform shall be provided with work uniforms at City expense. Uniforms will be replaced, as needed, thereafter.

Work uniforms shall be appropriate for the typical functions performed and consistent with good safety practices. The department heads shall determine the color, style and lettering on the uniforms to be worn by their subordinates, subject in each case to the approval of the City Manager.

The City shall furnish as an initial issue to each regular employee three (3) work uniform shirts, and may include depending on the job function one (1) cold weather coat, and two (2) sweatshirts. The employee shall be responsible for laundering and mending their work uniforms at their expense. Whenever a work uniform shirt, or a part thereof, is worn out or damaged beyond repair, the employee shall turn said work uniform shirt in to his/her department head and shall be issued replacement work uniform shirts therefore.

1. The uniform allowance for work boots/shoes and work pants is five-hundred fifty dollars (\$~~550.00~~). The uniform allowance is payable twice a year with a regular paycheck, for the first pay period in June and the first pay period in December, representing payment for the prior six (6) month period. Employees not employed for the full six (6) month period will be entitled to a prorate share of the six (6) month allowance.

The department director shall prescribe minimum standards of appearance for their department's employees. Different standards may be applied to different classes, depending upon the type of work required of the employees. Employees shall be neatly groomed and suitably dressed for their duties, so that they present a favorable appearance to the public.

2. The City can meet its obligations under this Section by contracting with a uniform services firm to provide and launder work uniforms.

# CITY COUNTER PROPOSAL

July 27, 2018

## 6.6 Service Award

A regular full-time employee shall receive in December, if currently employed, service award pay based upon his/her total years of continuous City service, based on the following timetable and amounts:

| <u>Years of City Service</u> | <u>Service Award Amount</u> |
|------------------------------|-----------------------------|
| 10 years                     | \$200                       |
| 15 years                     | \$300                       |
| 20 years                     | \$400                       |
| 25 years                     | \$500                       |
| 30 years                     | \$600                       |
| 35 years                     | \$700                       |
| 40 years                     | \$800                       |
| 45 years                     | \$900                       |

Effective July 1, 2018, the City shall discontinue issuing service awards to employees and implement the Service Achievement Incentive Plan outlined in section 7.1 – Vacation Accrual. Upon implementation, employees eligible for service award pay between January 1, 2018 and June 30, 2018, shall receive a bank of reserve vacation hours in accordance with the provisions of the Service Achievement Incentive Plan, in lieu of receiving the pay associated with the service award in section 6.6.

## 7.1 Vacation Accrual

The vacation accrual rate for regular full-time employees shall be:

| <u>Years of City Service</u> | <u>Accrual Rate</u>                        |
|------------------------------|--------------------------------------------|
| 0-5 Years                    | Accrue 3.08 hours per pay period (10 days) |
| 6-10 years                   | Accrue 4.62 hours per pay period (15 days) |
| 11 years                     | Accrue 4.92 hours per pay period (16 days) |
| 12 years                     | Accrue 5.23 hours per pay period (17 days) |
| 13 years                     | Accrue 5.54 hours per pay period (18 days) |

|                   |                                            |
|-------------------|--------------------------------------------|
| 14 years          | Accrue 5.85 hours per pay period (19 days) |
| 15-19 years       | Accrue 6.15 hours per pay period (20 days) |
| 20 and more years | Accrue 7.69 hours per pay period (25 days) |

A. Service Achievement Incentive Plan - The City acknowledges the value of retaining experienced employees. In recognition of previous years of full-time continuous service with the City, the City shall implement a Service Achievement Incentive Plan as follows:

1. At the completion of five (5) years of service, the employee shall receive 40 hours of vacation to be added to the employee's reserve vacation bank.
2. At the completion of 10 years of service, the employee shall receive 50 hours of vacation to be added to the employee's reserve vacation bank.
3. At the completion of 15 years of service, the employee shall receive 60 hours of vacation to be added to the employee's reserve vacation bank.
4. At the completion of 20 years of service, the employee shall receive 70 hours of vacation to be added to the employee's reserve vacation bank.
5. At the completion of 25 years of service, the employee shall receive 80 hours of vacation to be added to the employee's reserve vacation bank.
6. At the completion of 30 years of service, the employee shall receive 80 hours of vacation to be added to the employee's reserve vacation bank.
7. At the completion of 35 years of service, the employee shall receive 80 hours of vacation to be added to the employee's reserve vacation bank.
8. At the completion of 40 years of service, the employee shall receive 80 hours of vacation to be added to the employee's reserve vacation bank.

9. Upon initial implementation of the Service Achievement Incentive Plan, effective July 1, 2018:

- a) Employees with at least five (5) years, but less than 10 years of full-time continuous service with the City shall receive a preliminary reserve vacation bank of 20 hours.
- b) Employees with 10 years or more of full-time continuous service with the City shall receive a preliminary reserve vacation bank of 40 hours.

The Service Achievement Incentive Plan bank shall not have a vacation leave accrual limit. Employees may utilize the reserve vacation bank accrued hours in accordance with section 7.2 - Use of Vacation.

Regular part-time employees shall accrue vacation in the amount proportionate to the ratio of scheduled hours of work per work week to the standard work week, but in no case shall the number of days of vacation accrued per year exceed those days allowed for a similarly classified full-time employee.

## 15. Grievances

### 15.1 Grievance Definition

A grievance is any dispute which involves the claimed violation, the (mis)interpretation or (mis)application of the collective bargaining agreement, Personnel Rules, or department rules and regulations, resolutions, or ordinances. A grievant may be an employee, or any group of employees, or a represented bargaining unit. Disciplinary actions, performance evaluations, and other proceedings for which there are alternative appeal procedures or statutory remedies are not grievable.

### 15.2 Grievance Procedure

A grievance shall be processed in the following manner:

#### Step 1.

Within fourteen (14) days of the event or discovery of the event giving rise to the grievance, the grievant will discuss the grievance verbally with the grievant's immediate supervisor. For good and sufficient reason, the grievant may initiate the grievance at Step 2. The grievant will clearly state that a grievance is being initiated, and the parties will discuss the matter and attempt to resolve the grievance.

#### Step 2.

If the grievance is not resolved in Step 1, the grievance shall be reduced to writing and presented to the department head within twenty-eight (28) days of the event or discovery of the event giving rise to the grievance. The written grievance shall contain the following:

1. name of grievant(s)
2. class title(s)
3. department
4. mailing address(e's)

TA \_\_\_\_\_

Date: \_\_\_\_\_

TA \_\_\_\_\_

Date: \_\_\_\_\_

**COLLECTIVE BARGAINING BETWEEN**

**CITY OF PITTSBURG**

**AND**

**TEAMSTERS LOCAL 856**

5. a clear statement of the nature of the grievance (citing applicable sections of rules, regulations, resolutions, ordinances or existing practices)
6. the date(s) on which the event(s) giving rise to the grievance occurred
7. a proposed solution to the grievance
8. the date of execution of the grievance form
9. the signature of the grievant(s)
10. the signature of the bargaining unit representative, if such a representative is representing the grievant(s)
11. the date of the discussion meeting in Step 1 and the name of the supervisor involved

The department head will investigate the grievance and confer with the grievant(s) in an attempt to resolve the grievance. The department head will issue his/her decision regarding the grievance in writing within fourteen (14) days of receipt of the written grievance.

**Step 3.**

If the grievance is not resolved by the department head's decision in Step 2, the grievant(s) may appeal the written grievance to the City Manager or designee (other than the supervisor and/or department head involved) within fourteen (14) days of receipt of the department head's decision in Step 2. The City Manager or designee will investigate the grievance, confer with persons affected and their representatives, if any, to the extent he/she deems necessary and render a decision within fourteen (14) days of receipt of the written decision.

**Step 4.**

In the event the grievant disagrees with the decision of the City Manager or designee, the grievant shall have the opportunity to lodge a request for review by the City Council within seven (7) days of receipt of the City Manager's or designee's decision. The City Council shall conduct a review of the City Manager's decision with the authority to either affirm, reverse, or modify the City Manager's or designee's decision. The City Council shall render a decision

**TEAMSTERS LOCAL 856**

within two regularly scheduled City Council meetings following the request for review.

**15.3 General Conditions of Grievances**

1. The Human Resources Director will act as a central repository for all Step 2 and ~~Step 3~~beyond grievance records.
2. Any time limit may be extended only by mutual agreement in writing.
3. An aggrieved employee may be represented by another individual at any stage of the proceedings at his/her request. Both employee and representative (if employed by City) will be entitled to attend proceedings without loss of compensation, should such proceeding conflict with employee's and/or representative's normal working hours.
4. Proposals to add to or change the Personnel Rules shall not be considered under this section, and no proposal to modify, amend, or terminate any Memorandum of Understanding between the City and a collective bargaining unit may be considered under this section.
5. Failure by the grievant or grievant's representative to initiate or appeal a grievance within the prescribed time limits shall waive the right of the grievant, the grievant's representative, and the grievant's collective bargaining unit (if any) to initiate or appeal a grievance. In the case of an appeal, the last answer to the grievance shall be deemed to be the resolution to the grievance. Failure of the City to respond to a grievance within the prescribed time limits shall be cause for the grieving party to automatically move the grievance to the next step.

## **16. Joint Labor Management Committee (JLMC)**

The City Manager or his/her designee and other management representatives chosen by the City Manager will meet on a quarterly basis with an equal number of representatives of the bargaining unit and a Teamsters 856 Business Representative to address relevant and timely labor relations issues, unless otherwise agreed to by the parties.

Effective upon ratification and adoption of this agreement, both parties will convene monthly for the first six (6) consecutive months to discuss the classification and/or compensation matters of the Marina Maintenance Worker, Utility Technician I/II, and Water Treatment Plant Operator classifications.

The JLMC meeting agenda shall include any matters within the scope of representation, with exception of those matters which have already been filed as grievances, unless otherwise agreed to by the parties. The City does not waive any management rights through its participation on this committee.
